

INDEX

- abelian group 150
- affine geometry 107
- affine group 84, 107, 112
- analytic surface 201
- angles, sum of 167
- area, hyperbolic 169, 174
- automorphism 36
- automorphism, conjugation 36
- automorphism group of a plane 117;
 of \mathbb{R} 108
- ball, n-ball 84
- basis 13
- bijection, bijective 1
- branch point 201
- Cayley's Theorem 7
- Cayley graph 48, 208
- Cayley tessellation 187
- center of a group 36
- characteristic, Euler–Poincaré 103
- coinitial graph 209
- combinatorially regular tessellation
 55, 60, 82, 84
- commutator 36
- commutator subgroup 36
- conformal map 144
- conic section 122, 132
- conjugate 36
- conjugation automorphism 36, 65
- consequence 15
- convex set, convex closure 89, 183
- coordinate 111, coordinate plane 111
- coset 14
- Coxeter group 51
- cross ratio 133, 157
- crystallographic group 45, 61, 74
- cube, n-cube 80
- curvature 170
- cycle of a permutation 193
- cyclic group 12
- defining relation 10, 12
- Desargues' Theorem 116, 127, 132
- differential, hyperbolic 173
- dihedral group 12
- direct product 17, 20
- Dirichlet region 180
- Dirichlet tessellation 180, 187
- discontinuous group 43, 61
- dual, duality 49, 89, 125
- elementary group 177
- Euler–Poincaré characteristic 103
- face type 84
- finite order 11, 186
- finite subgroup 152, 165, 186
- flow line 148
- four group 13
- free group 13
- free product 19
- frieze, frieze group 40, 45
- Fuchsian group 179
- fundamental region 47, 179
 side of 188; vertex of 188
- general linear group 34
- generator 10
- geodesic 172
- genus 202
- glide reflection 24
- graph 103
- group 5
- homeomorphism 84
- hyperbolic: area 169, 174;
 circle 175; distance 171;
 geometry 160; group 160;
 line 56, 161; metric 171;
 plane 56, 161; transformation 148
 triangle 56, 167
- icosahedral group 59
- incidence relation 112

- incidence plane 112
 infinity; point at, line at 122
 inversion in a circle 57, 136
 inversive geometry 136
 inversive group 142
 inversive line 138; plane 136
 isometry 1, 23
 isomorphism 3, 6
- kernel 14
- lattice 163
 linear fractional transformation 143
 local homeomorphism 201
 loxodromic transformation 147
- manifold 201
 matrix representation 30
 metric, hyperbolic 171
 metrically regular tessellation 82, 85
 Möbius transformation 159
 modular group 19, 181, 191, 198
- nonabelian group 5
 nondesarguesian plane 130, 132, 133
 noneuclidean crystallographic group 210
 noneuclidean geometry 166
 nonorientable manifold 209
 normal closure, normal subgroup 14, 15, 28
 normalizer 150
- orbit 43, 157, 201
 order 11
 orientation 9, 24
 orientable manifold 201
 orthogonal group 30
- parabolic transformation 147, 161
 parallel postulate 166
 pentagonal checkerboard 57
 permutation group 7
 perpendicular bisector, hyperbolic 176
 Poincaré Polygon Theorem 194
 Poincaré presentation 189
 polygon: Poincaré Polygon Theorem
 polygon, regular 8
 presentation 11, 12
 projection 121
 projection, stereographic 136
- projective: equivalence 125;
 geometry 121; group 121;
 line 133; plane 121
- quotient space 201
- real projective plane 123, 209
 reflection 23
 regular polygon 8, 199
 regular tessellation 78, 82, 199
 relation, relator, 10
 representation by matrices 30
 representation, complex 31
 Riemann-Hurwitz Formula 206
 Riemann surface 201
 rigid motion 1
 rotation 23
- Schottky group 182, 197
 semidirect product 28, 37
 similarity, similarity group 33
 simple group 155, 156
 simplex: n -simplex 79
 solvable group 149, 151, 163
 special orthogonal group 30
 stabilizer 28, 31, 45
 standard regular solid 79
 stereographic projection 136
 subgroup 6
 surface 200; surface group 200;
 surface, Riemann 201
 symmetry 1
 symmetry group 2
 symmetric group 6
- tessellation 46, regular 78, 82
 Tietze transformation 15
 torsion free subgroup 208
 trace 146, 147
 transitivity 32
 triangle 32, 35, 167
 triangle group 51, 181, 196
 triangle inequality 172
 triviality problem 18
 translation 23
 translation group 39, 43, 112
- undecidable 21
- vertex type 85
- word 10, word problem 18, 22
