Index

- Absolute continuity
 - of product integral, 55
 - norm, 92
 - of upper integral, 116
 - absolutely exponentiable matrix, 231
- Ad A, 70, 201
- Alternate definitions of product integral, 50, 52, 53, 55
- Analogy between theory of product integration and usual theory of integration, 11
- Analytic matrix function, 62
- Analyticity of product integral in parameter, 36
- Anomalous asymptotic behavior, 125, 128
- Applications, 121
- Approximation
 - procedure, 9
 - by terms of time ordered exponential, 29
 - theorem, 89
 - of unbounded operators by bounded ones, 109
- Asymptotic behavior, 38, 40, 41, 48, 121, 122, 123, 124, 125, 128, 130, 131, 134, 149, 151, 182
 - anomalous, 125, 128
 - applications to scattering theory, 149
 - expected, 128
 - for large k^2 , 131
 - strange, 128
- Banach space, 57, 73, 77, 79, 188
- Basis, 13
- Bessel
 - equation, 36
 - functions, 40, 41
- Binary operation, 190
- Bochner integrable functions, 83, 185, 188
- Bochner integral, 81, 82, 83, 90, indefinite, 83
- Bounded variation (of product integral of measure), 163
- Bounds, 5, 28, 55, 99, 107, 155, 171
- Branch point, 72
- Cartan's factorization lemma, 235
- Cauchy integral formula (for product integrals), 66, 69, 73
- Cauchy integral theorem (for product integrals), 59, 62
- Change of variable formula, 27, 55, 106
- Chapman-Kolmogorov equations, 228, 229–230
- Characteristic equation, 16, 199
- Columns of matrix, 13
- Commutator, 49
- Commuting operators or matrices, 2, 44, 68, 101, 158
- Complex numbers, 193
 - complex conjugate of, 193
 - modulus or absolute value of, 193
 - Euclidian norm on, 193
 - \mathbb{C}^n , 193
 - complex matrix, 194
 - $\mathbb{C}^{n \times n}$, 194
- Composition (as binary operation for defining product integral), 191
- Constructive flavor of product integration, 3
- Continuation of solutions, 66
- Continuity
 - in L^1 sense, 34
 - norm, 80
 - strong, 84, 87, 89, 101, 104, 119
 - weak, 87, 119
 - left, 155, 159, 170
 - of product integral in parameter, 34
- Continuous differentiability of product integral of a continuous function, 9, 19
- Continuous operations, 191
- Contour, 60
 - Concentric, 65
- Contour product integrals, 57, 59
- Contraction semigroup, 109, 138
- Convergence, 44, 48, 49, 125, 149, 176
 - in L^1 sense, 4, 54
 - in norm, 80
 - strongly, 80
 - weakly, 80
 - in L^s , 88
- Coulomb potential, 125
- Cousin's multiplicative problem, 235

- Delicate convergence theorems, 44, 48, 49, 125, 149, 176
- Dependence on parameter, 32, 55
- Derivative
 strong, 84, 119
 L_s^1 , 92
 L_s^1 s, 92
 weak, 119
- Determinant
 of product integral, 9, 14
 of matrix, 198
- Diagonal matrix, 16, 22, 42, 198
- Differentiability in L^1 sense, 35
- Differentiability of product integral in a parameter, 35
- Differentiability properties of product integrals, 11, 35, 104
- Differential equation, 1, 8, 11, 12, 63, 104, 108, 112, 118, 132, 135, 151, 159, 165, 182
 relation of product integral to all solutions of, 135
 with measures as coefficients, 151, 182
- Differential form, 78
 product integral of, 78
 exact, 78
 closed, 78
- Dimension, 13
- Displacement operator, 217, 220
- Distribution theory, 165, 167
- Domain
 in complex plane, 60
 of operator, 100, 112, 113
 variable, 144
- Double product integral, 57
- Driving term (for differential equation), 85
- Dual (of Banach space), 79
- Duhamel's formula, 33, 55, 107
- E_B , 4, 98, 99, 155
- Eigenmatrix, 70, 202
- Eigenvalue, 16, 70, 199
- Eigenvector, 199
- Equivalence
 step functions, 81
 in L_s^1 , 86, 101
 to zero in L_s^1 , 92
- Essential singularity, 67, 72
- Euler tangent line method, 2
- Evolution equation, 108, 225–226
 forward equation, 226
 backward equation, 226
 linear, 227
- Examples
 Bessel functions, 40
 non-convergence of product integral of improperly integrable function, 44
 convergence of product integral of improperly integrable function, 46
 contour integrals and residue theorem, 68, 75
 on product integral of measure and integral equation, 159
- Exceptional values of k , 127
- Existence and uniqueness theorem, 12
- Exponential function, 80, 200, 220, 221
- Factorization lemma
 of H. Cartan, 235
 of G. D. Birkhoff, 237
- Flows, 216–224
 in smooth manifolds, 216
 in linear manifolds, 217
 in nonlinear manifolds, 219
 steady, 222–224
 with fixed point, 227
- Fundamental set, 13
- Fundamental theorem of product integration, 20, 55
- Gauss-Bonnet formula, 244
- Green's theorem,
 for product integrals, 57, 63, 78, 105, 171, 242
- Heat equation, 108
- Heaviside function, 181
- Hille-Yosida theorem, 138, 191
- Holonomy, 240–245
- Holonomy matrix, 241
- Holonomy transformation, 241
- Holonomy group, 242
- Homotopic circuits, 234
- Homotopy, 62, 63, 64
- Improper integral, 43, 44, 45, 48
- Improper product integration, 37, 38, 39, 45, 48, 56, 57, 77, 124, 130, 175, 182
- Infinitesimal generator, 109, 138, 223, 245
- Initial point, 60
- Initial value problem, 8, 12, 16, 20, 83, 94, 146, 190, 201
- Integral equation
 for product integral, 1, 5, 8, 55, 84, 102, 103, 156, 159, 160, 161

- equivalence with initial value problem in L^1_s , 94
 - uniqueness of solution, 97, 104
 - with product integral solution, 168, 170, 185, 190
- Integration by parts for Lebesgue-Stieltjes integrals, 167
- Isometric operator, 111
- Jordan curve, 60
- $L^1(a,b)$, 54, 196
- $L^1(a,b;Y)$, 82
- $L^1(a,b;B(x))$, 83
- $L^1_s(a,b;B(x))$, 86
- L^1 -analyticity, 36
- L^1 -continuity, 35
- L^1 -differentiability, 35
- Laplace equation, 108
- Laplace operator, 108
- Laurent expansion, 67, 78
- Lebesgue integrability, 7, 54
- Lie algebras, 215, 220, 222, 224, 225
- Lie groups, 215, 220, 222, 224, 225
- Lie product formula, 135, 149
- Limit-circle case, 132
- Limit-point case, 133
- Linear combination, 14
- Linearization, 226–228
- Logarithmic derivative, 20, 105
- Markov processes, 228–232
- Mathematical physics, 108
- Matrices, 1, 193
 - $\mathbb{C}n \times n$, 194
 - norm on, 194
 - as linear transformations, 194
 - inverse, 195
 - nonsingular, 195
 - similarity, 195
 - conjugate, 195
 - transpose, 195
 - adjoint of, 195
 - skew-adjoint, 195
 - self-adjoint, 195
 - calculus of matrix functions, 195
 - canonical (Jordan) form, 196, 197
 - diagonal, 198
 - nilpotent, 198
 - upper triangular, 198
 - spectrum, 198, 199
 - det, 198
 - characteristic polynomial, 199
 - trace, 199
 - eigenvalue, 199
 - eigenvector, 199
 - exponential function, 200
 - when of form e^A , 200
 - derivative of $e^{c\omega}$, 202
- Matricial Hardy and Nevanlinna classes, 237–240
- Mean-value approximant, 88, 155
- Measure
 - product integration of, 151, 184, 185
 - operator valued, 152
 - Borel, 152, 153
 - matrix-valued, 152
 - complex, 153
 - total variation, 153, 175
 - pure point, 154
 - atom, 154
 - $\mu(x)$, 160
 - Lebesgue-Stieltjes, 166
 - local real-valued, 179
 - δ -function, 181
- Measurable, strongly, 82, 84
- Mesh, 2
- Monodromy, 232–235
- Monodromy group, 223
- Multiplicative contour integration, 224, 232, 242
- Multiplicative integral formula, 238
- Multiplicative property, 11, 102, 216–218, 223
- n th order ordinary differential equation, 15, 66
- Nonlinear operators, 53, 187, 188, 190, 195
- Nonsingularity of product integral, 5, 9, 38, 45, 46, 48, 49, 99, 102, 158, 163, 175
- Nonsingular operator, 80
- Norm, 4, 79, 80
