<i>Preface</i>	xvii
1 Height, nutritional status and the historical record	1
1.0 Introduction	1
1.1 The pattern of human growth	9
1.2 Height, nutritional status, the environment and the standard of living	16
1.3 The European background	20
1.3.1 Sources of evidence	21
1.3.2 The range of European heights	22
1.4 The scope of this book	27
2 Inference from military height data	30
2.0 The problem	30
2.1 Recruitment in Britain, 1700-1916	31
2.1.1 The history and historiography of military recruiting	32
2.1.2 The rationale of recruitment: was there a 'recruiting problem'?	38
2.2 Conclusion	82
3 Inference from samples of military records	84
3.0 Introduction	84
3.1 Inference from the samples to military units	84
3.2 Who were the recruits?	86
3.2.1 Geographical composition	86
3.2.2 Socio-occupational composition	98
3.2.3 Other indicators	110

viii	<i>Contents</i>	
	3.3 Changes in the pool of recruits: inference from military samples to the British working class	111
	3.4 Estimation of average heights from the military samples	118
	Appendix 3.1 The collection and processing of data	128
4	Long-term trends in nutritional status	134
4.0	Introduction	134
4.1	Adult heights	135
4.1.1	Military samples from 1740 to 1914	136
4.1.2	Surveys of height in the nineteenth century	154
4.1.3	Sample surveys and the evidence of military recruits in the twentieth century	156
4.2	The heights of children and adolescents	163
4.2.1	The heights of adolescents in the eighteenth and nineteenth centuries	163
4.2.2	Children and adolescents in the twentieth century	175
4.3	Trends in British heights	182
4.3.1	Statistical issues	189
4.3.2	Comparisons with other data	191
4.4	Conclusion	195
5	Regional and occupational differentials in British heights	196
5.0	Introduction	196
5.1	Regional differentials in heights	200
5.2	The calculation of height differentials	206
5.2.1	Point estimates of differentials	208
5.2.2	Smoothing the differentials over time	209
5.2.3	Regression estimates of trends over time	211
5.2.4	Standard errors estimated by maximum likelihood methods	214
5.2.5	Regional differentials in heights: a summary of results	216
5.3	Occupational differentials in heights	217
6	Height, nutritional status and the environment	225
6.0	Introduction	225
6.1	Patterns of growth in childhood	225
6.2	Nutrition and growth	232
6.3	Interactions between infection, nutrition and growth	245
6.4	The application of the results of studies of the developing world to growth in industrialising Britain	253

Cambridge University Press
0521303141 - Height, Health and History: Nutritional Status in the United Kingdom,
1750-1980
Roderick Floud, Kenneth Wachter and Annabel Gregory
Table of Contents
[More information](#)

<i>Contents</i>	<i>ix</i>
6.5 Height and nutritional status after the cessation of growth	264
6.5.1 Height, disease and death	266
6.5.2 Height, nutritional status and work	272
6.6 Conclusion	274
7 Nutritional status and physical growth in Britain, 1750-1980	275
7.0 Introduction	275
7.1 Poverty in the eighteenth and nineteenth centuries and the 'standard of living debate'	277
7.1.1 The measurement of living standards	281
7.2 Nutritional status, health and income, 1750-1850	287
7.2.1 Nutritional status, real income and real wages	287
7.2.2 Mortality	291
7.2.3 The disease environment	295
7.2.4 Morbidity	297
7.2.5 Urbanisation and housing conditions	298
7.2.6 Diet and consumption	301
7.2.7 Income distribution	302
7.2.8 Productivity change	303
7.2.9 A synthesis, 1750-1850	304
7.3 Nutritional status, health and income, 1850-1914	306
7.3.1 Nutritional status	306
7.3.2 Real income and real wages	307
7.3.3 Mortality and morbidity	309
7.3.4 Diet and housing	317
7.3.5 A synthesis, 1850-1914	319
7.4 Nutritional status, health and income, 1914-1980	320
8 Conclusions	325
<i>Bibliography</i>	328
<i>Index</i>	345
