Editor's Statement	xix
Foreword by Felix E. Browder	xxi
Preface	xxiii
Chapter 0 Preliminaries	1
0.0 Some Inequalities	1
0.1 Sequences and Series of Continuous Functions, the Ascoli–Arzela Theorem, and the Weierstrass Approximation Theorem	2
0.2 The Lebesgue Dominated-Convergence Theorem, Leibniz's Rule, and Fubini's Theorem	6
0.3 Complex Analysis	9
Notes	12
References	12
Chapter 1 Introduction	13
1.1 Derivation of the Heat Equation	13
1.2 Equations Reducible to the Heat Equation	15
1.3 Elementary Solutions	16
1.4 Methods of Generating Solutions from Solutions	18
1.5 Basic Definitions	19
1.6 The Weak Maximum Principle and Some Applications	20
Exercises	22
Notes	23
References	24

Chapter 2	The Cauchy Problem	25
2.1	Introduction	25
2.2	The Holmgren Function Classes	27
2.3	An Existence Theorem	27
2.4	An Example	28
2.5	Continuous Dependence upon the Data	30
2.6	Variable Data-Bearing Curves: Existence: An Exercise	30
	Notes	31
	References	31
Chapter 3	The Initial-Value Problem	32
3.1	Introduction	32
3.2	The Fundamental Solution $K(x, t)$	33
3.3	Convergence of the Convolution $u(x, t) = \int_{-\infty}^{\infty} K(x - \xi, t) f(\xi) d\xi$	35
3.4	$\lim_{t \downarrow 0} u(x, t)$	36
3.5	An Existence Theorem	39
3.6	Uniqueness	40
3.7	Nonuniqueness	42
	Exercises	42
Chapter 4	The Initial-Boundary-Value Problem for the Quarter Plane with Temperature-Boundary Specification	45
4.1	Introduction	45
4.2	Properties of the Convolution $w(x, t) = -2 \int_0^t (\partial K / \partial x)(x, t - \tau) g(\tau) d\tau$	47
4.3	An Existence Theorem	50
4.4	Uniqueness and Nonuniqueness	51
	Exercises	52
Chapter 5	The Initial-Boundary-Value Problem for the Quarter Plane with Heat-Flux-Boundary Specification	54
5.1	Existence	54
5.2	Uniqueness	55
5.3	Nonuniqueness	56
	Exercises	57
Chapter 6	The Initial-Boundary-Value Problem for the Semi-Infinite Strip with Temperature-Boundary Specification and Heat-Flux-Boundary Specification	58
6.1	Introduction	58
6.2	Some Properties of $\theta(x, t) = \sum_{m=-\infty}^{\infty} K(x + 2m, t)$	59

6.3	An Existence and Uniqueness Theorem	62
6.4	Specification of Heat Flux on the Boundary	63
6.5	Reduction to a System of Integral Equations	64
	Notes on Chapters 3–6	66
	References for Chapters 3–6	66
Chapter 7	The Reduction of Some Initial-Boundary-Value Problems for the Semi-Infinite Strip, to Integral Equations: Some Exercises	67
7.1	The Boundary Condition $u(0, t)$ with $u_x(1, t)$	67
7.2	The Boundary Condition $u_x(0, t) + \alpha(t)u(0, t)$ with $u(1, t)$	68
7.3	The Boundary Condition $u_x(0, t) = F(t, u(0, t))$ with $u_x(1, t)$	72
7.4	The Boundary Condition $u_t(0, t) + \alpha(t)u_x(0, t) + \beta(t)u(0, t)$ with $u(1, t)$	76
7.5	The Boundary Condition $\int_0^{s(t)} u(x, t) dx$ with $u(1, t)$	80
	Notes	80
	References	81
Chapter 8	Integral Equations	82
8.1	Volterra Integral Equations of the First Kind and the Abel Integral Equation	82
8.2	Volterra Integral Equations of the Second Kind	86
8.3	Continuous Dependence of the Solutions of Integral Equations upon the Data	92
8.4	<i>A priori</i> Bounds on Solutions of Integral Equations	96
	Exercises	99
	Notes	99
	References	100
Chapter 9	Solutions of Boundary-Value Problems for All Times and Periodic Solutions	101
9.1	The Infinite Strip with Temperature-Boundary Conditions	101
9.2	The Infinite Strip with Flux-Boundary Conditions	104
9.3	The Infinite Strip with Temperature- and Flux-Boundary Conditions: Some Exercises	108
	Notes	110
	References	110

Chapter 10	Analyticity of Solutions	111
10.1	Introduction	111
10.2	The Analyticity of the Solution of the Initial-Value Problem in the Space Variable	112
10.3	The Analyticity of the Solution of the Initial-Value Problem in the Time Variable	114
10.4	The Analyticity of the Solution of the Initial-Boundary-Value Problem for the Quarter Plane in the Space Variable	116
10.5	The Analyticity of the Solution of the Initial-Boundary-Value Problem for the Semi-Infinite Strip in the Space Variable	118
10.6	Some Problems in Estimating the Modulus of Analytic Functions	120
	Exercises	127
	Notes	127
	References	127
Chapter 11	Continuous Dependence upon the Data for Some State-Estimation Problems	128
11.1	Introduction	128
11.2	An Interior Temperature Measurement in a Finite Conductor with One Unknown Boundary Condition	130
11.3	An Interior Temperature Measurement on a Characteristic in a Finite Conductor with No Initial Data	131
11.4	The Cauchy Problem: The Specification of Temperature and Heat Flux on a Boundary	137
11.5	Specification of an Interior Temperature and Flux along with Boundary Temperatures: An Exercise	143
11.6	The Specification of an Interior Temperature in a Finite Conductor along with the Temperature on the Boundaries: An Exercise	144
11.7	Interior Temperature Specification on a Characteristic for an Infinite Conductor with Unknown Initial Temperature	146
	Notes	150
	References	150
Chapter 12	Some Numerical Methods for Some State-Estimation Problems	152
12.1	Some Numerical Results for the Solution of the Heat Equation Backwards in Time	152

Contents	xv
12.2 A Numerical Method for the Cauchy Problem	170
12.3 A Least-Squares Method	180
12.4 An Exercise	186
Notes	186
References	186
Chapter 13 Determination of an Unknown Time-Dependent Diffusivity $a(t)$ from Overspecified Data	187
13.1 Introduction	187
13.2 Some Problems with Explicit Solutions	191
13.3 Some Problems That Reduce to the Solution of $F(\int_0^t a(y) dy) = h(t)$	194
13.4 A Nonlinear Integral Equation for $a(t)$	200
Exercises	211
Notes	211
References	211
Chapter 14 Initial- and/or Boundary-Value Problems for General Regions with Hölder Continuous Boundaries	213
14.1 Introduction—Function Spaces	213
14.2 The Single-Layer Potential $w_p(x, t, s)$ $= \int_0^t K(x - s(\tau), t - \tau)\varphi(\tau) d\tau$	215
14.3 The Initial-Boundary-Value Problem with Temperature-Boundary Specification	226
14.4 The Existence of u_x at the Boundary for the Solution of the Initial-Boundary-Value Problem with Temperature-Boundary Specification	231
Exercises	249
Notes	251
References	251
Chapter 15 Some Properties of Solutions in General Domains	252
15.1 Uniform Convergence of Solutions	252
15.2 Analyticity in the Spatial Variable	255
15.3 The Strong Maximum Principle	256
15.4 Behavior of u_x at a Boundary Point Where u Assumes Its Maximum or Minimum Value	259
Exercises	262
Notes	263
References	264

Chapter 16	The Solution in a General Region with Temperature-Boundary Specification: The Method of Perron–Poincaré	265
16.1	Introduction	265
16.2	Superparabolic and Subparabolic Functions	267
16.3	Existence of u Satisfying the Heat Equation in D_T	269
16.4	Boundary Behavior of u	271
	Exercises	279
	Notes	279
	References	280
Chapter 17	The One-Phase Stefan Problem with Temperature-Boundary Specification	281
17.1	Introduction	281
17.2	Monotone Dependence upon the Data and Uniqueness of the Solution	285
17.3	Existence	287
17.4	Some Special Solutions	296
17.5	Asymptotic Behavior of the Free Boundary at $t = +\infty$	299
17.6	Asymptotic Behavior of the Free Boundary at $t = 0$	303
17.7	Continuous Dependence upon the Data	304
17.8	Regularity of the Free Boundary	311
	Exercises	312
Chapter 18	The One-Phase Stefan Problem with Flux-Boundary Specification: Some Exercises	313
18.1	Introduction	313
18.2	Monotone Dependence upon the Data and Uniqueness of the Solution	315
18.3	Existence	316
18.4	Asymptotic Behavior of the Free Boundary at $t = +\infty$	318
18.5	Continuous Dependence of the Free Boundary upon the Data	322
	Notes on Chapters 17 and 18	326
	References for Chapters 17 and 18	326
Chapter 19	The Inhomogeneous Heat Equation $u_t = u_{xx} + f(x, t)$	327
19.1	Introduction	327
19.2	The Volume Potential $z(x, t) = \int_0^t \int_{-\infty}^{\infty} K(x - \xi, t - \tau) f(\xi, \tau) d\xi d\tau$	329
19.3	Solutions for Some Initial-Boundary-Value Problems for $u_t = u_{xx} + f(x, t)$	337

19.4	Initial-Boundary-Value Problems for General Domains . . .	340
	Exercises	341
	Notes	343
	References	343
Chapter 20	An Application of the Inhomogeneous Heat Equation: The Equation $u_t = u_{xx} + F(x, t, u, u_x)$	344
20.1	Introduction	344
20.2	The Initial-Value Problem	346
20.3	Some Initial-Boundary-Value Problems for Elementary Domains	349
	Exercises	353
	Notes	356
	References	356
	Some References to the Literature on $\mathcal{L}(u) \equiv u_{xx} - u_t$	357
1	Classical: 1800–1950	357
2	Semi-Classical: 1950–1973	368
2.1	Properties of Solutions	368
	A The Maximum Principle, <i>a priori</i> estimates, parabolic inequalities, and nonexistence of solutions	368
	B Uniqueness and representation theorems	370
	C Transforms, polynomials, and analyticity of solutions	372
	D Potentials and Green's functions	373
	E Behavior of solutions at the boundary and regularity of boundary points	375
	F Some roots of reaction diffusion theory	377
	G Periodic solutions	379
2.2	Initial-Boundary-Value Problems	381
2.3	Stefan and Free-Boundary-Value Problems	397
2.4	Not-Well-Posed and Inverse Problems	404
3	Recent: 1973–1981	408
3.1	Properties of Solutions	408
	A <i>A priori</i> estimates and maximum principles	408
	B Initial-value problem and uniqueness	408
	C Representations, transformations, special functions, and Runge approximations	409
	D Potentials, Green's functions, capacity, boundary behavior, and some applications	411
	E Asymptotic behavior of solutions	415
	F Periodic solutions	416

	G Applications to statistics	418
3.2	Initial-Boundary-Value Problems	419
3.3	Stefan and Free-Boundary-Value Problems	426
3.4	Control of Various Heat Problems	440
3.5	Not-Well-Posed and Inverse Problems	442
4	More Recent: 1981–1982	450
4.1	Properties of Solutions	450
	A <i>A priori</i> estimates, maximum principle, comparison results, means	450
	B Green's functions, potential theory, transforms, elementary solutions	451
	C Continuity and differentiability of solutions	452
	D Boundary behavior of solutions	453
	E Periodic solutions	454
	F Reaction–diffusion problems	454
	G Bifurcation, nonuniqueness, and chaos in reaction–diffusion problems	456
	H Stability of solutions	457
	I Asymptotic behavior	458
	J Applications to probability and statistics	461
4.2	Initial-Boundary-Value Problems	461
4.3	Stefan-Free Boundary	466
4.4	Control of Various Heat Problems	472
4.5	Not-Well-Posed and Inverse Problems	473
	Symbol Index	478
	Subject Index	481
