

## INDEX

---

- aerial photography, 21, 22, 43–4, 56, 122, 272–3, 275, Plate 5, *see also* surveying, GPS
- Age of Reason, 15, 16
- anthropology, 8, 13, 16, 38
- Antiquarianism, 9, 10, 15, 22, Plate 1
- Archaeology Data Service (ADS), 271, 281–2
- archives/archiving  
 drawn, 134–5, 242, 278  
 future directions, 281–2, 284, 286, 287, 290  
 paper, 67, 81–2, 117  
 photographic, 122  
 use, 51, 78
- Aubrey, John, 22
- augering, 57–8, 274
- Barker, Philip, 13, 30–4
- boreholes, *see* augering; coring
- Boucher de Perthes, Jacques, 16
- brick features, Figure 19  
 articulation, 187–9, Figure 21  
 building materials, 184–7  
 contemporary ground surface, 190–2  
 mortar, 189–90
- Camden, William, 19, 22
- Cheddar, Somerset, 13
- chemical mapping, 54–7, 274, Figure 4
- clearance of sites, 93–5, Plate 14
- computers, 21, 22, 77–9  
 CD-ROM, 282–3  
 data archiving, 281–2  
 data dissemination, 82, 282–7; websites, 73, 283–4  
 data manipulation, 113, 150, 152, 216, 262, 278–81; modelling, 284–7; stratigraphy, 158, 161, 166, 243  
 data storage, 51, 122, 134–5, 270–3, 275–7, Plate 35
- conservation, 42, 61, 68, 76–7, 199, 207, 229, Plate 10
- contextual archaeology, 268, 269
- coring, 56, 57–8
- Cottam, East Yorkshire, 274–5
- cultural resource management, 25, 41, 84, 272
- cut features, 208–12  
 physical characteristics, 38, 204, 211–12  
 stratigraphic relationships, 154, 210–11, Figure 25
- Cyriac of Ancona, 8
- Darwin, Charles, 9, 17
- dendrochronology, 19, 89, 218, 225
- deposit modelling/mapping, 36, 41–3, 58, 60–2, 144, 273–5
- deposit status, *see* formation processes
- deposits, 16–18, 38  
 defining limits, 110–12, 146, 149, 150  
 description, 49, 78, 81, 116, 144, 286, 289;  
 checking, 236–8; colour, 175–7; compaction, 178–80; inclusions, 180–1; particle size, 177–8, Figure 18; surface detail, 134, 143, 181–3, 278; tidying, 243  
 micromorphology/sedimentology, 33, 81, 111, 116, 173–5, 251, 259, 262, 269, 278  
 recording, 114–17, 117–18, 120, 133–4, Figures 8, 17  
*see also* stratigraphy; trowelling methods
- desktop studies, 50
- display of site, 66, 69–73, 282–5, Plate 9
- divoting, *see* shovel test pits
- documentary history, 19, 38–9, 240, 266
- drawing techniques, *see* spatial record
- EDM, *see* surveying
- environmental facilities, 73–5, 108–9, 218, 222–3, 233, Plate 33
- evaluation of sites, 36, 60–2, 68, 76, 101, 168, 214, 218, 230–2, 273–5, *see also* deposit modelling  
 trenches, 58–60, Plate 7
- Evans, Sir John, 16
- experimental archaeology, 38
- field-walking, 46–8, 274, 275, Figure 2
- finance/funding  
 administration, 67–8  
 future prospects, 290  
 help-in-kind, 66–7  
 sources/sponsors, 65–6, 76, 126
- finds  
 analysis, 75, 211, 234, 252, 264  
 contamination, 233  
 excavating groups, 212–16  
 measuring-in (piece-plotting), 49, 150–2, 277–8, Plate 24  
 presence/absence, 232–3  
 processing, 75–6, 237  
 retrieval/recovery, 57, 75, 107–9, 149, 221–4, 229, 274, *see also* screening  
 sampling strategies, 218–21  
 typology, 9
- formation processes, 38, 73, 120, 144, 146, 150, 173, 247–53, 269, 281, *see also* deposits,

## Index

309

- description and micromorphology; transformations of the archaeological record
- Frere, John, 16
- gender archaeology, 268–9
- Geoffrey of Monmouth, 8
- Geographical Information Systems (GIS), 272, 274–5, 279, 281, Plate 36
- geography, 38
- geology, 16–18, 19, 66, 185, 209, *see also* deposits, micromorphology
- geophysics
  - data manipulation and presentation, 21, 274
  - dowsing, 52, 70
  - magnetometry/magnetic susceptibility, 52, Figure 2
  - radar, 21, 22, 52, 273–4, Plate 6
  - resistivity, 51–2
- Glastonbury, Somerset, 8
- grave goods, 151, 199, 206
- Greenwell, Canon William, 13
- ground-based remote sensing, *see* chemical mapping; geophysics; vegetation surveys
- Hen Domen, Powys, 13
- heritage management, *see* cultural resource management
- Heslerton Parish Project, North Yorkshire, 78, Plates 32, 35, 36
- Hippias Maior, 8
- Hodge, Henry, 19, plate 3
- Hope-Taylor, Brian, 134
- Hoxne, Suffolk, 16
- individualism, 10–15
- information technology, *see* computers
- inhumations
  - cremations, 207
  - legal and ethical considerations, 199–200, 207–8
  - skeletons, 74, Plates 31, 35; grave type, 204; lifting and storage, 206–7; photographic record, 122, 130, 201, 203, Plates 4, 23, 29; recording spatial configuration, 200–1; stratigraphic relationships, 205–6; written record, 201–4, Figure 24, Plate 30
  - see also* safety
- Institute of Field Archaeologists (IFA), 27–8
- interdisciplinary research, 36–9, 240, 278, 290
- Internet Archaeology*, 282, 283
- Jefferson, Thomas, 11
- Kennewick Man, 199–200
- Kenyon, Dame Kathleen, 15, 18
- landscape archaeology, 43, 268, 279, Plate 36
- Leland, John, 22
- London, 151, 192, Plates 3, 4, 9, 12, 22
- Lyell, Sir Charles, 17, 19
- Maiden Castle, Dorset, 13, 18, 69, Plate 2
- Marx, Karl, 10, 18
- masonry features
  - articulation, 187–9, Figure 20
  - building materials, 185–7
  - contemporary ground surface, 190–2, Plate 27
  - masons' marks, 190
  - mortar, 189–90
  - recording sheet, Figure 19
  - reused stone, 190
  - working/finishing, 187, Figure 20
- matrix, *see* stratigraphy, representing
- metal detectors, *see* finds, retrieval/recovery
- Mortimer, John, 13
- Munsell charts, *see* deposits, colour
- Museum of London Archaeology Service, 282
- National Parks Data Base (NADB), 271
- New Archaeology, 24, 40, 221
- New York, 200
- North American Graves Protection and Repatriation Act (NAGPRA), 200
- Owen, George, 17
- Oxford Archaeological Unit, 282
- pedestrian survey, *see* field-walking
- Petrie, Sir William Matthew Flinders, 13
- phosphate survey, *see* chemical mapping
- photographic record
  - captioning, 242
  - digital cameras, 134, 278
  - facilities, 79
  - infrared, 51
  - phase, 125
  - photogrammetry, 75, 129, 190
  - preparation techniques, 126–8, Plate 21
  - publicity shot, 126
  - record shot, 125–6
  - relationship between stratigraphic units, 122–5, Plates 19, 20
  - single stratigraphic unit, 122, Plate 18
  - video, 130–2
  - within a stratigraphic unit, 120–2
  - within standing buildings, 128–9, Plate 22
  - see also* aerial photography; inhumations; timber recording
- piece-plotting (of finds), *see* finds, measuring-in
- Pitt-Rivers, General Augustus (né Lane-Fox), 13, 17–18, 23
- planning, *see* spatial record
- ploughing, 46, 48, 272
- Pompeii, 9
- post-processualism, 78, 268–70, 278, 285
- Prestwich, Sir Joseph, 16
- problem orientation, 35–6, *see also* research design
- professionalisation, 23–9, 82, 289, Plates 4, 8
- reconnaissance, 271–3, *see also* aerial photography; field-walking; shovel test pits
- recovery levels, 112, 231, 286
- Renaissance, 8–9, 23
- research design/agenda, 11, 63, 68, 111, 260, 268, 276, Figure 1
- fluidity of 36, 234

## 310 *Index*

- research design/agenda (*cont.*)  
 nested research design, 54, 66, 214  
 photographic recording, 119, 122  
 plan drawing, 134, 136  
 stratigraphic distinctions, 230  
*see also* interdisciplinary research
- Roach-Smith, Charles, 19  
 Rudbeck, Olof, 17  
 Runnymede, London, 150
- safety  
 access and movement, 88–9, 101  
 accident book, 89  
 burials, 90–2, 207, Plate 13  
 diseases, 86  
 facilities, 87–8  
 general arrangements, 69, 81, 82–4, 289, Plates 8, 11  
 hazardous materials (COSHH, MSD, asbestos), 87  
 insurance, 86  
 legislation (OSHA, H&S at Work Act), 84–6  
 live services, 86–7  
 plant and machinery, 67, 89, 95, 102  
 risk assessment, 85–6  
 safety consultant, 85–6  
 trade unions, 86  
 visitors, 71  
 watching briefs, 90  
 working within buildings, 90, Plates 12, 22  
 salvage operations, *see* watching briefs
- sampling, 34, 49, 59, 116, 233, 252  
 strategy, 38, 40–1, 68, 73, 75, 189, 281  
*see also* finds; screening
- Schliemann, Heinrich, 13, 23
- screening/sieving, 74, 107–9, 204, 206, 221–3, Plates 17, 33
- shoring, 104–5, Plates 16, 25
- shovel test pits, 48–9, 274
- sieving, *see* screening
- siteless surveys, 33, 49
- sites and monuments record (SMR), 44, 271, 272
- skeletons (human), *see* inhumations
- spatial record  
 checking/tidying, 235–6, 242–3  
 drawing conventions, 135–7  
 drawing equipment, 134–5  
 future development, 277–8  
 measuring techniques (triangulation, offsets, frames), 100, 141–3, Figure 9  
 sections, 143–50; baulks, 144–5; cumulative, 145–6, Plate 25, Figure 10; individually positioned/problem solving, 146–7, Figure 11; preparation techniques, 147–50  
 surface details/levels, 142–3  
 types of plan (top/daily, phase, single-context), 137–41, Figure 9  
*see also* finds, measuring-in; inhumations, skeletons; Geographical Information Systems
- spit excavation, 112, 150, 213–16, Plate 32, *see also* finds, excavating groups
- Spitalfields, London, 91, Plate 13
- spoil removal  
 conveyor belts and cranes, 102–3, Plate 15  
 dumper trucks, 102, 104, Plate 15  
 hoists, 102  
 spoil heaps, 68, 101
- Spon, Jacob, 9
- staff facilities, 68–82, 87–8, Plate 8, *see also* safety
- Stanwick, North Yorkshire, 13
- Steensberg, Axel, 13
- stratigraphy/stratification  
 analysis, 239–66, Figure 27; correlating between units, 247–50; grouping/phasing, 257–61; linking successive units, 246, 250–3; nodes and critical paths, 253–5; representing collection methods, boundaries, latitude and strata types, 255–7, Figure 28; role of on-site interpretations, 244–6  
 calculating relationships, 159–68; labelling on site, 161–3, Figure 15, Plate 26; overlaying plans, 163–8, 277, Figure 16; using sections, 159–61  
 checking relationships, 78, 236, 243  
 defining/distinguishing units, 61, 229–32, Figure 26  
 history of the concept, 11, 17–18  
 numbering units, 112–14  
 presenting interpretations: length of life, 264–5, Figure 30; phasing structure, 265–6, Figure 31; strengths of correlation, 262, Figure 29; types of interpretative units, 262–4, Figure 29  
 representing: ‘Carver’ diagram, 156; ‘Harris-Winchester’ matrix, 18, 78, 157–9, 276–7, Figures 12, 13, 14  
 types of relationship, 153–6  
*see also* deposits, defining limits; photographic record, relationships between units, within a unit; spatial record
- Streno, Nicolaus, 17
- Stukeley, William, 11, 22
- surveying  
 bench marks, 99  
 Electronic Distance Measuring (EDM), 80, 96, 98, 152, 278, Plate 24  
 facilities, 79–80, 277  
 Global Positioning Systems (GPS), 96  
 site grids, 95–101, Figures 6, 7  
 Sutton Hoo, Suffolk, 54, 61, 128, Plate 31, Figure 3
- Thomsen, Christian, 17
- timber recording, 192–9, 278, Figure 22
- assembly marks, Plate 28  
 conversion methods/carpentry, 196, Figure 23  
 photography, 196, 197  
 recording conditions, 198  
 reuse, 198  
 shrinkage, 198  
 surface characteristics, 197  
 technical terms, 193, 197  
*see also* conservation; dendrochronology
- total excavation, 31–4
- transformations of the archaeological record, 38, 46, 144, 219, *see also* formation processes
- trowelling methods, 227–9, Plate 34
