

INDEX

- A**, analytic functions, 30
 Abel limit theorem, 20
 Abel matrix, 227
 absolute convergence, 15
 in a normed space, 105
 absolute homogeneity, 82
 absolutely convex set, 79
 absorbent set, 79
 Ahlfors, L., 17, 110
 Airy equation, 204
 AK property, 218
 Alaoglu's theorem, 149
 algebra
 normed, Banach, 153
 disc, 154
 division, 155
 matrix, 154
 algebraic complement, 84
 algebraic direct sum, 84
 algebraic dual, 112
 analytic function, 17
 analytic vector-valued function, 139
 antisymmetric relation, 9
 arithmetic means, 216
 Arzelà–Ascoli theorem, 235
 axiom
 of choice, 10
 of upper bound, 12

 $B(X, Y)$, 113
 $ba(N)$, 118, 229
BK space, 217
 BV , sequences of bounded variation, 32
 Baire category theorem, 66
 balanced set, 79
 Banach, S., 55
 Banach algebra, 153
 Banach fixed point principle, 55
 Banach limit, 140
 Banach space, 104
 Banach's theorem, 130
 Banach–Steinhaus theorem, 123
 base, Hamel, 74
 basis
 monotone, 101
 Schauder, 98
 shrinking, 121

Bessel's inequality, 177
 bidual of a normed space, 137
 bijective map, 7
 Borel, E., matrix, 226
 bounded linear operator, 110
 bounded variation, 229, 232
 bounded sequences, l_∞ , 13, 29, 104
 bounded set, 39

 c , convergent sequences, 13, 26, 29, 104
 c_0 , null sequences, 15, 29, 104
 C , complex numbers, 1
 C^n , 26, 71, 80, 93, 173
 $C[0, 1]$, continuous functions, 28
 $C(K)$, 62
 canonical map, 85
 Cantor, G., 1
 Cartesian product, 5
 category of a set, 65
 Cauchy, A. L., 33
 Cauchy principle, 14
 Cauchy sequence, 14, 33
 Cauchy theorem, 17
 centre
 of a sphere, 39
 of an algebra, 160
 Cesàro matrix, 216
 characteristic function, 230
 characteristic of a conservative matrix, 227
 closed graph theorem, 130
 closed set, 42
 closed sphere, 42
 closure of a set, 43
 coefficient functionals, 101
 commutative algebra, 153
 compact operator, 183
 compact set, 60
 complement of a set, 4
 complete metric space, 35
 complete subset, 108
 completeness axioms, 33
 completion, 37, 38
 complex linear space, 69
 complex multiplication, 154
 complex numbers, 12
 composition of functions, 9
 conservative matrix, 222

conservative space, 223
 continuous function, 17, 48, 50
 dual space, 113
 contraction mapping, 55
 convergence domain, 223
 convergent sequences, c , 13, 26, 33, 51
 in a metric space, 33
 convergent series, γ , 15, 32
 in a normed space, 105
 convex function, 79
 convex hull, 85
 convex set, 79
 convolution, 157
 countability of \mathcal{Q} , 8
 countable set, 8
 cover for a set, 3
 Crone, 227

 De Morgan's laws, 4
 dense set, 45
 diameter of a set, 39
 differential equation, 193
 dimension, 74, 76
 Dirichlet, P. G. L., 126
 disc algebra, 154
 discrete topology, 46
 disjoint sets, 3
 distance between sets, 39
 divergent series, 15
 division algebra, 155
 domain of a relation, 5
 dual space, 113
 table of, 118

 eigenspace, 187
 eigenvalue, 162
 empty set, \emptyset , 2
 Enflo, P., 101
 equicontinuous, 235
 equivalence class, 6
 equivalence relation, 5
 equivalent normed spaces, 115
 equivalent sets, 7
 error function, 196
 Euclidean n -space, R^n , 26, 70

 factorspace, 78
 Fatou's lemma, 237
 fermé, 40
 finite dimensional space, 74
 finite sequences, Φ , 84
 finite set, 8
 finite subcover, 59
 first category set, 65
 first-order differential equation, 195
 FK space, 217
 Fourier coefficient, 177
 Fourier expansion, 179

Fréchet, M., space, 96
 Frobenius, G., 156
 function, 6
 algebra, 154
 functional, 109

 γ , convergent series, 15
 gauge, 83
 gebiet, 40
 Gelfand–Mazur theorem, 165
 general convergence principle, 15
 Gershgorin's inequality, 191
 Gram–Schmidt theorem, 175
 graph of a function, 6, 130
 greatest lower bound, 12
 Green's function, 203

 H , algebra of quaternions, 156
 Hahn, H., 132
 Hahn–Banach theorem, 133
 Hamel base, 74
 Hamilton, W. R., 156
 Hardy, G. H., 217
 Hausdorff, F., 24
 Hausdorff postulates, 24
 Hausdorff space, 47
 Heine–Borel theorem, 59
 Hilbert, D., 172
 Hilbert space, 173
 Hölder's inequality, 21
 homeomorphism, 53
 homomorphism, 157
 hyperplane, 119

 I , integral functions, 31
 ideal, 160, 167
 identity of an algebra, 153
 image, 8
 indiscrete topology, 46
 induced topology, 48
 inequalities, 20
 infimum, 12
 infinite dimensional space, 74
 injective map, 7
 inner product space, 172
 integers, Z , 1
 integral equation, 57, 200
 integrating factor, 195
 interior of a set, 43
 intersection of sets, 2
 interval, 3
 inverse element in an algebra, 155
 inverse function, 7
 inverse image, 8
 isometry, 54
 isomorphism
 linear space, 71
 algebra, 158
 inner product, 173

INDEX

241

- kernel, 109
Kojima–Schur theorem, 222
- $L[0, 1]$, Lebesgue integrable functions, 28
 $l_\infty, l(p), l_p$, 29, 30
 $L_p[0, 1]$, 236
 $L(X, Y)$, 112
least upper bound, 12
Lebesgue constants, 126
Legendre polynomials, 176
lim inf, lim sup, 13
limit, 13, 33
 upper and lower, 13
limit point, 42
linear combination, 74
linear dependence, 74
linear functional, 109
linear hull, 73
linear independence, 73
linear isomorphism, 71
linear map, 71
linear metric space, 90
linear operator, 109
linear space, 69
linear subspace (manifold), 73
linear topological space, 93
line segment, 79
Liouville's theorem, 17
 generalized, 139
locally convex, 94
lower bound, 10
lower limit, 13
lower semicontinuous function, 51, 52
- $M^n, n \times n$ matrices, 154
Maddox, I. J., 37, 108
map, mapping, 6
matrix transformation, 215
maximal element, 10
maximal ideal, 167
maximal proper subspace, 119
Mertens' theorem, 227
metric space, 24
 complete, 35
 linear, 90
metrizable space, 47
minimal element, 10
Minkowski gauge, 83
Minkowski inequality, 21
Moment problem, 140
Morera's theorem, 17
multiple eigenvalue, 187
multiplicative, 157
- N , positive integers, 1
neighbourhood (open sphere), 39, 93
nesting principle, 44
nest of spheres, 44
- Neumann, J. von, 172
Neumann series, 200
nonlinear eigenvalue problem, 202
norm, 103
 of a bounded operator, 114
normal form, 195
normed algebra, 153
normed factorspace, 106
normed linear space, 103
nowhere dense set, 45
- one–one, correspondence, 7
one–one map, 7
onto map, 7
open cover, 59, 60
open mapping, 53
open mapping theorem, 128
open set, 40, 46
open sphere, 39
operator, 6
 linear, 109
ordered pair, n -tuple, 4
ordinary differential equation, 193
orthogonal set, 174
orthogonal sum, 182
orthonormal set, 174
- parallelogram law, 175
paranorm, paranormed space, 92
Parseval's theorem, 178
partial order, 9
 p -normed space, 103
pointwise limit, 17
positive, integers, N , 1
positive operator, 191
pre-Hilbert space, 172
proper subset, 2
- Q , rational numbers, 1
quaternions, H , 156
quotient, group, 78; algebra, 160
- R , real numbers, 1
 R^2 , as a Banach algebra, 154
 R^n , 26
radical of an algebra, 160
radius of a sphere, 39
range of a relation, 5
rational numbers, Q , 1
reflexive relation, 5
reflexive space, 138
regular point, 161
relation, 5
restriction of a function, 7
Riemann–Stieltjes integral, 232
Riesz, F., 231
Riesz–Fischer theorem, 178
Riesz–Fréchet theorem, 182
Riesz representation theorem, 232

242

s , space of all sequences, 29, 90
 scalar, 69
 scalar homomorphism, 158
 Schauder basis, 98
 Schur's theorem, 223
 Schwarz' inequality, 172
 second category set, 65
 second-order differential equation, 193
 semicontinuous function, 51
 semimetric space, 27
 seminorm, 82
 separable space, 45
 sequence, 13
 sequential compactness, 62
 sequential continuity, 51
 series, 15
 in a normed space, 105
 set, 1
 sgn , 116
 Silverman–Toeplitz theorem, 221
 simple eigenvalue, 187
 simple sequence, 228
 singular point, 195
 solution in series, 200
 span, 73
 spectrum, 161
 spectral radius, 166
 sphere, 39
 strong convergence, 142
 strong Cesàro summability, 108
 Sturm–Liouville expansion, 211
 Sturm–Liouville problem, 205
 subadditive, 82
 subcover, 3
 submultiplicative, 153
 subset, 2
 subspace of a linear space, 73
 summability field, 223
 superset, 2
 support of a function, 72
 supremum, 12
 surjective map, 7
 symmetric operator, 183
 symmetric relation, 5

 table of dual spaces, 118
 Tauberian theorems, 167

INDEX

Toeplitz, O., 215
 Toeplitz matrix, 216
 topological space, topology, 46
 linear, 93
 topological sum, 131
 totally bounded set, 62
 totally ordered field, 12
 total-order relation, 9
 total set, 178
 transformation, 6
 transitive relation, 5
 translation invariant, 87
 triangle inequality, 20
 trivial metric, 25

 uncountability of \mathbb{R} , 11
 uncountable set, 8
 uniform boundedness principle, 67
 uniform Cauchy sequence, 18
 uniform continuity, 49
 uniform convergence, 18
 union of sets, 2
 unit, in an algebra, 155, 161
 unit matrix, 155
 unit sphere, 104
 unit vectors, 75, 99
 universe of discourse, 1
 upper bound, 10, 12
 upper limit, 13
 upper semicontinuous function, 51

 vectors, 69
 Volterra, V., 200

 weak convergence, 144
 weak topology, 143
 weak star topology, 147
 weakly complete, 152
 Weierstrass M -test, 19
 well-ordering principle, 10
 Wiener, N., 167

 X^\dagger , X^* , 112, 113

 \mathbb{Z} , integers, 1
 Zeller, K., 217
 Zorn's lemma, 10
