

CONTENTS

	Preface	ix
	Introduction	1
Part 1	Rings	
1.1	Introduction	5
1.2	Binary operations	5
1.3	Definition of a ring	8
1.4	Homomorphisms, subrings and isomorphisms	12
1.5	Integral domains	20
1.6	Fields	23
1.7	Residue-class rings	28
Part 2	Factorization	
2.1	Introduction	35
2.2	Unique factorization domains	36
2.3	Euclidean domains	39
2.4	Greatest common divisors	46
2.5	Prime elements	53
2.6	Euclidean domains are UFDs	55
2.7	The two-squares theorem	56
2.8	Factorization of polynomials	62
2.9	An application of UFDs to determinantal identities	82
	Postscript	90
	Partial solutions to exercises	92
	References	107
	Index	109
