

INDEX

- B**
 Brownian scaling, p.16
 Burkholder's inequality, p.64
- C**
 Cameron-Martin-Girsanov theorem, p.109
 Chapman-Kolmogorov equation, p.12
 conditional expectation $E^P[X|\mathcal{F}']$, p.1
 conditional probability distribution (c.p.d.) and regular c.p.d. (r.c.p.d.), p.3
 consistent family of distributions, p. 12
- D**
 determining set, p. 80
 Doob's inequality, p.29
 Doob-Meyer Theorem, pp.39,43 $\langle X \rangle$ and $\langle X, Y \rangle$, p.46
 Doob's stopping time theorem, p.33
 Doob's upcrossing inequality, p.34
- G**
 Gauss kernel, p.15
- I**
 initial distribution, p.12
- $\hat{I}to$'s exponential of X , p.61
 $\hat{I}to$'s formula, pp.53,71,72
 $\hat{I}to$'s stochastic integral for $X \in Mart_c^2$, p.49
 for $X \in Mart_c^{loc}$, p.59
 for $Z \in S.Mart_c$, p.70,71
 for $X \in (Mart_c^2)^d$, p.88,89
- K**
 Kolmogorov's criterion, p.10
- L**
 Levy's theorem, p.56
 local martingale, p. 58
 $Mart_c^{loc}$, p.58
 $\langle X \rangle$ and $\langle X, Y \rangle$, p.58
 local time, p.69
- M**
 \mathcal{M} , p.12
 \mathcal{M}_t , p.12
 $M_1(E)$, p.1
 martingale, p.28
 L^q -martingale, p.29
 L^q -bounded, p.36
 $Mart_c^2$, p.46
 $\langle X \rangle$ and $\langle X, Y \rangle$, p.46
 X^T and X_T , p.46
 martingale problem, p.73
 $M.P.((s, x); \{L_t\})$, p.73
 $M.P.(x; L)$, p.77
 well-posed, p.85
 locally well-posed, p.101

128

P $P_{\tau}^{\theta, Q}$, p.81 $P \circ \phi^{-1}$, p.13

Polish space, p.2

progressively measurable

function, p.27

(a.s.) continuous, p.28

right continuous, p.27

locally bounded
variation, pp.40,70Prokhorov-Varadarajan
theorem, p.7**S**

semi-martingale, p.70

S.Mart_c, p.70 $\langle Z \rangle$ and $\langle Z, Z' \rangle$, p.70stochastic integral, see Itô $\hat{\mathbf{x}}$ stochastic integral
equation, p.87

Stratonovitch integral, 71

stopping time, p.31

 \mathcal{F}_{τ} , p.31

sub-martingale, p. 28

T

Tanaka's formula, p.69

time inversion, p.16

time shift θ_t , p.16transition probability
function, p.12**W**weak topology on $M_1(\Omega)$, p.5Wiener measure $\#$, p.15

Wiener process, p.15

X $x(t, \omega)$, p.3
