INDEX

(For those authors' works not included in this index, see page references in List of Books and Memoirs Cited, pp. 127 et seq.)

'Abstract' and 'representation', art, 56, 116
Achilles and the tortoise, 77
Actualization of potentialities (E.S. Russell), 101 n. 2
Adam and Raphael (Paradise Lost), 24, 29 n. 3
Adaptation and natural selection, 24
Aims and scope of biological study, 3
Albertus Magnus, 98
Analysis, 32–44; ἀναλογία, 96
Analysis, 95, 96, 104, 105, 125, et passim
Anatomy, 34; and see 'Comparative anatomy'
Anaximander, 13
Anthropos sylvestris Hofm., 117
Anittheses, biological, 92–114; body and mind, 92–9; deduction and induction, 26, 94; extension and thought, 98, 99, 115; form and function, 93, 94; intellect and senses, 115; matter and form, 92, 93; mechanism and teleology, 73, 92, 95; mechanism and vitality, 100, 101; mind and eye, 115–26, et passim; multiplicity and change, and unity and changelessness, 99; the One and the Many, 103, 104, 115; organism and environment, 103; as pairs of partial truths, 109; preformation and epigenesis, 92, 101, 102; subject and object, 94, 120; vegetative phase in plants and reproductive phase, 102
Antithesis, see Thesis
Aquatic plants, vegetative reproduction, 102
Aquinas, St Thomas, on contemplation and communication, 64; on hypotheses and proof, 24; on sensory and conceptual thinking, 125; on subject-object antithesis, 120
Arab commentators on Aristotle, 10
Archimedes, ποῦ στῶ, 77
Architects, comparison of their work with that of biologists, 50
Aristotle, circular motion, 39; combining views of Democritus and Plato, 125; contemporaries at the Academy, 47; difference between actual origin and its representation, 46, 47; disregard of inconsistency, 112; epigenesis, 101; immanent 'forms', 101; 'immattered form', 125; indemonstrable premisses, 77; induction (ἐνικογέντα), 25; microcosm and macrocosm, 39; nature of perception, 107; reconciling opposing theories, 114
Art, 'abstract' and 'representation', 56, 116; agreed conventions, 76
Artists, comparison of their approach to that of biologists, 11, 14, 19, 29, 37, 56, 71, 76, 91, 113, 116, 118–21
Assumptions, basic, 76–91; comparison with tools, 79, 80; as hypotheses, 86–8; metaphysical or methodological, 78, 79; reduction to a minimum, 80, 81, 88
Attribute, 84, 97–9
Aureolus, P. sine simplicitate postulate, 88 n. 4
Bacon, F. (Lord Verulam), on analogy, 32, 33; dictating to T. Hobbes, 50; on induction and hypotheses, 27
Baambo, death of vegetative parts after seedling, 102
Bayle, P., anticipation of Berkeley, 120 n. 1
Beatrice (Dante) on the cosmic order, 83
Berkeley, G., on analogy, 33; anticipated by Bayle, 120 n. 1; on Locke's 'primary' and 'secondary' qualities of bodies, 120; Three Dialogues, 112
Beveridge, W. I. E., on biology as pure Natural Science, 126 n. 2; quoting Gauss on intuition, 47 n. 2
INDEX

Biochemists on form and function, 93, 94
Biology, aims and scope, 3; intermediate between physical science and the humanities, 54, 125; part of natural philosophy, 71, 76, 125, 126; terminology, 54, 55; and the visual arts, 45, 121; visual aspect, 5; et passim
Bipolar and multipolar thought, 96, 97
Bipolar unity, 97
Blake, W., on expression of ideas, 49; on seeing with the mind, 116; on truth, 73, 74
Book of Nature (Konrad von Megenberg), 38, 39
Book-size, factors determining it, 58
Bosanquet, B., explanation, 59; form and function, 93; ‘implication in argument, 46; logic, 29, 93; reason in form of feeling, 123
Boyle, the Hon. R., dialogue technique in The Sceptical Chemist, 111, 112; on hypotheses, 28
Bradley, F. H., on relationship implying unity, 96 n. 1
Browne, Sir T., on microcosm and macrocosm, 39, 40
Bruno, G., ‘coincidence of contraries’, 110; On the Infinite Universe and Worlds, 111; the unimportance of the senses, 118; Unity which is not bare Oneness, 106; use of dialogue technique, 111
Buddhism, Zen, stages in initiation, 55
Butler, J., on analogy, 36; on probability and the ‘likely’, 33
Butler, S., on memory and heredity, 43
Bützchli, O., 58
Candolle, A. Casimir P. dc, see de Candolle, A. Casimír P.
Candolle, A. P. dc, see de Candolle, A. P.
Causal hypothesis as an instrument of method, 69
Causal relation, Hume and Kant, 87
Causality, as an hypothesis, 88; relation to the principle of the Uniformity of Nature, 82, 83, 87, 88
Cause, difficulty of deducing from an effect, 23, 24
Causes, material-efficient and formal-final, and their relation to spatial and temporal succession, 100
Chaos and Cosmos, 81, 82, 87, 92
Chinese art and thought, 11, 37, 118, 120, 121; see also Chu Hsi, and Mencius
Chu Hsi on the intuitive flash, 20
Citation of authorities in biology and philosophy, 52, 53
Claudius Ptolemy, see Ptolemy
Clifford, W. K., on Uniformity of Nature, 83, 84
‘Coherence’ theory of truth, 29, 70 et seq.
‘Coincidence of contraries’, 96, 97, 110
Coleridge, S. T., on ‘despotism of the eye’, 119; failure to find an adequate theme, 11; on Hercules and Omphale, 10; on identity and opposition of thesis and antithesis, 96, 97; on the kaleidoscope and symmetry, 117, 118; marginal notes, 57; on Natural Science and Natural Philosophy, 125, 126; on organized wholeness in writing, 49
‘Comparative anatomy’, early use of term by T. Willis, N. Crew, and Vicq d’Azyr, 34
Comparisons, irreversible and reversible, 35, 36
‘Compound’ and ‘simple’ flowers, analogy between, 43
Conatus (Spinoza), 101
‘Consilience’ (Hobhouse), 70 n. 6
Contemplative phase in biological work, 4, 5, 63, 64; Chap. vi-x passim
‘Copy’ theory of truth, 66, 67
Correspondence in writing between scientists as equivalent to circulation of offprints, 112
‘Correspondence’ theory of truth, 66, 67, 71, 116
Cosmos and Chaos, 81, 82, 87, 92
‘Creative’ intellectual work, 17 et seq.
Croc, B., on Hegel’s dialectic, 97
Cuvier, G. L. C. F. D., polemic with É. Geoffroy Saint-Hilaire, 104
Dante Alighieri, on the artist becoming what he paints, 120; on basic assumptions, 77; Beatrice on the cosmic order, 83; personification of his odes, 49; on the simplicity postulate, 88
Darwin, C., theory of Natural Selection, 24, 42, 43; use of inaccurate instruments, 66
de Candolle, A. Casimir P., on leaf as a partial shoot, 81, 108, 109
de Candolle, A. P., on comparative aspect of morphology, 34; on ‘function’ and ‘organ’, 93
INDEX

Deduction, and induction, 25, 26, 94; and the syllogism, 26; as the unfolding of implications in premises, 77
Demurige (Plato, Timaeus), 37, 38
Democritus, and sensation, 125; the view that the Whole is achieved through the Parts, 106
de Monet, J. B. P. A., see Lamarck, Chevalier de
de Morgan, A., ‘Universes’ of ideas, 108
Descartes, R., dualism, 90, 91, 98, 99; on the mind as unity, 99; on research, 6, 7; thought and extension, 98, 115; union of conceptual and pictorial thought in perception, 123; use of dialogue technique, 111; on writing, 45
Descriptive work, 8, 9, 34
De Vertebrate (Lord Herbert of Cherbury), 72, 74, 85, 86
Dialectic, 109 et seq.; M. J. Adler, on its inconclusiveness, 113 n. 1; Hegelian, 47, 48, 107, 109–11
Dialogue form in philosophy and science, 111, 112; its impress on Greek philosophic prose, 112
Diderot, D., on senses and reflective thinking, 124
Digby, Sir K., on associative meaning, 54; on the difference between speech and writing, 53
Ding-an-sich (Nommenen), 72
Discovery, 17–21, 25; emotional element, 20, 21
Discursive thought, 46, 74, 75, 111, 122; defined, 29 n. 3; fusion with emotion, 20, 21
Donne, J., on unity due to brain and nervous system, 124
Dormer, K. J., on geometric necessity in arrangement of parts in flowerbud, 108
Dramatic form of discussion, 111
Dualism, 96; Descartes’s, 90, 91, 98, 99; and monism, 97
Duns Scotus, 88
Eckhart, J., on motive of work, 16; on seeing with the mind, 116
‘Economy’ in thinking, principle of, 88
Eighteenth century as ‘Age of Conversation’, 112
Einstein, A., on rationality of the world of existence, 84, 85
Elliot, G., on systole and diastole in research, 97
Emotion as a factor in research and discovery, 9–10, 20, 21
Environment and organism, 103
ἔφαγον (Aristotle), 25
Epicurus, ‘hooked atoms’, 19, 20
Epigenesis and preformation, 92, 101, 102; compared with two modes of logical inference, 101, 102
Eternity, aspects of, 99, 100
Explanation, in biology, 36, 58, 59; in philosophy, 59 n. 3; in relation to the Uniformity of Nature, 87
Exposition, different in mode from discovery, 46–8
Extension, term broadened to include time, 100; and thought, as primary antithesis, 115; as an attribute of the Whole, 84, 98, 99
Factual knowledge, additions to, 12 et seq., 17; for solving a problem, 3, 4
‘Fine structure’, 9
‘Frugality’ in thinking, principle of, 88
Galton, F., use of analogy in the study of heredity, 40, 41
Gauss, K. F., on reaching results by intuition, 47
Geoffroy Saint-Hilaire, É., polemic with Cuvier, 104
‘Germinal’ words, 121
Gesalt concept of the flower, 122
Gibbon, E., choice of a theme, 11
Goethe, J. W. von, Anschauung, 122; on comparative aspect of morphology, 34; on polarity, 97; urge towards Oneness, 106
Greek biology, stress on comparison between animals and plants, 41, 42
Greek philosophic prose showing impress of dialogue form, 112
Grew, N., on plant-animal analogy, 42; use of term ‘comparative anatomy’, 34
Haller, A. von, on linear sequence in thought, 46
Hamilton, Sir W., ‘law of parsimony’, 88
Harvey, W., Aristotelian influence on the discovery of the circulation of the blood, 39, and on the theory of embryonic development, 101

141
INDEX

Hegel, G. W. F., the Absolute, 48, 107, 110; conception of reason, 123; dialectic, 47, 48, 107, 109-11; on Richtigkeit and Wahrheit, 70, 71
Heraclitus (Heraakteos), on Nature, 12; on Unity based on conflict, 106
Herbert, E. (Lord Herbert of Cherbury) (De Veritate), denial of antithesis of Man and Nature, 85, 86; on truth, 72, 74
Hercules and Omphale, Coleridge on, 10
Herschel, J. F. W., on simplicity as an index of truth, 89
Hildegard of Bingen, on microcosm and macrocosm, 38, 39
Hippocratican theory of preformation, 161
Hobbes, T. (Leviathan), on error and meaninglessness, 72; method of writing, 50, 51; on truth in language, 67
Hume, D., on causality, 87; Dialogues concerning Natural Religion, 91, 112; on the universe and man's mind, 91
Hypotheses, 17-22, 27-31; basic assumptions as hypotheses, 86-8; biological, and artistic interpretations, 29; Boyle on, 28; discarded, 30; modes of assessment, 29; Newton on, 29; Poincaré on their mode of origin, 18-20; unprovable, 31, 86
Illative Sense (Newman), 74
Illustration in black and white, impoverishment from original, 56, 119; symbolic, 117
Imagery, pictorial, 122, 123
Images, nature of mental, 116
Imaginative reason (W. Pater), 123
'Immattered form' (Aristotle), 125
Induction, 25, 26, 27, 32, 83, 84, 94, 124; and probability, 26, 28
Infinite Universe and Worlds, On the (G. Bruno) 111
Intelligibility of the universe, 81 et seq.

Japanese artists, difference from Western standpoint, 68, 120
Jeffreys, Sir H., on simplicity postulate, 89
Jevons, W. S., on analogy, 33
Joan, H. H. on ‘correspondence’ and ‘coherence’ theories of truth, 70
John of Salisbury on logic, 31
Johnson, S., failure to find an adequate theme, 11; on the recording of observations on the spot, 51
Kant, I., anticipating Hegel’s dialectic, 109; on attributing regularity to Nature, 85; awakening from ‘dogmatic slumber’, 78; on causality, 87; conception of truth, 66; criticism of Plato, 118, 119; on criticizing basic principles, 76; on logic, 22; on Phænomenon and Noomenon, 72; on the pleasure of research giving it the appearance of duty, 10; on senses and understanding, 124; schemata, 123
Kepler, J., on microcosm and macrocosm, 39
Lamarck, Chevalier de (J. B. P. A. de Monet), views on evolution, 42
Language in biology, dangers of oversimplification, 56, 57; phases in, 54, 55; poor writing and ease of translation, 55, 56; special terminology, 54, 55; stress on brevity, 57, 58
Lavoisier, A. L., as a thinker rather than an experimenter, 14, 15
"Law of parsimony", 88
Laws and theories, 29, 30
Laws of thought (Identity, Contradiction, Excluded Middle, Sufficient Reason, Ground and Consequent), 82; criticism of Laws of Contradiction and Excluded Middle, 110
Leaf, comparison of foliage-leaf and carpel, 35, 36; length of stalk correlated with abbreviated axis, 95; partial-shoot theory, 81, 108, 109; peltate leaves with radial anatomy of stalk, 25-8; restriction of meaning of 'leaf' in botanical terminology, 54; spatial relation of rudiments at shoot-apex, 95
Least action, principle of, 88 n. 3
Leibniz, G. W., intellectual development, 15; on microcosm and macrocosm, 39; on mind and body, 100; on Unity of Universe, 83
Leviathan (T. Hobbes), 50, 51
Linear sequence in reasoning, speech, and writing, 22, 23, 45, 46, 111
Locke, J., on 'primary' and 'secondary' qualities of bodies, 119, 120; on the work of the "Under-Labourer", 10
INDEX

Logic and the biologist, 22–31; definitions, 22, 23
Mackenzie, J. S., on logic, 22
Macrocosm and microcosm, 96–40, 90
Makrathropos, 37
Malpighi, M., on plant-animal analogy, 42
Many and the One, the, 86, 103–7, 115
Mechanism, and teleology, 73, 95, 96; and vitalism, 100–2
Mechanistic theory of the organic world, 43
Megenberg, Konrad von (Book of Nature), 98, 39
Mencius on subjective truth, 67, 68
Mendel, J. G., in relation to F. Galton, 40
Metaphysics, scope of, 125, 126
Meyer, A., on microcosm and macrocosm, 96, 37
Microcosm and macrocosm, 96–40, 90
Microtome technique, 13, 67
Mill, J. S., Method of Agreement and Method of Difference, 27; mode of opposing wrong opinions, 114; reduction of assumptions to a minimum, 80; Uniformity of Nature and induction, 83, 84
Milton, J., choice of a theme, 11; on discursive thought and intuition, 29 n. 3; on "saving appearances", 24
Mind, disciplined by the eye, 119; use of the term to include sensuous elements, 85, 98, 123, et passim
Mind-body individual as unity in multiplicity, 99
Monet, J. B. P. A. de, see Lamarck, Chevalier de
Monism, as basis of Spinoza's philosophy, 84; and dualism, 96, 97; and science (W. P. D. Wightman) 104 n. 4
Mono- or polyphylea, 79
Morphology linking mechanistic science and the arts, 123
Natural philosophy, 71, 76, 125, 126
Natural science, scope of, 125
Natural Selection, and adaptation, 24; theory of, originating in an imperfect analogy, 42, 43
Negation, way of, 11
Nervous system (including brain) organizing multifariousness into unity, 103, 123, 124
Newman, J. H., on the Illative Sense, 74
Newton, Sir I., decision against simplifying results, 56, 57; geometrical method, 47; on 'hooked atoms', 20; on induction, 25, 26; not "feigning Hypotheses", 29; on simplicity postulate, 89; Sir D'Arcy Thompson on Newton and the apple, 34; on Uniformity of Nature, 83
Nicolai of Cusa, 110
Norris, J., of Bemerton, 113, 114
Phenomenon and Phenomenon, resolution of antithesis, 72
Object and Subject, history of change of meaning of these terms, 94 n. 2
Occam (Oakham), William of, 88
"Occam's razor", 88
Omphale and Hercules, Coleridge on, 10
One and the Many, the, 86, 103–7, 115
"One in the Manifold", the, 107
"Ore-like" words, 121
Organism and environment, 103
Organismal theories, synthesizing mechanism and vitalism, 100, 101
Output of a biologist as an integrated whole, 15, 16
Owen, R., motto on signet ring, 107
Paleaeontology, imperfect evidence, 12, 13
Parmenides (Plato), analysis of the concept of the One, 103
" Parsimony, Law of", 88
Partial-shoot theory of the leaf, 81, 108, 109
Fatter, W., on imaginative reason, 123
Peltate leaves, radial anatomy of petioles, 25, 26, 27, 28
Perception, and preparedness, 117; as union of conceptual and pictorial thinking, 123
"Perceptual judgment", 123
Phenomenon and Phenomenon, resolution of antithesis, 72
Philosophy, natural, 71, 76, 125, 126
"Picture thinking", 41, 122, 123
Plato, on chaos and cosmos, 81, 82; conceptual thinking, 125; on discourse as an organism, 49; on first principles, 77; "forms", 101, 123; images and realities, 122; Kant's criticism, 118, 119; on the 'likely', 33; on microcosm and macrocosm, 37, 38;
INDEX

Plato, cont.
on the concept of the One, 103; on resemblances, 35; on seeing through the eyes, 116; on system-making, 69
Platonic dialogue, 111, 112; period, relation of theory and fact, 24, 25; tradition that the Whole precedes the Parts, 106, 107
Plotinus, the artist and reasoning, 29; mystical conclusion of intellectual effort, 75; relation of man and the universe, 91; truth, 74
Poincaré, H., on discovery, 18–20
Polemical controversy, 113, 114
Poly- or monophylesis, 79
Πολλοί ἄνθρωποι (Archimedes), 77
Power, H., on the early revelations of the microscope, 13
Preformation and epigenesis, 92, 101, 102; compared with two modes of logical inference, 101, 102
Pre-Socrates, 12, 13, 103, 119
‘Primary’ and ‘secondary’ qualities of bodies, J. Locke on, 119, 120
Principle of least action, 88 n. 3
Probability, 26, 27, 28, 31, 53, 89
Problems in biology, 3–16; choice, 10, 11; frame of reference, 14, 15; phases in solution, 3–6; scale, 10, 11; serial character, 15, 16
‘Proof’ in biology, 31
Psychology, history of, 7
Ptolemy and the Ptolemaic system, 31
Punctuation in scientific writing, 53
Pythagorean school foreshadowing theory of microcosm and macrocosm, 37, 90
Quaestiones Naturales (Seneca), on microcosm and macrocosm, 38
Queen-Anne’s Lace, 117
Quotation, drawbacks of excessive, 51
Radial anatomy of peltate leaves, 25–8
Radial and dorsiventral outgrowths from shoots, 27
Raphael (Paradise Lost) to Adam, on discursive thought and intuition, 29 n. 3; on ‘saving appearances’, 24
Rationality of the universe, 81 et seq.
Recording observations on the spot, 51
Religio Medici (Sir T. Browne), 39, 40
Renan, E., on refraining from conclusions, 113; on style, 52
‘Representational’ and ‘abstract’ art, 116
Reproductive and vegetative phases in plants, 102
Research in science as an attempt to test the hypothesis of the Uniformity of Nature, 86, 92
Reynolds, Sir J., on invention, 19; on the mind and nature, 91; on the thought-factor in painting, 14
Richtigkeit and Wahrheit, 70, 71
Root, restriction of meaning in botanical terminology, 54
Russell, E. S., on epigenesis and preformation and their synthesis, 101, 102; on form and function, 93; on instinctive behaviour and bodily development, 93; on organismal theories, 101; on self-maintenance, 101 n. 2
Sachs, J. von, on the value of drawing to the botanist, 121
St Thomas Aquinas, see Aquinas, St Thomas
Sampling, inference from, 32
Scale of problem as a factor in research, 10, 11
Sceptical Chemist, The (the Hon. R. Boyle), 28, 111, 112
Science in the narrower sense, as a shareable process, 25; as an inductive process, 124
Seed, restriction of meaning in botanical terminology, 54
Seeing with the mind, 115 et seq.
Selection, Natural, and adaptation, 24; theory originating in an imperfect analogy, 42, 43
Self-maintenance, urge to, 101, 102
Seneca (Quaestiones Naturales) on microcosm and macrocosm, 38
Senescence, racial and individual, 42
Sense perception, and mental activity, 123; and preparedness, 117
Senses, as cause of diversity, 103; and reflective thinking (Diderot), 124; and understanding (Kant), 124; undervalued by Bruno, 118, and by Coleridge, 119
Sensibilité esthétique in mathematical discovery, 19, 20

© Cambridge University Press www.cambridge.org
INDEX

Shakespeare, W., dramatic technique, 111; on discursive thought, 29 n. 3; on resemblances, 35
Shelley, P. B., 111
'Simple' and 'compound' flowers, analogy between, 43
Simplicity postulate, 88 et seq.; as an instrument of method, 89, 90
Singer, C., on difference of process of discovery and demonstration, 46 n. 4; on separation of human and animal anatomy, 34; on uniformity of nature, 84; on unresolved antitheses, 96
Singleness-in-complexity, 106
Size of books, factors determining it, 58
Socrates, 106, 112
Socrates (Plato's), on discourse as an organism, 49; on first principles, 77; on images, 122; on seeing through the eyes, 110
Socratic dialectic, 109
Solomon, 28
Sophist (Plato), on resemblances, 35
Spiegel, A. (Spieghel), A., separation of human and animal anatomy, 34
Spinoza, B. de, attributes of the Whole, 84, 97–9; body and mind, 98, 99; conatus, 101; conception of truth (Short Treatise) 65, 66, 69, (De Intelllectus Emendatione) 70, (Ethics) 73, 74; as conciliator, 98 n. 1; concordance, 112; definition of pleasure, 21; extension and thought, 84, 97–9; geometrical method, 47; idea of cause discussed by Sir F. Pollock, 83 n. 1; intuitive insight, 75; monism, 84; on the nature of error, 72; on subject and object, 94; on uniformity of nature, 84, 85, 86
Stace, W. T., on uniformity of nature, 84
Sterne, L., representing the non-linear behaviour of the mind, 46
Style in scientific literature, 52
Subject and object, history of change of meaning of these terms, 94 n. 2
Symmetry, 117, 118
Synthesis, see Thesis
System-making, dangers of, 69
Systole and diastole in research (G. Elliot), 97
Tarshish, 28
Team work in biology, 6

Technique, advantages and dangers in its advance, 13, 14, 15
Teleology and mechanism, 73, 95, 96
Theaetetus (Plato), 116
Theophrastus, 68
Theories and laws, 29, 30
Thesis, antithesis, synthesis (Hegel), 109, 110
Thing-in-itself (Noumenon), 72
Thompson, Sir D'Arcy W., on Newton and the apple, 34
Thought, discursive, 29 n. 3, 46, 75, 111, 122; fusion with emotion, 20, 21, 75
Thought and Extension, see Extension
Thoughts on the Interpretation of Nature (Diderot), 124
Three Dialogues between Hylas and Philonous (G. Berkeley), 112
Timaeus (Plato), 37, 38, 40, 68, 69
