This book is published as part of the joint publishing agreement established in 1977 between the Fondation de la Maison des Sciences de l'Homme and the Press Syndicate of the University of Cambridge. Titles published under this arrangement may appear in any European language or, in the case of volumes of collected essays, in several languages.

New books will appear either as individual titles or in one of the series which the Maison des Sciences de l'Homme and the Cambridge University Press have jointly agreed to publish. All books published jointly by the Maison des Sciences de l'Homme and the Cambridge University Press will be distributed by the Press throughout the world.

Cet ouvrage est publié dans le cadre de l'accord de co-édition passé en 1977 entre la Fondation de la Maison des Sciences de l'Homme et le Press Syndicate de l'Université de Cambridge. Toutes les langues européennes sont admises pour les titres couverts par cet accord, et les ouvrages collectifs peuvent paraître en plusieurs langues.

Les ouvrages paraissent soit isolément, soit dans l'une des séries que la Maison des Sciences de l'Homme et Cambridge University Press ont convenu de publier ensemble. La distribution dans le monde entier des titres ainsi publiés conjointement par les deux établissements est assurée par Cambridge University Press.

 CONTENTS

List of contributors vii *Acknowledgments* ix

Introduction *Marjorie Grene* *page* 1

PART I. THE DEVELOPING SYNTHESIS

1. Fisher's entrance into evolutionary science: the role of eugenics *Bernard Norton* 19
2. The abandonment of Lamarckian explanations: the case of climatic parallelism of animal characteristics *Bernhard Rensch* 31
3. The development of Wright's theory of evolution: systematics, adaptation, and drift *William B. Provine* 43
4. The hardening of the modern synthesis *Stephen Jay Gould* 71

PART II. MIMETIC THEORY: ITS RELATION TO THE HISTORY OF EVOLUTIONARY BIOLOGY

5. Mimicry: views of naturalists and ecologists before the modern synthesis *William C. Kimler* 97
6. "The hypothesis that explains mimetic resemblance explains evolution": the gradualist–saltationist schism *John R. G. Turner* 129

PART III. THE GERMAN PALEONTOLOGICAL AND MORPHOLOGICAL TRADITION

7. Evolutionary theory in German paleontology *Wolf-Ernst Reif* 173
8. The role of morphology in the theory of evolution *Rupert Riedl* 205

ACKNOWLEDGMENTS

Our thanks are due to the Werner-Reimers Stiftung for their support and to the Maison des Sciences de l'Homme for including the present volume in their series. We regretted Professor Rensch's absence from our discussion, and regret also the pressure of work that prevented Dr. von Wahlert from preparing a paper about the ecological approach to evolution that he finds in the work of Klaus Günther and in the early work of Willi Hennig. Something of his intent may be gleaned from the lectures of Hennig, Günther, and von Wahlert himself in R. Siewing, ed., *Methoden der Phylogenetik (Erlanger Forsch. B, 1971)*.

For my own part, I should also like to express my gratitude to a number of people for advice about the organization of the meeting: in particular, Stephen Jay Gould, Jonathan Hodge, William Provine, Adolf Seilacher, Roswitha and Wolfgang Wilkschko, and the late William Keeton. The editorial staff of Cambridge University Press have been consistently helpful in seeing the manuscript through the press.

M.G.
