<i>List of figures, tables, and boxes</i>	<i>page</i> xvii
<i>Series foreword</i>	xxi
<i>Preface</i>	xxiii
<i>Acknowledgments</i>	xxv
<b>1. Introduction</b>	1
Focus	1
Some problems	1
Empirical grounding	3
Grounding in evolutionary approach	4
Introduction of major themes	4
Capsule statement of approach and model	6
Working definition	6
Outline of model	7
Organization of the volume	8
Summary	13
<b>PART I. ORIGINS OF HUMAN TERRITORIAL FUNCTIONING</b>	15
<b>2. Territorial functioning and related processes in different species</b>	17
Some key points in evolutionary theory	17
Role of selection pressures	19
	vii

[More information](#)

viii	<i>Contents</i>	
	Varying uses of evolutionary theory	20
	Territorial functioning and related processes in other species	21
	Territories, core areas, and home ranges	21
	Ways of defending territories	22
	Some different forms of territorial functioning	23
	<i>Ants • Birds • Primates</i>	
	Conclusions	33
<b>3.</b>	<b>The origins of human territorial functioning</b>	<b>34</b>
	The importance of territorial functioning in protohominid emergence	34
	Sequestration allowed more parenting, less travelling	35
	Male would forage afar if paternity assured	36
	Male provisioning, home-based model	36
	Avoiding predation: group needed to maintain territory	37
	Group needed to support dietary habits	37
	Social carnivores use territorial arrangements	39
	Socioterritorial arrangements would have been adaptive for protohominids and early hominids	41
	Summary	41
<b>4.</b>	<b>Theoretical perspectives on interpreting territorial functioning: exactly how did it evolve?</b>	<b>43</b>
	Organization of the chapter	43
	The instinct perspective	44
	Ardrey's view: the territorial imperative	44
	Problems with the structure of the argument	47
	Problems with the treatment of territorial functioning	48
	Group selection and ecology-conserving behavior	49
	The mechanisms	50
	Group selection	51
	Summing-up on group selection	55
	Incorporating group selection into the early hominid territorial model	55
	How was territorial functioning shaped and transmitted?	57
	Genetic transmission	57
	Gene–culture evolution	59
	A model of cultural evolution	62
	<i>A hypothetical working example • The elements shaping cultural development • Major points • Back to the working example • The advantages of the Boyd and Richerson model</i>	
	The evolution of human territorial functioning	70
	<i>Macrolevel • Microlevel</i>

<i>Contents</i>	ix
A final question	74
Summary	74
<b>PART II. A CONCEPTUAL MODEL OF HUMAN TERRITORIAL FUNCTIONING</b>	77
<b>5. A perspective on human territorial functioning</b>	79
Introduction	79
Organization of the chapter	80
Defining territorial functioning	80
Themes in definitions others have offered	84
Major themes	84
Four organizing dimensions	86
A conceptual model of territorial functioning	89
Overview	91
Individual elements	92
<i>Predictors • Territorial cognitions • Territorial behaviors</i> • <i>Consequences</i>	
Territorial functioning and related concepts	97
Personal space	97
Jurisdiction	99
Home range	101
Attachment to place	102
Privacy	104
<i>Privacy as an interrelated set of boundary-regulation</i> <i>processes • Privacy and territorial experiences as distinct</i> • <i>Proposing a linkage</i>	
Summary	110
Appendix: An extended example illustrating the concep- tual model	111
<b>6. Clarifying psychological and ecological consequences</b>	117
Organization of the chapter	117
Purpose of additional perspectives	118
Perspective relevance and centrality	118
A contextual-stress perspective	119
Some terminology: what are stress and coping?	119
A congruence model of stress	121
Links with territorial functioning	125
Behavior setting theory	127
Background	127
Streetblocks as behavior settings	129
Ecological consequences of territorial functioning	130
Summary	131

<b>PART III. TERRITORIAL FUNCTIONING IN SETTINGS OF VARYING CENTRALITY</b>	<b>133</b>
<b>7. Interior residential settings</b>	<b>136</b>
Organization of the chapter	137
Determinants of territorial functioning	137
Cultural and subcultural factors	137
Physical factors	141
Personality factors	143
Social factors	145
<i>Horizontal social factors • Vertical factors: territorial dynamics and dominance • Summing-up on social factors and territorial functioning in interior residential settings</i>	
Closing comments on predictors of territorial functioning	155
Consequences of territorial functioning	156
Psychological consequences: enhanced facilitation, reduced thwarting	156
Identity display and consequences	158
Social psychological consequences	159
Insiders meet outsiders	160
Closing comments	163
<b>8. Territorial functioning in outdoor residential spaces close to the home</b>	<b>166</b>
Organization of the chapter	167
Background	167
The recent nature of the residential environment as we know it	167
Some “old” evidence on the streetblock as a socio-spatial arena	168
The social psychological underpinnings of the emergence of small groups on the streetblock	171
<i>Proximity and passive contacts • Mere exposure • Norm emergence • Common fate • Outdoor residential space is highly differentiated</i>	
Elements of territorial functioning in outdoor residential locations	175
Markers	177
Behaviors	179
Cognitions	180
Predictors of territorial functioning	181
Cultural and subcultural factors	181
Personality and related constructs	182

Table of Contents

[More information](#)

<i>Contents</i>	xi
<i>Vigilance • Homeownership • Social class • Urban versus suburban</i>	
Physical design factors	185
<i>Siting and land use • Volume of pedestrian and vehicular traffic • Boundaries • Summary</i>	
Social factors	188
Consequences of territorial functioning	189
Psychological consequences	190
<i>Stress reduction • Individuation</i>	
Social psychological consequences	192
<i>Group-level expression • Clarification of group norms • Cleaning as a group-enhancing ritual</i>	
Ecological consequences	195
<i>Vetoing mechanisms • Deviation countering • Markers as social learning-based cues • Support for the setting program</i>	
Summary	196
<b>9. Regular use settings</b>	198
Centrality and regular use settings	199
Elements of territorial functioning in regular use settings	200
Predictors of territorial functioning	200
Personality factors	200
<i>Faculty offices • Business settings and personalization</i>	
Social determinants	203
<i>Relative position and status in work spaces • Audience effects</i>	
Physical factors	207
<i>Extent of workspace enclosure • Open offices • “Open” classrooms</i>	
“Cultural” and “subcultural” factors	210
<i>Work settings • Special “subcultural” groups “taking over” settings</i>	
Consequences of territorial functioning	212
Psychological consequences	212
<i>Task relevance • Satisfaction</i>	
Social psychological consequences	215
<i>Displaying of relative status • Individuation</i>	
Ecological consequences	216
Similarities and dissimilarities with territorial functioning at other points on the centrality continuum	217
Similarities	217
Differences	218

xii	<i>Contents</i>	
	Remaining questions	219
	Summary	220
<b>10.</b>	<b>Minimal territorial functioning</b>	221
	Organization of the chapter	221
	Settings where person–place bonds are of low centrality	221
	Minimal territorial functioning	224
	Must a site be “assigned” for territorial functioning to operate?	224
	How temporary is temporary?	224
	Overlap with other sociospatial processes	225
	What it involves	227
	<i>Behaviors • Cognitions • Markers</i>	
	Predictors of territorial functioning	229
	Physical predictors	229
	<i>Enclosed and private study settings more defended in library • Barrooms: more demand for more central, sociable sites • Classrooms: more central sites more defended • Conceptualizing the link between physical characteristics and territorial functioning in open-access settings</i>	
	Social predictors	234
	<i>Gender • Group size</i>	
	Enlisting others: good neighbors	238
	Cultural variation	239
	Personality	239
	Time	240
	Consequences of territorial functioning	240
	Psychological outcomes	240
	<i>Use setting more effectively • Distancing</i>	
	Ecological outcomes	241
	<i>Preserving setting from overuse • Differentiation within the setting</i>	
	Social psychological outcomes	242
	Minimal territorial functioning: similarities to and differences from functioning on other points of the centrality continuum	243
	Differences	243
	Similarities	244
	Summary	244
	<b>PART IV. APPLICATIONS TO SOCIAL PROBLEMS</b>	247
<b>11.</b>	<b>Disorder</b>	249
	Organization of the chapter	249

Table of Contents

[More information](#)

<i>Contents</i>	xiii
The nature of the problems	249
Crime	249
Fear of crime	252
Vandalism	255
Linking territorial functioning and disorder	257
Extending the general model	257
Conceptualizing the links between territorial functioning and disorder	259
<i>Crime • Fear of crime • Vandalism</i>	
Determinants of territorial functioning: their links to territorial functioning and disorder	264
Physical determinants	265
Social determinants	269
Intrapersonal factors	269
<i>Elderly and fear • Perceptions of equity and vandalism</i>	
Context	270
<i>Territorial functioning viewed as having less deterrent impact in a high-threat setting • Stability of context • Subcultural factors</i>	
Practical implications	271
Research needs	273
Summary	274
<b>12. Resource conservation</b>	275
Focus of the chapter	275
Organization of the chapter	276
Resources in the real world	276
Oysters in the Chesapeake: a change from segmented to open waters	276
Lobstering in Maine: island groups versus harbor gangs	278
<i>Two types of groups, two lobstering arrangements • Economic consequences • Summing-up on lobstering • Implications</i>	
From the real world to the lab	284
The psychological nature of the problems investigated: social traps, the commons dilemma, social dilemmas	284
<i>Social dilemmas • The social trap perspective • The commons dilemma • Summary</i>	
The commons dilemma in the lab	289
<i>A simple approach to capturing the commons: the nuts game • A potential solution: a territorializing strategy • Rigorous tests of the territorializing strategy • Understanding why a territorializing strategy works from a microeconomic perspective • From individuals to small</i>

xiv	<i>Contents</i>	
	<i>groups: factors that might make territorialization a more effective conservation strategy • Group processes, super-ordinate goals, and conservation</i>	
	From the lab back to the real world	299
	Do we need to worry?	299
	<i>There IS a problem • NO problem! • No problem?</i>	
	The problems in moving from the lab to the field	302
	<i>Would territorialization strategies work? • What kinds of resources? • Issues of policy</i>	
	Research needs	305
	In the lab	305
	In the field	305
	Summary	306
	<b>PART V. REVIEW AND PROSPECTS</b>	<b>309</b>
	<b>13. Summary of the general line of argument and its implications</b>	<b>311</b>
	Organization of the chapter	311
	What does it mean to work within an evolutionary framework?	311
	Major points emerging from evolutionary analysis	312
	Implications of evolutionary analysis	314
	A comment on restriction of range	315
	Expansion on some specific points within the argument	316
	Territorial functioning–physical environment links are contingent upon setting conditions	316
	Social structure–territorial functioning links depend upon setting conditions	317
	Territorial functioning has multilevel outcomes	318
	<i>Intraindividual outcomes • Social psychological outcomes: between individuals or groups • Ecological consequences</i>	
	Summary	320
	<b>14. Future directions for research and application</b>	<b>322</b>
	Time: a theoretical loose end	322
	Short-term association	323
	<i>Social changes • Physical changes • Impacts of time itself</i>	
	Long-term association	326
	<i>A model of time passage and territorial functioning</i>	
	Summary	329
	Three specific areas of research application	329
	Reducing spatial conflicts and within-household stress	331
	<i>The problem • A rough modeling • Intervention</i>
