

---

## INDEX

---

- action of a functor 231
- action of the fundamental group 109, 117, 121
- Adams–Hilton model 446
- adjoint map 3
  - pair  $(I, P)$  29
- admissible class of complexes 212
- algebra 45
- algebraic  $K$ -theory 38
- anticommutativity, graded 75
- arithmetic group 435
- associated 337
- attaching a cell 5
- augmentation 46
  - ideal 45
  - of an algebra 46, 95
- based functor 10
  - map (*see also* suspension) 115
  - object 115, 152
  - objects, equivalent 11
  - pair 119
  - up to homotopy 115
- C**-bimodule for a category  $C$  248
- C**-module for a category  $C$  248
- CDA**, category of commutative cochain algebras 59
- CDA**<sub>\*</sub>, cofibration in 60
- CDA**<sub>\*</sub>, elementary cofibration in 60
- CDA**<sub>\*</sub>, minimal cofibration in 60
- CDA**<sub>\*</sub>, push outs in 66
- CDA**<sub>\*</sub>, weak equivalence in 60
- CDA**<sub>\*</sub>, connected push out in 67
- CDA**<sub>\*</sub>, cylinder in 69
- CDA**<sub>\*</sub>,  $k$ -invariants in 425
- CDA**<sub>\*</sub>,  $\Delta(V, n)$  cofibration in 424, 426
- CDA**<sub>\*</sub>,  $\psi$ -homotopy groups in 72
- CW**-complex (*see also* principal reduction) 36, 194
  - CW**-complex, relative 36
  - CW**-model, minimal 364
    - (resolution of a space) 36
  - CW**-pair 37
  - CW**-space 36
  - CW**-structure (*see* **Top**)
  - CW**-tower, action for the 344
    - isotropy groups for the 345
    - obstruction for the 342
    - of categories 347
  - cell, attaching map of 36
    - characteristic map of 36
  - cellular chain complex 199
    - of a reduced complex 437
    - of a universal covering 308
  - cellular homology of a reduced complex 437
  - cellular map 307
  - chain algebra (*see also* **DA**) 46
    - homology of a 47
    - of topological monoid 57
    - spectral sequence for a pair of 55 (*see also* monoid, principal reduction)
  - chain complex 39
    - singular 44
    - cofibration for 40
    - cylinder of 41
    - direct sum of 40
    - projective 40
    - tensor product 40
    - weak equivalence 40 (*see also* cofibration category)
  - chain homotopy 41
    - Lie algebra (*see also* **DL**) 76
    - map 40
  - classifying map 152
  - class of complexes, good 372
    - very good 386
  - cobase change functor 104
  - cocartesian 83

- cochain algebra 46  
 commutative (*see also* **CDA**) 59  
 connected 59  
 tensor product of commutative 60
- cochain complex 40
- cocycle condition 337, 338, 374
- coef**, coefficient category 200
- coefficient functor 202
- cofiber 125, 128, 129  
 \*action on the 131  
 sequence 128
- cofibrant (*see* fibration category, model category)  
 objects, category of (K.S. Brown) 12
- cofibrant model (*see* fibration category)
- cofibration (*see also* **CDA**, chain complexes, **DA**, **DL**, **Pair(C)**, **Top**)  
 axiom (I3) 19  
 closed (*see* **Top**)  
 elementary (*see* **DL**, **DA**, **CDA**)  
 principal 125  
 sequence 128  
 trivial 6
- cofibration category 5  
 chain complex in a 195  
 chain homotopy in a 195  
 chain maps in a 195  
 cofibrant in ( $= \phi$ -cofibrant) 7  
 fibrant in 6  
 fibrant model in 6  
 (*see also* homotopy category, homotopy extension)
- cogroup 118
- cohomology 40, 207  
 of a category 246  
 of a group 249  
 with local coefficients 208, 214, 422
- colimit, homotopy 183  
 (lim) 182
- commutative cochain algebras  
*see* **CDA**, principal reduction, tower of categories
- commutator subgroup 38
- completion ( $p$ -) 38  
 profinite 38
- composition axiom (C1) 6
- complex (*see also* admissible class) 194  
 attaching maps of a 194  
 based 194  
 cohomology for 198  
 $n$ -skeleton of a 194
- complex projective space 167
- comultiplication 118, 119
- cone 119, 120
- cone, mapping 125
- connected,  $n$ -connected pair 278, 296  
 $n$ -connected covering 364
- continuity axiom 182
- cosmash product 155
- covering transformation 207
- co-Whitehead product 160
- crossed chain complex 222, 227, 308  
 map 308  
 homotopy of 308
- crossed complex 307  
 homomorphism 309  
 module 123  
 module, basis of a 310  
 module, free 310, 316
- cube theorem 33
- Cup product 163  
 for cohomology of categories 250
- cylinder (*see* **CDA\***, chain algebra, chain complex, **DA**, **DL**, **I**-category, mapping cylinder, relative cylinder, **Top**)  
 axiom (I1) (*see also* chain complexes, **DL**) 18  
 double 19
- DA**, category of chain algebras 46  
 cylinder in 48  
 cofibration in 47  
 elementary cofibration in 47  
 homotopy, addition map in 170  
 push outs in 47  
 weak equivalence in 47
- DA**-homotopic, relative  $B$  49
- de Rham isomorphism 419, 422
- derivation 309  
 inner 257  
 of degree  $n$  173  
 on a category 256  
 property 240
- detecting functor 230
- diagonal map 11
- diagonal, reduced 161
- difference for maps 126  
 operator 145  
 operator, relative 145  
 $\nabla f$  314
- differential 40

- differential algebra 46
  - forms, simplicial 72
- dimension of a pair of spaces 278
- direct sum (see chain complexes)
- disk  $D^n$  5
- distributivity law 232, 233
- DL**, category of chain Lie algebra 76
  - cofibrations in 77
  - cylinder in 79
  - elementary cofibrations in 77
  - push outs in 77
  - weak equivalences in 77
- Dold's theorem 96
- Dold–Whitney theorem 168
- dual 4
  
- $E$ -stable 386
- Eckmann–Hilton decomposition 363
- effective action 232
- Eilenberg–MacLane space 213
- empty set  $\phi$  5
- evaluation map 162
- exact
  - homotopy couple (Massey) 228
  - homotopy sequence of a pair 120
  - sequence for a functor 242
  - (see also homotopy groups, Whitehead)
- exponential automorphism  $\exp \circlearrowleft$  70, 80
- extension, action associated to an 184
  - of a map 92
  - of mapping, primary obstruction for the 342
- exterior algebra 59
- external 33
  
- factorization axiom (C3) 6
- factorizations, category of 232
- fat product 155
- fat sum 155
- fat sum, based 155
- fiber 153
- fiber sequence 153
- fibrant (see fibration category, cofibration category)
- fibrant model 16
- fibrant models, axiom on (C4) 6
- fibration (see also **Top**) 10
  - good 297
  - nilpotent 216
  - simple 216
- fibration category 10
  - cocomplex in a 215
  - cofibrant in 11
  - cofibrant model in 11
  - fibrant in (=  $e$ -fibrant) 11
  - homotopy in 11
  - homotopy groups in a 153
  - pair in a 153
- filtered object 180
  - $k$ -homotopy for 182
- filtration quotients 191
- folding map 8, 115
- free algebra 46
  - category 249
  - chain algebra 47
  - group under  $G$  310
  - monoid 46
  - product of algebras 46
    - of groups 309
- fundamental group (see also nilpotency) 107, 108
  - action of the 109, 117, 121
- $\Gamma$ -sequence 449
- generators, module of 47, 77
- gluing lemma 84
- graded algebra (see also Lie bracket) 45
  - $\Lambda(V)$  free commutative 59
  - tensor product of 58
- graded Lie algebra 75
  - 1-reduced 75
- graded module 39
  - negative 39
  - positive 39
  - suspension of 39
- Grothendieck group 361
- group of equivalences 231
- group ring 206
  - augmentation of 206
  - category of modules over 206
  
- $h$ - $c$ -category (A. Heller) 12
- homology 40
  - decomposition 363
  - generalized theory 18, 37
- homology theory, limit axiom for 37
  - with coefficient  $\Gamma$  207
  - with local coefficients 38, 208
- homological dimension 443
- homologically  $(n - 1)$ -connected 443
- homotopic 3
  - over  $B$  12

- homotopic (*Cont.*)
  - relative  $B$  (under  $B$ ) 8
- homotopy (*see* fibration category,
  - cofibration category,  $I$ -category)
- homotopy, addition of 93
  - category of a cofibration category 99
  - classes (*see also* **Top**) 92
  - cocartesian 9
  - dimension 296
  - equaliser 186
  - equivalence (*see*  $I$ -category, **Top**,
    - structure theorem)
- homotopy extension axiom 12
  - property in a cofibration category 98
- homotopy groups (*see also* universal
  - coefficient theorem)
  - of function spaces 135, 136
    - exact sequences for 138
  - of spheres, stable 286
  - lifting property (HLP) 4
  - negative of a 93
  - push out 9
  - relative groups 120
  - sets, induced function on 94
  - system 306
  - systems of order 2 (or 1) 322
  - systems of order  $n \geq 3$  336
  - under  $B$  (*see*  $I$ -category)
- Hopf construction 158
- Hopf map 159
- Hurewicz homomorphism 119
  - generalized 223
- Hurewicz theorem 228, 442
- $I$ -category 18
  - cylinder in 18
  - homotopic in 20
  - homotopy equivalence in 20
  - homotopy under  $B$  in 21
  - mapping cylinder in 23
  - suspension functor in 20
- image category 230
- image category, enlarged full 241
  - full 241
  - reduced 241
- indecomposables 45
- initial object 7
- injective on  $X_2$  212
- interchange axiom (I5) 19
- internal 31
- $IP$ -category 31
- isomorphism 6
- isotropy group 205, 232
- Jacobi identity 75
- $K(A, n)$ -fibration 414
- $k$ -invariant 216, 363
  - category of 415
- $k$ -stem of homotopy categories 286
- Kan complex 17
- Kan fibration 17
- $KS$ -extension 60
- left distributivity law 146
- left homotopy structure (D.W.
  - Anderson) 12
- Lie algebra 75
  - free 76
  - free product of 76
  - indecomposables of 75
- Lie bracket in a graded algebra 75
- lifting lemma 90
  - weak 90
- lifting of a homotopy 5
- limit axiom (*see* homology theory)
- limit (Lim) 182
- linear action 233
  - covering 239
    - classification of 255
    - equivalent 240
    - split 240
  - extension 237
    - classification of 257
    - equivalent 237
    - weak 237
- local coefficients (*see* cohomology,
  - homology)
- localization 37, 38
  - functor 104
- localization of a category 99
- local space 37
- local system on a category 248
- loop object  $\Omega$  152
- loop operation, functional 154
- loop operation, partial 154
- loop space (*see* Moore) 57
  - singular chains of a 57
- loop theorem, general 296
- lower central series of groups 73
- mapping cone, cooperation on the 126
  - double 147

- mapping cylinder  $Z_j$  (*see also* 1-  
 category) 8  
 mapping torus 186  
 Milnor–Moore theorem 82  
 minimal model 62, 443  
 mixed term 233  
 model category 264  
   closed 15  
   cofibrant in 15  
   fibrant in 15  
   proper 114  
   (Quillen) 14  
 model functor 10  
 monoid, topological 37  
 Moore loop space 57  
 Moore space 267  
  
 Nat, category of natural systems 246  
 natural system of abelian groups 233, 236  
 natural equivalence relation 229  
 nerve of a category 246  
 nilpotency of function spaces 246  
   fundamental group 205  
 nilpotent  $G$ -modules 75, 205  
   groups 74, 205  
   spaces 74  
 non-graded algebra 45  
 null-homotopic 119  
  
 objects under  $C$  and over  $D$  30  
 obstruction element 240  
 obstruction, primary 125  
 obstructions, higher order 350  
 opposite category 10  
 over, objects over  $D$ , maps over  $D$ , 31  
  
 $P$ -category 27  
   path object in 27  
   homotopic in 28  
    $p$ -category, homotopy lifting property  
   in 28  
 path object (*see also*  $p$ -category) 12  
   contractible 152  
    $P$   
 Pair  $(C)$ , category of pairs 85  
   cofibration in 86  
   weak equivalence 86  
 Peiffer element 316  
 Peiffer group 316  
 perfect group 38  
 $(\Pi, n)$ -complex 369  
  
 Poincaré–Birkhoff–Witt 77  
 Poincaré lemma 61  
 pointed, very well 35  
   well 35  
 Pontryagin ring 57  
 Postnikov decomposition (*see also*  
   tower) 215  
   functor 364  
   enriched 368  
   section 364  
   tower (*see also* principal reduction) 364  
 presentation under  $\sigma$  310  
 principal fibration 152  
   map 260  
   reduction of chain algebras 403  
     of CW complexes 397  
     of Postnikov towers 399  
   for commutative cochain  
   algebras 425  
 projective (*see* chain complexes)  
 projective class group, reduced 361  
 Puppe sequence 128  
 push out (*see also*  $CDA_*$ ,  $DA$ ,  $DL$ ,  
   homotopy) 83, 86  
   axiom (C1) 6  
   (I2) 18  
   compatible with 10  
   connected (*see*  $CDA_*$ )  
  
 quadratic action 233  
   function 477  
 Quillen equivalence of rational homotopy  
   categories 81, 445  
 Quillen functor 81, 445  
 Quillen’s (+)-construction 38  
 quotient category 229  
   functor 230  
   map 132  
 $rel_*$ , set of homotopy classes 116  
 relative cylinder 8, 97  
   axiom (I4) 19  
   dimension 361  
   homotopy lifting property 31  
 relativization lemma 86  
   property of the obstruction 344  
 restriction 6  
  
 Samelson theorem 178  
 satisfies  $\Gamma = \tilde{\Gamma}$  in degree 2 377, 391  
 secondary boundary operator 223  
 semi-direct product 238

- Serre fibration 5  
 simplicial set 17  
 singular set 17, 36  
   realization of 104  
 skeleton, relative  $n$ -skeleton 36  
 spectral sequence (*see* chain algebras)
