*Index of subjects*

- social knowledge, 199–201, 207, 209
- social mechanisms
  - in general dynamical social systems framework, 107
  - interaction concept and, 353n.16
- social networks, *see* networks
- social order
  - definition of, 116
  - economic and communal, value requirement for existence, 188
  - presuppositional problem of, 158–9
  - problem of, 160, 176–8
  - reconstructed problem of, 200, 212, 273–6
  - representation principle, 117
  - as stable social structure existence, 187
- social practices, 199–200
- social reality (*see also* reality construction), 199
  - rule, 208
- social relation (*see also* social role), 237
  - inequality formula, 293
- social reproduction
  - analytical action theory and, 183
  - in Giddens's theory, 200
  - in Homans's system theory, 101
  - type 2 theorems and, 109
- social role
  - emergent social relation and, 237
  - interaction and, 211–12
  - relation, meaning of, 187
  - in structural–generative action theory, 207–8, 217
  - structure as multiplex, 189–90
- social stability
  - in general dynamical social systems framework, 107–8
  - Parsons's theorem conjecture on, 187
  - type 2 theorems and, 109, 126
- social statics, comparative
  - in general dynamical social systems framework, 108
  - macrosociological theory and, 303
  - type 3 theorems and, 109, 127
- social structures
  - analytic types of, 183–4, 186–7, 193
  - existence of, and type 1 theorems, 109, 125
  - four types of theorems and, 109
  - in general dynamical social systems framework, 107
- social system, *see* dynamical social system
- Social System, The* (Parsons), 160, 175
- sociological theory, ix, 15
- space
  - general meaning of, 71
  - in macrostructural theory, 289
  - parameter, 71, 80
- state, 70, *see also* state space
  - in structural–generative action theory, 204
- stability (*see also* attractor)
  - analysis of equilibrium state, 77–8
  - comparative statics and, 78
  - social, *see* social stability
  - structural, and type 4 theorems, 78–9, 87, 351n.19
  - type 2 theorems and, 87, 126
- standardization, 100
- state space
  - approach, 46, 147, 361n.11
  - concept of, 322
  - definition, for dynamical system, 70
  - discrete vs. continuous, 80
- statics, comparative
  - definition of, 78
  - social, *see* social statics, comparative
  - type 3 theorems and, 87
- status-role, 98, 160, *see also* social role
- structural analysis, 257, 359n.1
- structural equivalence, 111
- structural–generative action theory, 111, 157, 201–18
- structural integration, principle of, 191–2
  - see also* interpenetration
- structuralism
  - generative, *see* generative structuralism
  - presuppositions of, 257–8, 340
  - two branches of, 258–9
  - types of, in analytical action theoretic perspective, 196
    - and unification, summary of ideas, 348–9
  - structural representations, 109–12
- structuration theory, *see* Giddens, Anthony, in *Index of Names*
- structure, principle of duality of, 200, 206
- Structure of Social Action, The* (Parsons), 159, 175
- structure of theory, 16–36
  - logical form of, and generativity of models in, 55
  - as meaning control hierarchy, 26–36
- structure statistics
  - correspondence theorem, 270
  - definition of, 266
    - small world analysis and, 314
