

Contents

Preface	ix
1. Formal Systems and Structure Theory	1
2. Zero-Order Logic: Proof Theory	16
3. Zero-Order Model Theory	38
4. Positive Implication	57
5. Negation	72
6. Complete Implication-Negation Logic	91
7. Disjunction	111
8. Conjunction	131
9. Multi-Connective Systems	146
10. Strict Implications: Introduction	180
11. Strict Implications: Additional Results	206
12. Quantification and First-Order Logic	238
13. Quantification and Complete Logics	260
14. Quantification and Incomplete Logics	285
15. Interpretation of Formal Systems	294
Appendix: Historical and Bibliographical Remarks	303
Subject Index	315
Index of Systems	319
Index of Symbols	320
