<i>Preface</i>	xiii
<i>Acknowledgements</i>	xvi
I The ecology of Antarctic fish	1
1 Introduction	3
2 The evolution of the fish fauna of the Southern Ocean	7
2.1 Palaeontological history in the light of geology and palaeoclimatology	7
2.2 Factors producing faunal change	10
2.2.1 Low water temperature	10
2.2.2 Habitat limitation	11
2.2.3 Trophic factors	12
3 The composition of the fish fauna	13
3.1 Pelagic fish fauna	13
3.2 Bottom fish fauna	15
4 Classification of the Notothenioidei	20
4.1 Classification and description of the Notothenioidei	20
4.2 Species, subspecies and population identity	23
5 Geographical and bathymetric distribution of the fish fauna	33
5.1 Geographical distribution	33
5.1.1 The pelagic fish fauna	33

viii *Contents*

5.1.2 The coastal fish fauna	34
5.2 Zoogeography	36
5.3 Bathymetric distribution	39
5.3.1 The pelagic fish fauna	39
5.3.2 The coastal fish fauna	40
5.3.3 The deep-sea bottom and benthopelagic fish fauna	41
5.4 Mesoscale distribution of the coastal fish fauna	41
6 Adaptations to the environment	44
6.1 Freezing resistance	45
6.2 Renal retention	50
6.3 Buoyancy	51
6.4 Oxygen transport and blood physiology	52
6.5 'White-blooded' fishes	58
6.6 Metabolic cold adaptation	63
6.7 Enzyme properties and protein synthesis	65
6.8 Neurophysiology	68
6.9 Swimming and muscle function	69
6.10 Concepts of cold adaptation	74
6.11 Stenothermy	76
7 Reproduction and early life history	77
7.1 Annual gonad cycle and reproductive effort	77
7.2 Sexual dimorphism	79
7.3 Length and age at first spawning	80
7.4 Egg size	83
7.5 Fecundity	85
7.6 Spawning migrations	92
7.7 Spawning season and duration of spawning	92
7.8 Spawning grounds	93
7.9 Nest guarding	94
7.10 Detrimental effects of spawning	95
7.11 Incubation time	95
7.12 Development of eggs and larvae	96
7.13 Reproductive strategy and larval survival	100
7.14 Reproduction in non-notothenioid fish	103
8 Age, growth, mortality and biomass estimates	107
8.1 Size and age	107
8.2 Age and growth	109

<i>Contents</i>	<i>ix</i>
8.2.1 Problems in ageing and techniques utilized	110
8.2.2 The validity of ageing and implications for fish stock assessment	115
8.2.3 Growth	118
8.3 Natural mortality	125
8.4 Biomass estimates	128
9 The significance of fish in the ecosystem	132
9.1 Fish as predators	132
9.1.1 Food composition	132
9.1.2 Feeding behaviour	135
9.1.3 Prey size	136
9.1.4 Trophic ecology of coastal fish species	137
9.1.5 Food consumption	141
9.1.6 The significance of fish as predators	146
9.2 Fish as prey	148
10 Parasites	152
10.1 Ectoparasites	152
10.2 Endoparasites	155
11 Future research	160
II Antarctic fisheries	163
12 The commercially exploited species	165
12.1 Target species	165
12.2 Common by-catch species	165
12.3 Species irregularly taken	169
13 The development of the fishery	173
13.1 Historical fishing activities	173
13.2 Exploratory fishing	173
13.2.1 Shore-based activities	173
13.2.2 Offshore activities	176
14 Trends in the fishery	183
14.1 The Atlantic Ocean sector (FAO Statistical Area 48)	183
14.2 Trends in krill exploitation	189

x	<i>Contents</i>	
	14.3 The Indian Ocean sector (FAO Statistical Area 58) and the Pacific Ocean sector (FAO Statistical Area 88)	191
	15 Fishing grounds and fishing conditions	197
	15.1 The Atlantic Ocean sector	197
	15.2 The Indian Ocean sector	199
	16 Fish detection and catching methods	202
	17 Fishing fleet organization and operation	204
	17.1 The Soviet fishing fleet	204
	17.2 Fishing vessels of other states	206
	17.3 Fishing fleet operations	207
	18 Fishery products	209
	19 The development of fish stock assessment and fisheries management in the Southern Ocean	210
	19.1 SCAR and SCAR-related activities	211
	19.2 The Convention on the Conservation of Antarctic Marine Living Resources (CCAMLR)	212
	19.3 Catch statistics	217
	19.3.1 The development of a system for the reporting of catch and effort statistics	217
	19.3.2 The reliability of catch statistics	218
	20 The effect of fishing on single stocks	221
	20.1 South Georgia	222
	20.1.1 <i>Notothenia rossii</i>	222
	20.1.2 <i>Champscephalus gunnari</i>	224
	20.1.3 <i>Patagonotothen guntheri</i>	227
	20.1.4 <i>Gobionotothen gibberifrons</i>, <i>Pseudochaenichthys georgianus</i> and <i>Chaenocephalus aceratus</i>	229
	20.1.5 <i>Dissostichus eleginoides</i>	231
	20.1.6 <i>Electrona carlsbergi</i>	233
	20.2 The South Orkney Islands and Antarctic Peninsula region	234
	20.2.1 <i>Champscephalus gunnari</i>	234
	20.2.2 <i>Gobionotothen gibberifrons</i>	235
	20.2.3 <i>Notothenia rossii</i>	236

<i>Contents</i>	xi
20.3 Kerguelen Islands	237
20.3.1 <i>Notothenia rossii</i>	237
20.3.2 <i>Lepidonotothen squamifrons</i>	238
20.3.3 <i>Champsocephalus gunnari</i>	240
20.3.4 <i>Dissostichus eleginoides</i>	241
20.4 Ob and Lena Banks	242
21 Detrimental effect of krill fishing on recruitment	245
22 Effects of fishing and fishery-related activities on other components of the marine ecosystems of the Southern Ocean	247
22.1 Interactions of marine mammals and birds with fisheries	247
22.1.1 Benefits to marine mammals and birds from fishing operations	248
22.1.2 Competition with fisheries	248
22.1.3 Incidental mortality	249
22.2 The effect of bottom trawling on benthic assemblages	251
22.3 Attempts to introduce alien species to the Southern Ocean	252
23 Approaches to a more effective fisheries management in the Southern Ocean	255
23.1 Decision-making in CCAMLR	257
23.2 Towards a more effective management strategy	258
23.2.1 Single or multi-species approach?	258
23.2.2 Restoration of the stocks	260
23.2.3 The choice of a harvesting strategy	261
23.2.4 New and developing fisheries	262
23.2.5 Enforcement of conservation measures	263
24 Prospects for a future fish harvest from the Southern Ocean	265
Annex A	
1 Conservation Measures established by the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR) to regulate finfishing in the Convention Area	267

xii	<i>Contents</i>	
2	Resolutions adopted by the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR) to regulate finfishing in the Convention Area	280
	Annex B	
	Laws and regulations established by the Government of France to control fishing in the Exclusive Economic Zone of the French Southern Ocean and Antarctic Territories ('Terres Australes et Antarctiques Françaises')	284
	Annex C	
	Statement by the Chairman of the Conference on the Conservation of Antarctic Marine Living Resources	295
	<i>Glossary of terms</i>	297
	<i>References</i>	301
	<i>Index</i>	344
