Erikson, Erik, 38
ethical codes; see codes of (medical) ethics.
ethical conflicts: presentation of, in teaching mental health ethics, 47, 53–4
ethical decision making: compared with clinical, 17–39; vs. legal decision making, 26–7; and problem of uncertainty, 27–32; questions in, 81, 91, 96, 97, 99, 125, 128, 131, 134, 136
ethical dilemmas: recognition of, 41–2
ethical issues: heightened awareness of, 49–50, 52–3; and reality-based limitations, 54
ethical principles: application of, to clinical decisions, 17–39
ethical theory: awareness of relevant, 42–3; in teaching mental health ethics, 46, 47, 48, 53
ethicists: as teachers of ethics programs, 48
ethics: and clinical science, 32–5; defined, 1; in/of health care, 7–8; as social ethics, 23; study of, through case studies, 1–2; technology and, 5–8; in therapeutic relationship, 74–6; value of, 36; see also mental health ethics
ethics committees, 6
ethics movement: in health care, 3–4; in mental health, 10–14
ethics rounds, 1, 2, 47, 50, 51, 54, 57
evaluation: in case-oriented approach to teaching mental health ethics, 51–2
experimentation: and rights of subjects, 8–9; see also research
family: and confidentiality, 79; obligations to, 64; withholding information about, from patient, 71–2
family therapy, 11
favoritism, 56
federal government: role in health care, 4
fetus, 5; rights of, 99–101
Francoeur, R. T., 54
freedom: and mechanistic causal interpretation of events, 21–2; vs. safety, 25, 26
freedom of individual, 12, 13, 19, 20–1
freedom of religion, 103–4
Freud, Anna, 21
Freud, Sigmund, 22
function (of persons): and goodness, 20

good (the): as determined by patient vs. as determined by expert, 11; greatest, for greatest number, 24–5; in intuitionist position, 25–6; in Kant, 21–2; in naturalist morality, 20; in utilitarian view, 24
grand rounds, 49

habits, 20
Halleck, S. L., 13
happiness: in intuitionist position, 26; in naturalist morality, 20; in utilitarian view, 24
harm: possible, in modes of care, 11
harm to others, 57, 82–3, 91; confidentiality vs., 72–4; religious beliefs as cause of, 105–7
harm to patient, 110–12
harm to self, 91–3; religion and, 103–4
health care: value structure of, 3–15
health insurance, 4
Hegel, G. W. F., 18, 22–4
Hippocrates, 123
“holding environment,” 23
human conduct, principles of, 20
human experiments: competence to consent in, 115–16, 118–19; ethical concerns in, 8–9; see also research
