The numbers refer to pages

- Additive contravariant functor 9
 Additive covariant functor 2
 Algebra 185
 Annihilator 144
 Annihilator ideal of a module 179
 Anti-isomorphism 127
 Artinian module 137
 Artinian ring 137
 Ascending chain condition 136
- Bidual 141
 Bifunctor 12
 Bihomomorphism 1
 Bimodule 1
 Biproduct 2
- Central element 66
 Central ideal 185
 Closed submodule 145
 Cogenerator of a category 111
 Composition series 154
 Connecting homomorphism 64
 Contravariant functor 8
 Covariant functor 2
 Cyclic module 71
- Descending chain condition 137
 Diagram in a category 62
 Divisible module 32
 Division ring 170
 Double dual 141
 Dual base 140
 Duality functor 140
 Dual of a module 135
- Endomorphism ring of a module 118
 Equivalent categories 112
 Equivalent extensions 84
 Equivalent functors 15
 Essential extension 35
 Essential monomorphism 38
 Exact functor 7
 Extension functor 60
 Extension of one module by another 83
- Faithful functor 109
 First extension functor 60
 Formal power series 173
 Free module 27
 Fully faithful functor 112
- Generator of a category 109
 Global dimension of a ring 78
 Grade of an ideal on a module 190
 Group ring 158
- Half exact contravariant functor 10
 Half exact covariant functor 7
 Hilbert's basis theorem 138
 Hilbert's syzygies theorem 109
 Hom functor 23
- Identity functor 15
 Indecomposable injective 119
 Injective dimension of a module 77
 Injective envelope 36
 Injective module 30
 Injective resolution 79
 Inverse equivalences 112
 Invertible ideal 29
 Irreducible submodule 185
- Ker–Coker sequence 64
- Left exact contravariant functor 10
 Left exact covariant functor 7
 Length of a module 154
 Local ring 172
- Maximal condition for submodules 136
 Minimal condition for submodules 137
 Minimal injective resolution 79
 Minimal projective resolution 169
 Minimal set of generators 171
- Nakayama's lemma 170
 Naturally equivalent functors 15
 Natural transformation of functors 14

Cambridge University Press

[More information](#)**206**

Noetherian module 136
 Noetherian ring 136
 Non-trivial ring 105
 Non-zero-divisor on a module 81
 Normal primary decomposition 181

Opposite of a ring 127

Perfect duality 152
 Polynomial functor 106
 Primary decomposition 181
 Primary submodule 180
 Prime ideal 179
 Prime ideals belonging to a sub-
 module 183
 Projective cover 168
 Projective dimension of a module 76
 Projective module 26
 Projective resolution 79

Quasi-Frobenius ring 151
 Quasi-local ring 170

Radical of an ideal 179

INDEX

Radical of a quasi-local ring 170
 Reflexive module 141
 Right exact contravariant functor 10
 Right exact covariant functor 7

Second extension functor 74
 Semi-commutative quasi-local algebra
 191
 Semi-reflexive module 141
 Semi-simple ring 32
 Similar diagrams 62
 Simple module 32
 Split exact sequence 5
 Split extension 84
 Strongly semi-commutative quasi-
 local algebra 191
 Structural homomorphism 185

Torsion element 142
 Torsion-free module 142
 Torsionless module 141
 Torsion submodule 142
 Translation of one diagram into
 another 62
