

INDEX

- adjoint representation 37
- affine variety 14
- algebraic group 24
- algebraic semigroup 18
- archimedean semigroup 7

- big cell 113, 158
- biordered set 121
- Borel subgroup 28
- Bruhat decomposition 35

- center 27, 48
- centralizer 27, 48
- character 31, 80
- closed set 12
- completely regular semigroup 6
- completely simple semigroup 4
- completely 0-simple semigroup 4
- congruence 1
- conjugate 27, 48
- connected semigroup 42
- connected group 27
- constructible set 13
- Coxeter group 40
- cross-section lattice 89

- diagonal monoid 80
- dimension 15
- dominant morphism 12
- Dynkin diagram 41

- \mathcal{E} -structure 109

- face lattice 80
- finite morphism 156
- fundamental congruence 10
- fundamental regular semigroup 10

- Green's relations 2

- height 60, 97
- homomorphism 1, 18

- ideal 4
- idempotent separating 9
- identity component 27, 42
- inverse of an element 1
- inverse semigroup 10
- involution 1
- irreducible component 13

- \mathcal{J} -co-irreducible 146
- \mathcal{J} -irreducible 146
- \mathcal{J} -linear 146

- kernel 14

- left centralizer 48
- Levi factor 36
- local semilattice 126, 128

- monoid 1
- morphism 12
- Munn semigroup 10

- Nambooripad semigroup 124
- nearly semisimple group 147
- nearly simple group 147
- normal variety 156
- normalizer 27, 48

- opposite Borel subgroups 36
- opposite cross-section lattice 94
- opposite parabolic subgroups 36
- opposite type 39, 130

- parabolic semilattice 126
- parabolic subgroup 28
- polytope 80
- projective variety 16

- quasi-projective variety 16
- radical 33
- rank 33
- reductive group 33
- Rees factor semigroup 7
- reflection 38
- regular \mathcal{J} -class 4
- regular semigroup 1
- Renner monoid 109
- right centralizer 48
- root subgroups 38
- root system 37, 40
- sandwich set 74, 121
- semilattice union 6
- semisimple rank 33
- semisimple group 33
- simple algebraic group 33
- simple reflections 38
- strongly π -regular semigroup 1
- symmetric inverse semigroup 10
- Tits building 135
- Tits system 133
- torus 28
- type 39, 130
- unipotent group 30
- unipotent radical 33
- unit regular 1
- weak cross-section lattice 89
- Weyl group 32, 133
- weight, weight space 37
- width 62
