 - error estimate, 149–51
- Neumann
- problem, 269, 274, 286–7, 295, 360–1, 367, 412
 - series, 235, 365
- Newtonian physics, 29–30, 49, 85

- Newton's method, 211, 475, 476
 nonstandard analysis, 470
 numerical methods
 boundary value problem, 318, 473–8
 overdamped initial-value problem, 207–18
- ocean circulation, 305
 O'Malley construction, 437
 O'Malley/Hoppensteadt
 approximate solution, 197–8, 204
 construction (method), 141, 145–8, 163, 177–89, 196–8, 228
- operator
 differential, 1, 12, 18, 19, 92, 98, 141
 integral, 99
 optimal control, 165, 340, 370–81
 order symbol (Landau), 24
 oscillator (equation)
 cubically damped, 42, 50–2, 74, 80–2, 110–12, 119
 Duffing, 52, 74, 82
 van der Pol, 41–2, 46, 52, 74, 78–80
 Rayleigh, 41–3, 74
 outer (solution) approximation, 133–5, 138–40, 145–7, 177–81, 246–53, 370, 392–3, 431, 452–5
- partial differential equation, 45, 75–6, 151, 153–62, 271, 305, 400, 437
 Picard iteration (successive approximation), 6, 8, 10
 population (ecological) kinetics, 403
 potential drop, 460–2
 floating, 449, 462
 precession of perihelion, 49
 projection matrix (operator), 222, 230, 332, 334–5, 355, 377
 Prüfer substitution, 93
- quasi-linear system, 191, 216, 426
- Rayleigh oscillator, *see* oscillator
 relaxation oscillations, 41
 residual, 95–7, 104, 142, 198, 255, 281–2, 293–4, 358, 397, 407–8, 434, 442, 443, 469, 472–3
 resolvent kernel (Volterra), 8, 10, 13, 268
 resolvent matrix (Green function for initial-value problem), 168–70, 172, 232, 371
- Riccati
 equation, 339–41, 343, 378, 424, 444
 transformation, 173, 228, 259, 330, 332, 334, 336, 338–54, 356, 360, 367, 373, 378–9, 381, 417, 444–5
 Riemann function, 155
- Robin problem, 286, 298, 386
 Runge/Kutta method, 196, 208, 211, 215, 475
- saddle, 243
 scaled variable, 60–2, 283, 299
 secular effect, 31
 secular term, spurious, 38–9, 61, 63–5, 72–3, 127, 279, 290
 semiconductor, 263, 337, 447–62
 singular singularly perturbed problem, 156, 219, 227
- slow
 time, 60, 62–3, 75, 134
 variable, 167, 216, 331, 363
 speed of light, 31
 stable initial manifold, 181, 222, 224–5, 229–45
 stability condition, 391, 402, 429
 state equation, 370
 stiff problem, 208, 474
 stretched variable, 137, 146
- Sturm
 comparison theorem, 265
 transformation, 12–4, 136, 264, 288, 319
 subcharacteristic, 154–5, 162
 successive approximation, 8, 10, 20
 supremum (maximum, infinity) norm, 16, 17, 21
- Taylor/Cauchy formula, 98, 147, 149, 199, 397
 Taylor expansion, 22–3, 38, 76, 178–9
 telegraph equation, 153–62, 219, 227
 thermodynamic-chemical process, 276
 transference of vibrations, 84–9
 transition (turning) point, 263, 265, 318–29, 332
 angular, 388
 inside boundary layer, 413, 430, 474
 two-body equation, 30
 two-timing technique, *see* multiscale technique
- unimodular matrix, 339, 347
- van der Pol oscillator, *see* oscillator
 variation of parameters, 1–3, 42–3, 46, 56, 113, 168–9, 176, 371, 407, 421
 Volterra integral equation, 6, 7–10, 268
- wave equation (perturbed)
 oscillatory, 45, 75–6
 overdamped, 153–62
 wind stress, 305
 wronskian, 93, 407
