

INDEX OF SUBJECTS

- Aanderaa-Rosenberg Conjecture 218
 adjacent 1
 algorithm 197
 Algy (player in a game) 196
 almost 1-factor 43
 arc 1
 asymmetric graph 88
 auto-extension 111
 automorphism 88

 blue vertex 135
 Bollobás-Eldridge Conjecture 164
 bridge 3
 Brooks' theorem 56

 capacity 198
 Cayley graph 100
 chain 2
 chromatic index 9
 chromatic number 3
 circuit 2
 circulant graph 107
 circumference 2
 class 1 9
 class 2 9
 closed neighbourhood 59
 colour-preserving automorphism 96
 complement of a graph 3
 complete graph 2
 complete symmetric digraph 96
 component 3
 composition of an integer 69
 computational complexity 197
 connected graph 3
 Constructor (player in a game) 196
 corner-vertex 135
 Coxeter graph 134
 critical edge 14
 critical element 198
 critical graph 21
 Critical Graph Conjecture 26
 critical-list argument 45
 cubic graph 2
 cut-vertex 3
 cycle 2
 cycle index of a group 8

 degree of a vertex 1
 degree of asymmetry 93
 density (clique number) 56
 depth of a leaf 214

 determining preset 197
 diagram of a property 210
 diameter 2
 digraph 1
 Dirac's theorem 3
 distance 2
 distance-transitive 124
 doubly transitive 5

 edge-independence number 20
 edge-isomorphism 92
 edge-transitive (-symmetric) 90
 elusive property 197
 embedding 88
 end-vertex 1
 enumerating polynomial 198
 equitable edge-colouring 72
 equivalent symbols 109
 Erdős-Sós Conjecture 157
 extension of a preset 197

 faithful group action 5
 fan 14
 4-sided triangle 59
 Frucht's theorem 97
 full preset 197

 Generalized Aanderaa-Rosenberg
 Conjecture 223
 generalized Petersen graph 2
 girth 2
 graph property 198
 graphical regular representation
 of a group 103
 group-coset graph 102

 Hamilton-connected 137
 Hamilton cycle 3
 Hamilton path 3
 Hamiltonian 3
 HJ-construction 30
 homeomorphic graphs 3

 incident 1
 independent edges 2
 induced subgraph 1
 inserting a vertex 3
 interior-vertex 135, 161
 isolated vertex 1
 isomorphic graphs 88

- join of two graphs 3
 k-colourable 9
 k-colouring 9
 Kempe-chain argument 29
 k-ultratransitive 124
 k-vertex 56

 latin square 69
 leaf 214
 line graph 3

 major vertex 24
 matching 2
 minor vertex 24
 monomorphism 88
 monotone property 198
 multiplicity 1

 near 1-factor 54
 neighbour 1
 neighbourhood 1
 (n,m) graph 170
 non-elusive property 196
 null graph 2

 odd-even balanced condition 214
 Odd Graph Conjecture 55
 1-factor 2
 1-Factorization Conjecture 52
 1-transitive graph 92
 orbit 5
 order (of a graph) 1
 outerplanar graph 52
 outline rectangle 71

 packing 156
 parallelogram-free subset 114
 path 2
 Petersen graph 2
 places of K_n 198
 platonic graphs 2
 Polya's theorem 8
 pregraph 198
 preset 197
 probe 197
 proper preset 197
 property of a set 196
 purple edge 135

 quasi-group digraph 106

 recolouring a fan 14
 red vertex 135
 reduction modulo (P,Q,S) 69

 regular group action 4
 regular of degree d 2
 Ringel's conjecture 157
 Rivest-Vuillemin Conjecture 220

 Sabidussi's theorem 102
 Schläfli graph 130
 scorpion graph 205
 section graph 111
 Shannon's theorem 17
 similar vertices 90
 simple strategy 200
 size 1
 snark 77
 s-path 115
 splitting a vertex 76
 stabilizer 5
 stair 158
 star 2
 star sink 211
 star source 211
 s-transitive graph 115
 strategy 197
 s-triangle 66
 strictly s-transitive graph 115
 Sylow's theorem 6
 symbol of a Cayley graph 109
 symmetric graph 92
 symmetrization of a graph 93

 total chromatic number 78
 Total Colouring Conjecture 78
 total deficiency 117
 transitive 5
 Tree Packing Conjecture 157
 Tutte's conjecture 78
 Tutte's theorem 4

 ultrahomogeneous 123
 union of two graphs 3
 uniquely k-colourable 20

 valency 1
 valency-list 39
 vertex-colouring 3
 vertex-transitive (-symmetric) 88
 Vizing's Adjacency Lemma 24
 Vizing's theorem 16

 weight of a candidate vertex 206

 β -product 106
 Δ -critical 121
 π -acceptable path 66

INDEX OF NOTATION

- $a(G)$, degree of assymetry 93
 $A(G)$, automorphism group 88
 A_x, B_x 14
 C_4^+ , a graph of order 4 176
 $C(E(u,v))$, a set of colours 14
 $c(F)$, comput. complexity 197
 C_n , cycle of length n 2
 $C_\pi(v)$ or $C(v)$, a set of colours 9
 $C_\pi^+(v)$ or $C^+(v)$, a set of colours 9
 $\deg G$, deg. of a regular graph 2
 $d(G)$, diameter of G 2
 $e(G)$, size of G 1
 $E(G)$, edge set of G 1
 $E(u,v)$, edges joining u and v 14
 $F^c, \bar{F}, F^{\text{mon}}, F^*$ 199
 $|G|$, order of G 1
 \bar{G} complement of G 3
 $G - C_r$ 181
 $G(\Gamma, S)$, Cayley graph 100
 $G(A/H, S)$, group-coset graph 102
 $G + H$, join of G and H 3
 $G(5), G(8)$, graphs 184
 $G(9)$, a graph of order 9 191
 G^n , of graphs of order n 198
 $G(n)$, a statement 59
 $G \cup H$, union of G and H 3
 $G - v$, an induced subgraph 1
 H_7 , a graph of order 7 184
 H_9 , a graph of order 9 190
 H -path 3
 $(j, i)_\pi$ -chain or (j, i) -chain 10
 K_n , complete graph of order n 2
 $K_{m,n}$, complete bipartite graph 2
 $L(G)$, line graph of G 3
 $M(n)$, a statement 60
 $N(x)$, neighbourhood of x 1
 $N[v]$, closed neighbourhood 59
 O_r , null graph of order r 2
 $\text{Orb}_\Gamma(X)$, orbit of X 214
 O_r^t , complete t -partite graph 18
 P_n , path of order n 2
 $P_F(z)$, enumerating polynomial 198
 $\mathcal{P}(T)$, power set of T 196
 $S(6)$, a graph of order 6 176
 S_n^+, S_n^- , trees of order n 170
 S_t , star of order t 2
 $T_{a,b}$, a permutation 108
 $T(1), T(2), T(3)$ 170
 T_i , a tree of order i 157
 TPC , Tree Packing Conjecture 157
 $\langle U \rangle$, subgraph induced by U 1
 VAL , Vizing's Adjacency Lemma 24
 VT-graph 99
 $X(\phi, \psi)$, a sequence of presets 197
 $\partial(x, y)$, distance 2
 $\delta(G)$, minimum valency of G 1
 $\Delta(G)$, maximum valency of G 1
 Δ -critical 21
 Δ -graph 94
 $\gamma(G)$, girth of G 2
 $\chi(G)$, chromatic number of G 3
 $\chi'(G)$, chromatic index of G 9
 $u(M)$, multiplicity of M 16
 $u(u, v)$, multiplicity of uv 1
 $\omega(G)$, density of G 56
