

INDEX

All names mentioned in the text and substantive footnotes, as well as selected subjects, are noted here. Important contributions are listed by topic; significant discussions are indicated by boldface numbers. References to authors cited in the bibliography are in italic type. Discussions that extend well beyond the page cited are marked here by “ff”, but no attempt has been made to index subsequent page numbers for topics that extend simply to the next page.

- Abraham, Henri (1868–1943), *309*
 Abraham, Max (1875–1922), 64, 105, **111**, 153, *309*
 absorption coefficient, 79, 253
 aether: Campbell’s, 142; properties, 9; Thomson’s, 140
 Åkesson, Nils, 305, *309*
 Allen, Lini, 326
 Allen, Samuel James (1877–1966), *309*
 alpha (α) rays, 16, 52, 55, 83
 Andrade, Edward Nevelle da Costa (1887–1971), 224, 231, *309*, *336*
 Ångström, Knut (1857–1910), 65, *309*
 anomalous dispersion, 30
 Aschkinass, E., 325
 Ashworth, J. R., 58, *310*
 Bacon, Francis (1561–1626), 223
 Badash, Lawrence, *310*
 Baeyer, Otto von (1877–1946), 221, 245, *310*
 Barkla, Charles Glover (1877–1944), 135, 139, 190, 203, 205, 212, 213, 253–54, 257, 260, 265, *311*; and Bragg, 94ff; education, 44; on homogeneous x-rays: characteristic, 100, discovered, 93, two components, 101; neutral-pair hypothesis, 95; and Stark, 119; on x-rays: absorption, 80, 256ff, characteristic, 100, elements’ response, 91, polarization, 45, rejects quantum theory, 256, secondary, 45
 Barnes, Howard Turner (1873–1950), *336*
 Barnes, James (1878–1962), *336*
 Bartlett, A., *311*
 Bassler, Eugen, 126, *311*
 Bateman, Harry (1882–1946), *311*
 Beatty, R. T. (1882–1941), 242, 244, *311*
 Becquerel, Henri (1852–1908), 245, *311*; γ rays’ effect, 54; and

348 *Index*

- Becquerel, Henri (*cont.*)
 Paschen, 62; on radioactivity, 49;
 and Villard, 54; on x-rays, 20, 21
- Becquerel rays, 49ff
- Benoist, L., 312
- beta (β) rays, 16; *e/m* of, 52; and γ
 rays, 152; spectroscopy, 62,
 244ff, 265ff, 273
- Birge, Raymond Thayer (1877–1980),
 312
- Black, D. H., 312
- black light, 16
- Blondlot, René (1849–1930), 46, 312
- Bohr, Niels (1885–1962), xii, 4, 180,
 193, 215, 227, 297, 300, 307,
 312; Nobel prize, 280ff; opposes
 lightquantum, 281
- Bohr theory of atom, 215, 223, 269,
 297; as attraction for mathemati-
 cal physicists, xvii, 4, 193; and
 L. de Broglie, 292; and dispersion
 of light, 281; and Rutherford's
 view of γ rays, 273; and triggering
 hypothesis, 193; and x-ray
 photoeffect, 267
- Boltwood, Bertram B. (1870–1927),
 226
- Boltzmann, Ludwig (1844–1906), 18,
 107, 312
- Born, Max (1882–1970), 302, 312
- Bose, Satyendra (1894–1974), 299,
 312
- Bothe, Walther (1891–1957), 278,
 298, 313, 321
- Bragg, William Henry (1862–1942),
 xi, 2, 61, 81ff, 89, 94ff, 135, 137,
 139, 148, 190–1, 199, 208, 213,
 265, 278, 306, 313; on α -particle
 range, 83; and Barkla, 94ff;
 delimits waves and particles, 82;
 on dualistic theory, 180; educa-
 tion, 81; on γ rays: and secondary
 electrons, 97ff, particulate, 82ff,
 stimulate one electron, 160;
 neutral-pair hypothesis, 87; on
 paradox of quality, 85; on
 paradox of quantity, 84; criticizes
 Sommerfeld, 150, 164, 183; on
 x-rays: absorption law, 253,
 particulate, 85, finds secondary
 peaks, 210
- Bragg, William Lawrence (1890–
 1971), 213, 313, 314; on x-ray
 interference, 208
- Bragg–Peirce law, 253
- Breit, Gregory (1899–1981), 279, 314
- Bremsanteil* x-rays, 127
- Bremsstrahlung*, 202, 216, 219
- Breton, Jules Louis, 266
- Bridgman, Percy Williams (1882–
 1961), 314
- Brillouin, Léon (1889–1969), 314
- Brillouin, Marcel (1854–1948), 287,
 291, 293, 314
- Brizard, Léopold, 274
- Brogie, Louis de (1892–1987), xii,
 xv, xxiii, 4, 263, 267, 299, 314,
 316; education, 274; on electron
 diffraction, 294, 304; and
 lightquantum, 286ff; Nobel prize,
 305; and phase waves, 289ff
- Brogie, Maurice de (1875–1960), xi,
 224, 263, 271, 280, 306, 315,
 327; and L. de Broglie, 274ff; and
 lightquantum, 269, 277, 284;
 Solvay congress, 264, 276; and
 x-ray photoeffect, 266ff
- Bronson resistance, 145
- Brunhes, Bernard, 316
- Buchwald, Eberhard (1886–1975),
 162, 316
- Buisson, Henri (1873–1944), 316
- Bumstead, Henry Andrews (1870–
 1920), 316
- Burbidge, P. W., 316, 327
- Cabrera, J., 316
- Campbell, Norman Robert (1880–
 1949), 183, 316; on fluctuations,
 148, 160, 163; on photoelectric
 effect, 142ff
- canal rays, 16, 56
- Carnot, Adolphe, 266
- Carvalho, Emmanuel (1856–1945),
 42, 316
- Cassidy, David, 316
- cathode rays, 5ff
- Chadwick, James (1891–1974), 229,
 231, 274, 316, 336
- characteristic: γ rays *cum* x-rays, 220;
 x-rays, 100ff

Index

349

- chemical rays, 9
 Cherwell, *see* Lindemann
 Chwolson, *see* Khvol'son
 Compton, Arthur Holly (1892–1962), ix, 4, 283, 305, 316
 Compton effect, 283ff
 Compton, Karl Taylor (1887–1954), 188, 236, 317, 334
 Cooksey, Charlton Downs, 99, 235, 317
 Coolidge, William David (1873–1975), 249, 317
 Copenhagen interpretation of quantum mechanics, 307
 Des Coudres, Theodore (1862–1926), 317
 Crookes, William (1832–1919), 6, 317
 Curie, Marie Skłodowska (1867–1934), 50ff, 56, 317
 Curie, Pierre (1859–1906): deflection of α - and β -rays, 51ff, 317
- Danysz, Jean (1860–1928), 246, 259, 318
 Darwin, Charles Galton (1887–1962), 199, 251, 332; on x-rays, 212ff
 Dauvillier, Alexandre Henri (1892–1979), 265, 315, 318, 327
 Davisson, Clinton Joseph (1881–1958), 304, 318
 Debye, Peter Joseph (1884–1966), ix, 200, 283, 318; on Compton effect, 285; on lattice point vibration, 217; on photoelectric effect, 181ff, 185
 delta (δ) rays, 88
 diffraction of impulses, 22, 31ff
 discharge rays, 16
 dispersion of light, 282, 298
 Donath, B., 318
 Dorn, Ernst (1848–1916), 318; energy of x-rays, 72; velocity of x-ray photoelectrons, 73, 85, 112
 doubly directed impulse, 23, 205
 Drude, Paul (1863–1906), 319
 Duane, William (1872–1935), 250, 257ff, 318, 319
 Duane–Hunt law, 251
- Eckart, Carl Henry (1902–1973), 319
- Edison, Thomas Alva (1847–1931), 319
 Ehrenfest, Paul (1881–1933), 109, 207, 279
 Einstein, Albert (1879–1955), ix, xii, xvi, 105ff, 176, 195, 276, 278ff, 297, 307, 319; Bragg's ignorance of, 90; and lightquantum hypothesis, 106ff, 278; Nobel prize, 280, 305; on photoelectric delay time, 184; and Stark, 118ff, 121, 130
 Eisberg, Robert, 320
 electric discharge, 5, 76
 electromagnetic world view, 6ff, 104ff
 Ellis, Charles Drummond (1895–1980), 231, 284, 320, 336; on γ -ray photoeffect, 270ff
 Elsasser, Walter M. (1904–), 304, 320
 Elster, Julius (1854–1920), 320
 Emden, Robert (1862–1940), 320
 energy accumulation, 173ff, 183
 Epstein, Paul Sophus (1883–1966), 193, 320
 equipartition theorem, 171
 Eve, Arthur Stewart (1862–1948), 320; on γ -rays, 67; on x-rays, 59; and Paschen, 62
- Fabry, Charles (1867–1945), 316
 Fajans, Kasimir (1887–1975), 225
 Faraday's experiment, 30
 Faxén, Hilding (1892–1968), 320
 Fermat's principle, 293ff
 FitzGerald, George Francis (1851–1901), 20
 Fizeau's experiment, 30
 Florance, D. C. H., 221, 320
 fluctuations: in γ -ray ionization, 147ff, 160ff; in photoelectric effect, 145; in radioactive decay, 143
 fluorescent x-rays, 103, 190, 202; *see also* characteristic rays
 Fomm, L., 320
 Forman, Paul, 320, 326, 333
 Fourier series: of singly directed impulse, 34ff; and indeterminacy principle, 303

350 *Index*

- Franck, James (1882–1964), 151, 305, 321
 Franck–Hertz experiment, 233
 Frank, Philipp (1884–1966), 321
 Friedman, Robert, 321
 Friedrich, Walther (1883–1968), 200, 203, 218, 224, 321
 Frilley, Marcel, 321
 Füchtbauer, Christian (1877–), 321

 gamma (γ) rays: and x-rays, 16, 61, 65, 222; asymmetry of, 155; characteristic, 221ff, 229, 270; discovered, 53ff; divorced from x-rays, 231; named, 56; photoelectric effect, 271
 Gehrenbeck, Richard K., 321
 Gehrtz, A., 310
 Geiger, Hans (1882–1945), 144, 163, 278, 298, 313, 321, 336
 Geitel, Hans (1855–1923), 320
 General Electric, 249
 George, André, 321
 Gerlach, Walther (1889–1980), 331
 Germer, Lester (1896–1971), 304, 318
Gespensterfeld, 299
 Giesel, Friedrich Oskar (1852–1927), 51, 321
 Gifford, J. W., 321
 Glasson, J. L., 313
 glowworms, 16
 Gocht, Hermann, 322
 Godlewski, Tadeusz (1878–1921), 220, 322
 Goldstein, Eugen (1850–1930), 322
 Golitsyn, Boris Borisovich (1862–1916), 19, 325
 Gouy, Louis Georges (1854–1926); 21, 40, 209, 322
 Gray, Joseph Alexander (1884–1966), 221, 322
 Green, George (1793–1841), 21, 322
 Guillaume, Charles Edouard (1861–1938), 322

 Haga, Hermann (1852–1936), 31, 201, 322
