978-0-521-36752-3 - Geometric Aspects of Banach Spaces: Essays in Honour of Antonio Plans

Edited by E. Martín-Peinador and A. Rodés

Table of Contents

[More information](#)

CONTENTS.	v
Antonio Plans: a biographical outline. Martín-Peinador, E.	1
Infinite dimensional geometric moduli and type-cotype theory. Milman, V. and Perelson, A.	11
Hilbert space revisited Retherford, J.R.	40
Particular M-basic sequences in Banach spaces. Terenzi, P.	54
Behaviour of semi-Fredholm operators on a Hilbert cube. Rodés, A.A.	73
Operators from $H^1$ into a Banach space and vector valued measures. Blasco, O.	87
Operators on vector sequence spaces. Bombal, F.	94
On the duality problem for entropy numbers. König, H.	107
Mixed summing norms and finite dimensional Lorentz spaces. Jameson, G.J.O.	112
On the extension of 2-polynomials in normed linear spaces Benítez, C. and Otero, M.C.	125
On some operator ideals defined by approximation numbers. Cobos, F. and Resina, I.	133
Some remarks on the compact non-nuclear operator problem. John, K.	140
On some properties of $A_*$ , $L^1/H_0^1$ as Banach Algebras. Candeal, J.C. Galé, J.E.	145
On factorization of operators. González, M. and Onieva, V.M.	159
Some properties of Banach spaces $Z^{**}/Z$ Valdivia, M.	169
