## CONTENTS

---

<i>Acknowledgements</i>	<i>page</i> xi
<b>CHAPTER 1 INTRODUCTION</b>	1
<b>CHAPTER 2 PATTERNS OF CLASSIFICATION</b>	10
I. The <i>scala naturae</i>	11
II. The Linnean hierarchy and the Tree of Porphyry	16
III. Quinarian circles and family trees	23
IV. Grades, phenograms, and cladograms	30
V. Conclusions	38
<b>CHAPTER 3 PATTERNS OF PHYLOGENY</b>	41
I. The <i>scala naturae</i> as phylogeny	42
II. Family trees	45
III. <i>Stufenreihen</i> and cladograms	52
IV. Reticulate phylogeny	58
V. Conclusions	59
<b>CHAPTER 4 HOMOLOGY AND THE EVIDENCE FOR EVOLUTION</b>	62
I. Homology	63
II. The classification of homology	69

Table of Contents

[More information](#)viii *Contents*

III. Vestigial organs	79
IV. Ontogeny and molecular biology	82
<b>CHAPTER 5 GEOLOGICAL AND GEOGRAPHICAL EVIDENCE</b>	
I. The fossil record	85
II. Fossils and transmutation	91
III. Biogeography	97
IV. Conclusions	106
<b>CHAPTER 6 METHODS OF CLASSIFICATION: THE DEVELOPMENT OF TAXONOMY</b>	
I. The method of logical division	109
II. Linnean taxonomy	114
III. Post-Linnean taxonomy	117
IV. “Evolutionary classification”	121
V. Conclusions: The historical basis of taxonomy	130
<b>CHAPTER 7 METHODS OF CLASSIFICATION: PHENETICS AND CLADISTICS</b>	
I. Phenetics	132
II. Phenetic clustering	144
III. Cladistics	151
IV. Cladistics and fossils	158
<b>CHAPTER 8 METHODS OF CLASSIFICATION: THE CURRENT DEBATE</b>	
I. “The transformation of cladistics”	169
II. Out-groups or ontogeny	170
III. Parsimony	181
	188

ix

**CHAPTER 9 CLASSIFICATION AND THE RECONSTRUCTION OF PHYLOGENY**

195

- |                                    |     |
|------------------------------------|-----|
| I. The reconstruction of phylogeny | 196 |
| II. Molecular distance             | 204 |
| III. Sequence data                 | 212 |

**CHAPTER 10 IS SYSTEMATICS INDEPENDENT?**

225

- |  |     |
|--|-----|
| I. Distances, parsimony, compatibility, or likelihood? | 226 |
| II. The hierarchy                                      | 237 |
| III. Cladograms, trees, and scenarios                  | 244 |

**CHAPTER 11 MECHANISMS OF EVOLUTION:  
DARWINISM AND ITS RIVALS**

248

- |   |     |
|---|-----|
| I. Lamarck and “Lamarckism”               | 250 |
| II. Natural Selection: Darwin and Wallace | 254 |
| III. Post-Origin theories                 | 262 |

**CHAPTER 12 MECHANISMS OF EVOLUTION:  
THE SYNTHETIC THEORY**

268

- |   |     |
|---|-----|
| I. “The Modern Synthesis”                       | 270 |
| II. Criticisms of the Synthetic Theory          | 273 |
| III. Developmental constraints and selection    | 279 |
| IV. Macroevolution                              | 284 |
| V. Conclusions: The Theory of Natural Selection | 294 |

**CHAPTER 13 SCIENTIFIC KNOWLEDGE**

298

- |   |     |
|---|-----|
| I. The problem of induction                             | 300 |
| II. The hypothetico-deductive method                    | 304 |
| III. “Popper and after”                                 | 308 |
| IV. Normative, descriptive, sociological, or cognitive? | 317 |

x

*Contents***CHAPTER 14 PHILOSOPHY AND  
BIOLOGY**

I.	Biological generalisations	326
II.	The taxonomic statement	330
III.	What is being classified?	333
IV.	The hierarchy again	341
V.	Propositions in biology	345
VI.	Postscript	347
<i>References</i>		349
<i>Author index</i>		387
<i>Subject index</i>		395
