 and pair bonding, 202
 definition of, 140
 distinguished from love, 202
 in rats, 140
- Manifest Anxiety, 165
- Maturation versus development, 94, 100,
 103
- Mood, 171
- Motivation versus emotion, 107, 121
- Mourning, physiological effects of, 163
- Naked ape, 145
- Neuroscience and emotion, 17
- Non-reward versus omission of reward, 82
- Noradrenaline, 53, 58
- Omission of neutral stimuli, 127
- Omission of reward, as significant, 82, 127
- Optimal foraging, 78, 90
 and partial reinforcement, 79
 and rules of thumb, 79
- Parasympathetic nervous system, 53
- Partial reinforcement extinction effect
 Amsel’s theory, 83
 and frustration, 83
 and optimal foraging, 79

- and rules of thumb, 161
- associative accounts of, 84
- Capaldi's theory, 85
- comparison of theories, 87
- description of, 80
- in paired associate learning, 161
- multiple rules of thumb for, 90
- nonassociative theories, 83
- rules of thumb for, 81
- Peripheral feedback, elimination of, 55
- Physiological changes, as a result of expressions, 133
- Physiological changes in emotion, 14
 - as determiners of emotion, 62
 - as released, 22
 - specificity of, 59
 - stimulus properties of, 91
 - teleonomy of, 179
 - utility of, 51
- Praying mantis, 29
- Purpose, as a problem for biology, 33

- Radical behaviourism, 12, 105, 111
- Rage, sham, 24, 29
- Receptive fields
 - and enabling of reflexes, 177
 - and feature analysers, 84
 - changes in after electrical stimulation, 26
- Referencing, social, 131
- Reflexes, *see* state-dependent reflexes
- Releasers, 21, 103, 106, 123, 177
 - and species-specific behaviour, 115
 - frustration and aggression, 82
 - neural substrate of, 28
 - versus state-dependent reflexes, 31
- Ring dove, reproduction, 138
- Rules of thumb, 79, 90
 - for partial reinforcement, 81
 - multiplicity of with partial reinforcement, 90

- Self-report, 7, 37, 74, 110, 133–4, 172
 - from paraplegics, 56
- Sensory preconditioning, 107
- Separation distress, 148, 172
 - adaptive value of, 97
 - dependence on social structure, 96
 - distinct in the neonate, 98
 - long-term effects of, 100
- Serviceable associated habits, principle of, 41
- Sexual desire, *see* lust
- Sham rage, *see* rage, sham
- Skeletal responses
 - as released, 22
 - as-if, 64
 - neural control of, 31
 - teleonomy of, 180
- Social referencing, 131
- Species-specific behaviour, 115
 - defence reactions, 117
- State-dependent reflexes, 176, 178
 - as goal directed, 27
 - definition of, 25
 - enabling of, 176
 - in humans, 154
 - versus releasers, 31
- Stimulus after-effects, and partial reinforcement, 85
- Stimulus generalisation, description of, 85
- Stimulus specificity
 - of electrically enabled attack, 25
 - of natural responses, 21
 - of separation distress, 98
 - to components of a natural stimulus, 98
- Stress, 59
- Sympathetic nervous system, 53
 - blockade by drugs, 69
 - highly differentiated, 60
 - immunosympathectomy, 69
 - lesions of, 67

228 *Index*

- Tears**
 as a problem for theory, 146
 as exocrine product, 148
 as marine adaptation, 147
 teleonomy of, 147
 under parasympathetic control, 148
- Teleonomy**
 and independence of components of
 emotion, 172
 and reproductive success, 93
 as basis of emotional systems, 36
 definition of, 34-5
 limits of explanation with, 35, 170
 of autonomic changes, 62
 of depression, 149
 of emotional behaviour, 178
 of expressions, 47, 150
 of feelings, 77, 90
 of physiological changes, 51
 of separation distress, 97
 of tears, 147
 optimal foraging, 78
 versus goal-directed behaviour, 36
 versus purpose, 34, 37
 versus teleology, 34
- Toughening-up, 83**
- Voluntary control of expressions, 183**
- Yerkes – Dodson Law, 156**
