

## INDEX

- adapted basis 63
- admissible basis 64
- admissible matrix 66
- amenable 121
- analytic semigroup 12
  
- Beurling–Deny criterion 141, 142
- Brownian motion 141
  
- Campbell–Hausdorff formula 37, 54
- capacity 139, 146
- Carnot–Carathéodory distance 39, 106
- Cayley graph 75
- co-compact lattice 76, 85
- condensor 139, 146
- connected distance 40
- convolution powers 74
- covering manifold 141
  
- deck transformation group 141, 146
- dimension 8, 89
- dimension at infinity 52, 143
- Dirichlet form 2, 20, 94
- Dirichlet inequality 2, 90
- Dirichlet norm 77, 90
- Dirichlet problem 29
  
- exponential growth ix, 77, 119
- exponential local coordinates 35, 64
- exponential map 34
  
- finitely generated groups 74
- fractional power 12
- free nilpotent Lie algebra 45
- Friedrichs extension 20
- fundamental group 141, 146
  
- good field 64
- Green function 31, 141
- Gromov’s theorem 76, 84, 86, 146
- growth functions ix
  
- Hardy’s inequality 128
- harmonic function 8, 143
- Harnack inequality 28, 45, 67, 114
- Harnack’s principle 5
- heat equation 3
- heat kernel 48, 106
- Heisenberg group 44
- Hölder seminorm 60, 114
- Hörmander’s condition 26, 106
- hypoellipticity 26
  
- infinitesimal generator 8
  
- intermediate growth 76
- isoperimetric inequality ix, 1
  
- Kesten’s conjecture x, 85
  
- Laplace–Beltrami operator 141
- left invariant vector field 21, 45, 106
- local dimension 52
- lower gaussian estimates 113
  
- Mal’cev’s theorem 76, 85
- Marcinkiewicz’ theorem 11
- Markov chain 75, 85, 142
- maximal function 9
- modular function 123
  
- nilpotent group 76
- nilpotent Lie group 42
- non-amenable 121
- non-unimodular Lie group 123
  
- Picard theorem 139
- Poincaré’s inequality 145
- polynomial growth 77, 107
- potential operator 10
  
- quasiconformal map 138
- quasi-isometry 138
- quasiregular map 138, 146
  
- random walk x, 86, 141
- recurrent group 86, 142
- regularizing operator 89
- Riesz transform 2, 147
  
- slice 44
- Sobolev inequality 1, 56, 70, 127, 132
- Sobolev norm 77
- Sobolev seminorm 60, 114
- Sobolev theorem 55, 70
- stratified group 44
- sublaplacian 45, 106
- subordinated semigroup 12
- superpolynomial growth 77, 103
- symmetric submarkovian operator 89
- symmetric submarkovian semigroup 4, 8, 20
  
- transient group 86, 141, 142
  
- unimodular Lie group 106
- upper gaussian estimates 108
  
- volume growth 3, 75, 88
  
- weak type 11
