

CONTENTS

| | |
|--|-----|
| <i>Preface</i> | v |
| 1 Sequences by iteration | 1 |
| 1.1 Where are we heading? | 1 |
| 1.2 Sequences of numbers by iteration | 1 |
| 1.3 Iterations in a different world | 7 |
| 2 Metric spaces | 12 |
| 2.1 Distance | 12 |
| 2.2 Examples of metric spaces | 14 |
| 2.3 Sequences | 22 |
| 3 The three Cs | 29 |
| 3.1 Iteration revisited | 29 |
| 3.2 Closed sets | 30 |
| 3.3 An internal test for convergence | 36 |
| 3.4 Complete sets | 38 |
| 3.5 Compact sets | 45 |
| 4 The contraction mapping principle | 52 |
| 4.1 Real fixed points | 52 |
| 4.2 Contractions | 57 |
| 4.3 Real contractions revisited | 62 |
| 4.4 Some extensions | 64 |
| 4.5 Differential equations | 71 |
| 4.6 The implicit function theorem | 83 |
| 4.7 Conclusion | 86 |
| 5 What makes analysis work? | 87 |
| 5.1 Continuity | 87 |
| 5.2 Attained bounds | 92 |
| 5.3 Uniform continuity | 94 |
| 5.4 Inverse functions | 96 |
| 5.5 Intermediate values | 98 |
| 5.6 Some final remarks | 103 |
| <i>Index</i> | 105 |
