 PART I NORMAL VISUAL SENSITIVITY	 1
1 Rod-mediated vision: role of post-receptoral filters	3
<i>Robert F. Hess</i>	
1.1 Introduction	3
1.2 Detection sensitivity	4
1.3 Discrimination sensitivity	37
1.4 Concluding remarks	47
 2 The light-adaptation of the human rod visual system	 49
<i>Lindsay T. Sharpe</i>	
2.1 Introduction	49
2.2 The absolute sensitivity of the rods	57
2.3 The desensitization of the rods	68
2.4 The influence of the cones upon rod desensitization	98
2.5 The saturation of the rods	117
2.6 Conclusions	122
 3 Physiological mechanisms of visual adaptation at low light levels	 125
<i>Maureen K. Powers and Daniel G. Green</i>	
3.1 Introduction	125
3.2 Effects of background light on luminance detection	127
3.3 Effects of background light on spatial vision	138
3.4 Summary	144
	v

vi	<i>Contents</i>	
	4 Absolute sensitivity	146
	<i>Walter Makous</i>	
	4.1 Basic concepts	146
	4.2 Light as a noisy carrier	147
	4.3 Quantum detector with light loss	147
	4.4 Poisson noise	148
	4.5 Non-Poisson noise	160
	4.6 The nature of the centrally acting noise	167
	4.7 Neural noise	173
	4.8 Summary	175
	5 Dark adaptation: a re-examination	177
	<i>T. D. Lamb</i>	
	5.1 Introduction	177
	5.2 Psychophysics	180
	5.3 Receptor physiology	193
	5.4 A model of dark adaptation	210
	5.5 Summary	219
	6 Invertebrate vision at low luminances	223
	<i>Simon B. Laughlin</i>	
	6.1 Introduction	223
	6.2 Responses of invertebrate photoreceptors at low luminances	224
	6.3 Photoreceptor intrinsic noise	226
	6.4 The efficiency of transmission of single photon signals	235
	6.5 Sampling and processing	239
	6.6 Optical trade-offs	239
	6.7 Neural sampling and processing	245
	PART II ACHROMATOPSIA	251
	7 Total colour-blindness: an introduction	253
	<i>Lindsay T. Sharpe and Knut Nordby</i>	
	7.1 Early observations about colour-blindness	256
	7.2 Theories of total colour-blindness	268
	7.3 A short taxonomy of achromatopsias	278
	7.4 Conclusions	288

<i>Contents</i>	vii
8 Vision in a complete achromat: a personal account	290
<i>Knut Nordby</i>	
8.1 Introduction	290
8.2 A short biography	290
8.3 Rod vision	304
8.4 Closing remarks	315
9 Clinical aspects of achromatopsia	316
<i>Egill Hansen</i>	
9.1 Classification	316
9.2 Heredity	318
9.3 Associated somatic defects	319
9.4 Natural history	319
9.5 Clinical findings	321
9.6 Electrophysiological examinations	324
9.7 Colour vision tests	325
9.8 Tests for incomplete achromatopsia	329
9.9 Diagnosis	331
9.10 Visual habilitation	333
9.11 Prognosis	334
10 The photoreceptors in the achromat	335
<i>Lindsay T. Sharpe and Knut Nordby</i>	
10.1 Introduction	335
10.2 The histology	337
10.3 The scotoma	338
10.4 The photopigment: fundal reflectometry and spectral sensitivity	339
10.5 Saturation	346
10.6 Directional sensitivity	348
10.7 The psychophysics	353
10.8 The electroretinogram	376
10.9 Concluding remarks	380
10.10 Appendix	382
11 Post-receptoral sensitivity of the achromat	390
<i>R. F. Hess</i>	
11.1 Introduction	390

viii	<i>Contents</i>	
	11.2 Are there high intensity receptors in the achromat's retina?	391
	11.3 Do the rods in the achromat's retina make normal post-receptoral connections?	393
	11.4 Mesopic vision	397
	11.5 Concluding remarks	412
	PART III CLINICAL AND APPLIED	415
	12 The loss of night vision: clinical manifestations in man and animals	417
	<i>Harris Ripps and Gerald A. Fishman</i>	
	12.1 Introduction	417
	12.2 Non-invasive tests of visual function	418
	12.3 Vitamin A in night vision	427
	12.4 Inherited night blindness in man and animals	429
	12.5 Summary	450
	13 Aided vision at low luminances	451
	<i>A. van Meeteren</i>	
	13.1 Introduction	451
	13.2 Night-glasses	459
	13.3 Image intensifying devices	464
	<i>References</i>	473
	<i>Index</i>	538
