

CONTENTS

The C_1 contractions B. Beauzamy	1
Factorization theorems for integrable functions H. Bercovici	9
Spectral decompositions and vector-valued transference E. Berkson and T. Gillespie	22
Vector-valued Hardy spaces from operator theory O. Blasco	52
Restricted invertibility of matrices and applications J. Bourgain and L. Tzafriri	61
The commuting B.A.P. for Banach spaces P. Casazza	108
The minimal normal extension of a function of a subnormal operator J. Conway	128
Two C^*-algebra inequalities G. Corach, H. Porta and L. Recht	141
The generalised Bochner theorem in algebraic scattering systems M. Cotlar and C. Sadosky	144
Differential estimates and commutators in interpolation theory M. Cwikel, B. Jawerth, M. Milman and R. Rochberg	170
A survey of nest algebras K. Davidson	221
Some notes on non-commutative analysis R. Kadison	243
Some remarks on interpolation of families of quasi-Banach spaces N. Kalton	258
An application of Edgar's ordering of Banach spaces L. Riddle	275
Martingale proofs of a general integral representation theorem H. Rosenthal	294
