

Index

Entries under personal names are arranged in chronological order; all other entries are in alphabetical sequence.

- alkaptonuria, 27, 32, 33, 41, 50
 Allen, Garland, 2, 27, 28, 33
 anti-Nazi sentiment, 120–125, 128, 130, 242, 243, 294
 antisemitism, 78, 84, 86, 177, 179, 242
 Aristotle, 253, 255
 Assmuth, J., 17, 18, 21
 Auerbach, Charlotte, 40
- Baggage, Charles, 9, 10, 305
 bacterial genetics, origins of, 63–64, 232
 bacterial viruses, 87, 120, 153, 154, 197
 Barnes, Barry, 13, 104–105
 Barthélemy-Madaule, 29
 Bateson, William
 and Garrod, 32, 39–44
 conflict with biometricians, 106–107
 on Mendel, 108, 109, 114–115, 299
 Beadle, George,
 Nobel Prize with Tatum and Lederberg, 2, 53, 55
 relations with Moewus's work, 2, 56, 98, 178, 191, 193, 203, 307
 on Garrod, 27–29, 33, 49–51, 299
 on one-gene–one-enzyme theory, 48–54
 work with Ephrussi, 58–60
 wartime research, 97–99
 on observer bias in genetics, 112–113
 on Moewus's work, 121–122
 relations with Sonneborn's work, 180
- and the Rockefeller Foundation, 196, 197, 206
see also Neurospora genetics; Tatum, Edward
- biochemical genetics
 origins of, 1, 2, 27–28, 31, 47–48, 55–56, 189–190, 203
 techniques of, 47–48, 83, 153
 biometricians, 106–107
 Birch, Arthur, 4
 work with Moewus, 211–214
 on chromatography anomalies, 214, 231–232
 confronts Moewus with fraud allegations, 215–216
 retraction, 216, 285–286
 meets Moewus in America, 238
 Bold, Harold, 233–234
 Bonner, David, 48, 52, 234
 Boyle, Robert, 117
 Brannigan, Augustine, 29, 30, 31, 105
 Bridges, C. B., 35, 43
 Bridgstock, Martin, 6, 7, 9
 Broad, William, 7, 11, 12, 24, 198
 Brodie, Harold, 228, 229
 Brush, Stephen, 302
 Burges, Alan, 211
 Burt, Cyril, 7
- California Institute of Technology, 48, 59, 60, 62, 123, 197
 Callender, L. A., 29, 105, 111
 Cambridge University, 160, 195
 Canguilhem, Georges, 29
 Carlsberg laboratories, 62
 Carlson, Elof, 154

334 *Index*

- carotenoids, 80–83, 89, 90, 96, 133, 134, 144, 147, 240, 261, 277
see also sex substances in
Chlamydomonas
- cell theory, 36–37
- Chapman, V. J., 216–217
- Chatton, Edouard, 125
- chemotaxis, 287
- Child, Charles Manning, 35–36, 38
- Chlamydomonas* genetics
 in Germany, 57, 70–74, 162–163
 in the United States, 121, 132–137, 160–174
- Chlamydomonas* life cycle, 69, 82
- Chlamydomonas moewusii* confusion
 with *eugametos*, 164–166
- chromatography, 214, 231–232, 258
- Cold Spring Harbor Laboratory, 5
- Cold Spring Harbor symposia
 (1941), 94, 96, 97
 (1951), 184–193, 202
- Collins, H. M., 10, 23, 118, 131, 309, 310
- Columbia University, 28, 172, 218–223, 262
- Commonwealth Scientific and Industrial Research Organization, 210–211
- Communist Party, 125
- cooking, 10
see also fraud
- Correns, Carl, 27, 30, 44, 54, 76
- counternorms, 13
see also norms of science
- creationists, 20
- Cuénot, Lucien, 42
- cytoplasmic inheritance, 1, 2, 92, 93, 99, 100, 146, 150, 180–183
- Czurda, V., 71, 165, 166, 253, 255
- Darlington, C. D., 63, 208
- Darwin, Charles, 104–105
- Darwinism, 20, 106–111
- Dauermodifikationen*, 67, 68, 93
- Davis, Bernard, 231–232, 233, 239
- Delbrück, Max
 criticisms of one-gene–one-enzyme theory, 52
 attitude to Moewus's work, 122–124
 and phage genetics, 123, 197
- Nobel Prize with Luria and Hershey, 123, 291
 criticisms of biochemistry, 124, 154
- Demerec, Milislav, 59, 184
- de Vries, Hugo, 27, 30, 54
- discovery, theory of, 27, 29, 30
 and fraud, 306
 multiple, 98
see also rediscovery
- discovery language, 136, 137, 163
- DNA, 152, 154, 233
- Dodge, B. O., 60
- Donovan, F. W., 213, 248
- Driesch, Hans, 42
- Drosophila* genetics, 47, 53, 58, 59, 98, 152, 184
- Drosophila* school, 27, 35, 40, 219, 220
- Dunn, L. C., 2, 39, 104
- Emerson, R. A., 59
- enzyme theory, 35, 46
see also gene theory
- Ephrussi, Boris
 on Nobel Prize decision, 53
 work with Beadle, 58–60
 on yeast genetics, 62, 181
 wartime activities, 125
 meets Moewus, 243
- Farben, I. G., 77
- Feigl, Herbert, 301
- Fisher, R. A.
 on Mendel, 12, 14, 103–115
 conflict with Bateson, 107–109
- flavonoid biogenesis, 211–213, 248, 261
- Fordham University, 264
- forgery, 9, 17
see also fraud
- Forman, Paul, 31
- Förster, H., and Wiese, L., 224, 225, 235, 256, 258, 261, 264, 277–279
- Forsythia*, 250, 284
- Frankel, Otto, 217
- fraud
 definitions of, 11–12
 as failed discovery, 306
 and the inheritance of acquired characteristics, 23, 183–184
 and objectivity, 12, 20
 and rhetoric, 20, 22, 23, 116
 and scientific method 15

Index

335

- and theory-ladenness of observations, 14, 18, 19
occurrence of, 6–11
- Galileo, 12, 14
gamones, 80, 95, 255, 256, 258, 278
Garrod, Archibald
 neglect accounts of, 27–32, 50, 51, 54, 299
 and Beadle, 27–29, 33, 49–51, 299
 on alkaptonuria, 32, 33
 and Bateson, 32, 39, 42
 on enzyme theory, 34, 35
gene, coined, 44
gene mutations, 47, 52, 62, 184
 see also presence–absence theory
gene theory, 28, 35, 41–46, 56, 58–64, 184
 one-gene–one-enzyme theory, 33, 37, 44–45, 48–54
 physiological criticisms of, 35–39
 and viruses, 154
 see also DNA; Mendelian theory
genotype, coined, 44
Gerloff, J., 165–166
German science, 125
Glass, Bentley, 31, 51
Goethe, J. W. von, 21, 71
Goldschmidt, Richard, 42, 43
Gould, Stephen, 7
Gowans, C. S., 121, 292
Granick, Sam, 173
Grell, Karl, 4, 234–238
- Haeckel, Ernst, 16–23
Haldane, J. B. S.
 and biochemical genetics, 43, 49, 85, 86
 and Philip on statistical criticisms of Moewus's results, 84–87, 88, 89, 95
Hamburg, Victor, 71
Hansen, F. B., 197
Hartmann, Max, 67
 theory of sexuality, 71–74
 controversy with biologists at Prague, 71–73
 relations with Moewus's experiments, 168, 201, 224
 Pomerat's views of, 200–201
 disclaims some of Moewus's results, 235–237
 dispute with Lewin, 251–260, 277–8
Harvard University, 5, 126
Hearnshaw, L. S., 7
Hertwig, Oscar, 69
Hertwig, Richard, 21
heterothallism, 253, 267
Hinreiner, E., 248–251, 271
“hired hands,” 6
hoaxing, 9
 see also fraud
Holton, Gerald, 12
homothallism, 253, 267
Hopkins, F. G., 33, 37, 45
Horowitz, Norman, 48, 186, 190–193
Hull, E. R., 17, 18, 21
human genetics, 39, 139
Huxley, J. S., 63, 107, 194, 202
- illustrations, scientific, 16–17
Indiana University, 92, 152, 153, 228–231
inheritance of acquired characteristics, 23, 183–84
Institut Pasteur, 125
- Jacob, François, 125
Jennings, H. S., 56, 91, 161, 177
Johannsen, Wilhelm, 107
John Innes Horticultural Institution, 85, 86
Johns Hopkins University, 60, 177
Jollos, Victor, 96, 179–180, 258
Judson, H. F., 2, 125–126
- Kaiser Wilhelm Institute for Biology, 67, 76
 see also Max Planck Institute for Biology
Kaiser Wilhelm Institute for Medicine, 76, 77, 142, 194
Kamin, Leon, 7
Kammerer, Paul, 3, 22, 183
Kaplan, Reinhard, 4, 223–225
Kay, Lilly, 88, 99, 122
Kimmelman, Barbara, 76
Kniep, Hans, 66, 67, 254, 258
Kobb, Liselotte
 early training as biologist, 65
 marries Franz Moewus, 65

336 *Index*

- Kobb, Liselotte (*cont.*)
 on moving to Kuhn's laboratory, 77–78
 on Beadle, 98
 on failure to send stocks to Lwoff, 129–130
 affiliation with Kuhn's laboratory, 142
 on family conditions in Germany after the war, 142–144
 on *Chlamydomonas* culturing techniques, 162, 215, 224, 273
 on Nobel Prize for Franz Moewus, 167, 168
 and fraud charges, 5, 6, 168, 215, 216, 237, 283
 trip to Australia, 210–211
 relations with Arthur Birch, 211, 213
 on copulation tests in Australia, 213–214
 on failed replications in Australia, 217
 on leaving Australia, 222
 on experimental witnesses at Columbia, 225–226
 on Woods Hole experience, 237
 on attempted replications at Columbia, 274
 last years of her life with Franz, 279–281
 retrained as virologist, 280–281
 remarries and returns to Germany, 281
- Koestler, Arthur, 3
 Kohler, Robert, 35, 43, 195
 Kohn, Alexander, 12
 Koyré, Alexandre, 14, 29
 Kuhn, Richard
 Nobel Prize, 57, 90, 94, 203, 213, 215, 308
 meets Moewus, 77–78
 work with Moewus, 80–83, 94, 144, 158, 224
 relations with Nazi Party, 141, 142, 200
 and Rockefeller Foundation, 198–200
 retraction, 284–285
- Lamarckism, 67
see also inheritance of acquired characteristics
- Latour, Bruno, 23, 137
 Lederberg, Joshua
 Nobel Prize with Beadle and Tatum, 2, 53, 291
 on political context of Moewus controversy, 5, 122, 243
 on Garrod, 35
 and bacterial genetics, 63–64, 161
 criticisms of Moewus's work, 130–131, 191, 193, 297
 at Woods Hole, 233
 Le Grand, H. E., 305
 Lewin, Ralph, 5
 reluctance to repeat Moewus's work, 160, 162
 on Pascher, 162–163
 criticisms of Moewus's work, 163, 164, 167, 169, 171
 on *Chlamydomonas moewussi*, 164, 166
 confronts Liselotte Moewus, 168
 dispute with Hartmann, 251–260, 298, 299
 refuses to attend conference with Moewus, 267
 suggests a book to be written on Moewus, 289, 290
 account of Moewus controversy, 293–295, 297, 308
- Lewis, D., 250
 Lindgren, Carl, 60, 181
 Loeb, Jacques, 38
 Ludwig, Wilhelm
 statistical criticisms of Moewus's data, 87, 88, 137, 158, 164
 asks Moewus to send stocks to colleagues, 195, 263,
- Luria, Salvador
 phage genetics, 123
 Nobel Prize with Delbrück and Hershey, 291
- Lwoff, André
 bacterial viruses, 120, 125
 Nobel Prize with Jacob and Monod, 125, 291
 nutrient requirements of microorganisms, 125–126
 criticisms of Moewus, 127–129, 264, 302
- Lysenko affair, 181–183, 290–291
- McCarthyism, 182, 206
 McClintock, Barbara, 59, 161

- Mainx, F., 71, 253, 255
 Malthus, Thomas, 104
 Mathews, A. P., 36
 Max Planck Institute for Biology, 200–202
 Medawar, Peter, 115–116
 Mendel, Gregor
 results statistically too good to be true, 3, 12, 84, 102, 110
 theory-ladenness of observations, 14, 15, 104, 112, 113, 118, 119, 203
 long neglect of, 27, 30
 and Garrod, 27, 49, 54
 and Moewus, 84, 102, 203
 defense of, 104, 105, 119
 relations to Darwinism, 106–111
 Mendelian theory, 27, 56, 58–64
 see also gene theory
 Merton, Robert K.
 norms of science, 8, 9
 fraud in science, 9
 counternorms, 13
 method, scientific
 fictional nature of, 15, 301–303
 see also rhetoric
 microbial genetics
 orgins of, 58–74, 189–190
 relations with classical genetics, 47–48, 184, 220–221
 Milikan, Robert, 12, 23
 Mill, J. S., 116
 Mitchell, M. B., 48
 Mitroff, I., 13
 Moewus, Franz
 priority in foundations of
 biochemical genetics, 1, 56, 57, 98, 120, 121, 146, 190, 203
 early life and scientific training, 65–67
 works with Kniep and Hartmann, 67
 provides evidence for relative sexuality, 68–74
 results conflict with those of biologists at Prague, 73
 difficulty in obtaining a continuing appointment in Germany, 75–77
 meets Kuhn, 77–78
 financial relations with Kuhn's laboratory, 78
 biochemical genetic studies with Kuhn, 78–83
 statistical criticisms of his genetic results, 85–88, 100–103
 biochemical criticisms of his results, 88–91, 193, 214, 231–232, 239
 replies to first statistical criticisms, 88
 early celebrations in the U.S., 90–96
 later perceived as Nazi in the U.S., 120, 122, 138, 243
 fails to send stocks to Lwoff, 128, 129
 work repeated by Smith, 131–138
 nonmember of Nazi Party, 138–140
 avoids draft in Germany, 141–142
 teaching position at University of Heidelberg, 142
 difficulties in obtaining research students after the war, 143
 suffers from stress and malnutrition, 144, 149
 admiration for Sonneborn's work, 145, 146, 149
 plans to abandon *Chlamydomonas*, 150
 genetic criticisms of his data, 157
 questioned in Stockholm, 167–168
 defended by Sonneborn, Cold Spring Harbor, 1951, 184–193
 plans to move to Australia, 187–188
 visits Darlington in England, 208
 work on flavonoid biogenesis in Australia, 210–218
 confronted with fraud allegations by Birch, 216
 failed demonstrations in Canberra, 217
 accepts invitation to Columbia University, 218
 arrives back in Germany, 224
 confronted with failed replications in Hartmann's laboratory, 224
 failed replications by Ryan at Columbia University, 226
 lectures at other universities in the U.S., 226–232
 lectures at Woods Hole, 233–234
 confronted by Grell, 235–238
 disclaimed by Hartmann, 235
 charged by Sager of rigging demonstration at Woods Hole, 239

338 *Index*

- Moewus, Franz (*cont.*)
 confronted by Davis, Ephrussi, and Sonneborn, 239
 dismissed as fraud, 239, 276, 281–290
 disclaimed by Sonneborn, 243–246
 loses job at University of Heidelberg, 264
 attempts to obtain job in the U.S., 265
 failed demonstrations in Ryan's laboratory, 268–275
 obtains modest job in Miami, 279–280
 dies in 1959, 281
 written out of history, 290–295
- Moewus, Liselotte, *see* Kobb, Liselotte
- Monod, Jacques, 125
- Moore, Elizabeth, 4, 218, 221
- Moore, John A., 4, 43, 218–222
- Morgan, T. H., 27, 35, 40, 42, 43, 200
 on gene theory, 45, 46
 Nobel Prize, 46, 291
- Morgan school, 46
- Mulkay, Michael, 13, 14
- Muller, H. J.
 on gene theory, 35, 43, 53
 Nobel Prize, 152, 291
 relations with biochemical genetics, 154–155, 180
- multiple discovery, 98
- Murneek, A. P., 90
- myth making, 25
- Nanney, D. L., 4, 93
- Naturphilosophie*, 71
- Nazi Party, 78, 138–140, 163
 Nazi accusations against Moewus, 120, 122, 130, 243, 293
see also anti-Nazi sentiment
- Neurospora* genetics, 48–53, 57, 58, 60–62, 92, 97–99, 155, 237
see also Beadle, George
- neurosporin, 98–99
- Newton, Issac, 12, 14, 23, 105
- Nobel prizes, 291
- norms of science, 8, 13–14, 20
- Nyborn, Nils, 169–170, 204
- Ockham's razor, 213
- Office of Scientific Research and Development, 97
- Olby, Robert, 2, 29, 105, 159
- Ondratschek, K., 95, 127–129, 254–257
- organization, organismic, 38–39
- Paramecium* genetics, 93
 relations with Moewus's work, 145–146, 150, 153
see also Sonneborn, T. M.
- Pascher, Adolf, 162, 163
- Patäu, Klaus, 87, 137, 158, 164
- Pauling, Linus, 197
- Pearson, Karl, 106–107
- phenotype, coined, 44
- Philip, Ursula, and Haldane, statistical critique of Moewus's work, 84–90, 95, 121, 127, 130, 137, 176, 308
- Pilttdown forgery, 3
- plagiarism, 12
- plasmagenes, 99
- Polyanyi, Michael, 118
- "polyketide hypothesis," 211–213
- Polytoma*, 73, 95, 127, 128, 254, 274
- Pomerat, Gerald, 198–202, 205, 207
- precursor, historical, 29, 31
- presence-absence theory, 40–41
- Pringsheim, E. G., 71, 95, 195, 254, 256–7
- "protoplasm," 35
- Provine, W., 106–107
- racism, *see* antisemitism
- Raper, John, 123, 193, 276–279
- Ravetz, Jerome, 118
- recapitulation theory, 16
- rediscovery, 27, 28, 31, 46, 49, 50, 54–55
see also discovery
- "relative sexuality," 71–74, 254, 258, 259, 260
- Renner, Otto, 286–289
- replication
 and disconfirmation, 23, 118, 309, 310
 of Moewus's claims, 131–138, 217, 224–226, 243–247, 250, 251, 256, 268–271, 309
 and reward system of science, 10, 132, 160–162, 169–170, 309
see also tacit knowledge; theory-ladenness of observations
- rhetoric, 15, 23–26, 46, 104
 and fraud, 20, 23

Index

- Smith, G. M., 121, 129, 132–137, 147, 198, 262, 264
- Social Darwinism, 104
- Sonneborn, Ruth, 1, 4
- Sonneborn, T. M.
 - on Beadle and Tatum's Nobel Prize, 53–54
 - on Mendel, 84–102, 203
 - early studies of *Paramecium* genetics, 92–93
 - on cytoplasmic inheritance, 92–93, 148, 150, 180–183
 - early reviews and criticisms of Moewus's work, 93–97
 - admiration for German protozoologists, 93, 177–180
 - on difficulties of evaluating Moewus's results, 102–103
 - Moewus's priority over Beadle and Tatum, 146, 155, 156, 192–193, 203
 - on Smith's confirmation of Moewus's results, 147, 148
 - Watson's views of, 153
 - views of Watson, 159–160
 - antisemitism at Johns Hopkins University, 177
 - tries to help Jollos, 178–180
 - criticisms of Mendelian genetics, 180–181
 - on inheritance of acquired characteristics, 182–184
 - defense of Moewus in 1951, 184–193
 - Horowitz's views of, 190
 - tries to secure help from the Rockefeller Foundation, 194, 202–205, 207
 - on Moewus's invitation to Indiana University, 227, 229
 - Sager's views of, 241
 - on Moewus's demonstration for Ruth Sager at Woods Hole, 243–246
 - dissociates himself from Moewus, 246–247, 266
 - last judgment on Moewus and his work, 283–284
- Spiegelman, Sol, 62, 181
- Stanford University, 60, 62, 121, 132, 172, 195

340 *Index*

- statistical criticisms
 and experimentation, 106–107, 112–113, 118–119
 of Mendel's results, 84, 104, 105, 110, 112–113, 118–119
 of Moewus's results, 84–88, 100–102
 Stepka, William, 231
 Stockholm, 167–168
 Sturtevant, A. H.
 attitude to award Moewus's work, 190, 192
 on relative sexuality, 260
 see also Drosophila school
 Summerlin, William, 7, 15

 tacit knowledge, defined, 117, 118, 131
 Tatum, Edward, 2, 28, 33, 48, 55, 56, 62, 120, 161
 see also Beadle, George
 "technique-ladenness" of observations, 175
 termones, 80, 258
 see also carotenoids; gamones; sex substances in Chlamydomonas
 theory-ladenness of observations
 and fraud, 14, 15, 18
 and Mendel, 110–113
 and Moewus, 175–176, 251–252
 Thimann, Kenneth, 89–90
 trimming, 9
 see also fraud
