## Subject index

- ad hoc categories, 16, 26, 102, 108, 115, 119, 132, 167, 298; *see also* goal-derived categories
- affordances, 4, 12–15, 21–2, 23*n*, 53, 298
- artifacts, 16, 185–95
- attributes: as listed by experimental subjects, 14, 35–6, 121; criteria for children's categorization, 203–8, 285; not adequate for defining categories, 27, 31–3; *see also* correlated attributes, features
- basic-level categories, 3, 11–15, 64–5, 87, 91, 202, 259–60, 284, 288, 299; based on environmental structure, 29, 162; change with skill, 22*n*, 305; different for children, 7, 202–8, 224; perceptually given, 4, 14–15, 290–1, 304–5; *see also* child-basic categories
- characteristic-to-defining shift, 6, 9, 19–20, 176–91, 197, 292, 307
- child-basic categories, 7, 15, 203–8, 209, 214, 219–24
- class inclusion hierarchies, 8, 270–6, 282–4, 292
- classical theory of categories, viii, 29–30, 67, 69, 73, 89–90, 93–9, 175, 288–90, 298–9
- cluster models, 67–8, 72, 73
- cognitive archeology, 25, 43, 52–8
- cognitive models: basis of categories, vii, 4–5, 9–10, 17–22, 66–7, 141–3, 291–306; basis of prototype effects, 64–88, 98–9; idealized, 4, 6, 8, 18–19, 40, 63, 70–1, 119, 288, 292–4, 299–301; in science, 19–20, 298–300; of animal species, 17, 187–91, 291; of “bachelor,” 18, 40, 66, 77, 88–9; of cognition itself, 11, 23*n*, 294; of “hon,” 82–7; of “mother,” 67–9, 72–5, 293, 300; of superordinate categories 18, 291; *see also* cluster models, image-schematic models, metaphoric models, metonymic models, radial models, theories as bases of categorization
- coherence of categories, 25, 26–35, 38–42, 179, 291, 295
- collection terms 8–9, 270–6, 282–3
- conservation of number, 273
- constraints: cognitive and perceptual, 195, 197, 302; ecological, 7, 54–8, 291; on relevance of properties, 28, 30, 33; on theories, 25, 42–50; on word meanings, 8, 256, 258–9, 265–9, 282–5; social, 7, 191–4; *see also* mutual exclusivity
- context effects: on memory, 145–6; on typicality ratings, 106–7, 115–19, 131, 299, 300
- context-independent properties, 122–4, 126, 133, 136*n*
- convention, as basis of categories, 191–4, 205
- core-plus-identification-procedure hypothesis, 88–99, 126, 176
- correlated attributes 28–9, 56, 124, 126–7, 202, 230; inadequate to explain category structure, 4, 15, 29, 56, 115–16, 185; relation to theories, 36–7, 124–5, 195; *see also* illusory correlation
- cross-cultural findings, 177, 179–80, 189, 258
- definitions, variability of, 113, 118
- direct perception, 9, 11, 13, 17, 20, 52, 291
- distributed knowledge, 164–6; *see also* parallel distributed processing
- Down syndrome, 7, 202, 219–24
- dreams, 130–1
- ecological approach, vii, viii, 2–3, 4, 6, 10, 11, 25, 33, 42, 52–4, 290–1, 300; *see also* environmental factors in

## 316 SUBJECT INDEX

- Ecological approach (cont.)  
 categorization  
 Emory Cognition Project, vii, 3, 10*n*  
 environmental factors in categorization, 115–16, 191, 225  
 episodic memory, 125, 133, 142–3, 144, 148, 167–8, 295; *see also* exemplar theory  
 essence, 16, 186, 189  
 exclusivity, *see* mutual exclusivity  
 exemplar theory, 29, 31, 64, 132–3, 143, 161, 163; *see also* nonanalytic processes  
 experts: categorize more adequately, 20, 305, 308*n*; have new basic levels, 22*n*–3*n*, 305; responsible for establishing categories, 194, 227–8, 292; *see also* linguistic division of labor
- family resemblance, 105, 135*n*–6*n*  
 features: children's learning of, 239–40; definitive of categories, viii, 15, 64, 66, 161, 186–90, 234, 302; in characteristic-to-defining shift, 179–85, 194; no constraints on, 27; not independent, 31; not simple, 38, 289–90; salience of, 27, 49, 57; *see also* attributes, properties  
 frequency: as determinant of graded structure, 105, 117, 136*n*; of class and collection terms, 273  
 functional categories, 8, 202–3, 205–6, 234, 239–44, 251; *see also* shape-function principle  
 fuzzy-set theory, 65, 89, 90–3, 115, 131
- generalized event representations, *see* scripts
- generative cases, 79–80, 95–6  
 goal-derived categories, 102–4, 108, 109–11, 127, 298; *see also* ad hoc categories  
 goodness-of-example, 35, 166–9; *see also* graded structure, prototype effects, typicality ratings  
 graded structure, viii, 3, 6, 13, 29, 65, 91, 101–135, 171*n*, 296; *see also* goodness-of-example, prototype effects, typicality ratings
- ICM, *see* cognitive models, idealized  
 ideal cases, 78, 95, 105–6, 115, 119, 167  
 idealized cognitive models, *see* cognitive models, idealized  
 illusory correlation, 37, 54, 125, 185  
 images, mental, 85, 87–8, 130  
 image-schematic models, 65, 83–8  
 implicit learning, 155–6  
 information, 2, 11, 12
- instability of graded structure, *see* typicality ratings, variability of  
 integral vs separable dimensions, 193  
 intelligence, concept of, 23*n*  
 invariants, 12, 13, 22, 305–6
- kinship concepts, 182, 191, 205; *see also* cognitive models, of “mother”
- language, role in categorization, vi, 87–8, 224–30, 259–69  
 levels of processing, 146  
 linear separability, 30, 37–9, 166  
 linguistic determinism, 267–8  
 linguistic division of labor, 17, 21, 193–4  
 long-term memory, 114–15, 118, 120–6, 127, 135, 296–7
- mass nouns, 9, 276–84  
 memory, 1, 2, 6, 10; *see also* long-term memory, recognition memory, semantic memory, working memory  
 mental models, *see* cognitive models  
 metacognition, 23*n*, 207, 226, 227, 229  
 metaphor, 51–2, 69, 88, 89; *see also* metaphoric models  
 metaphoric models, 65, 299  
 metonymic models, 65, 70–2, 75–81, 84–8, 95, 98, 299  
 mutual exclusivity: of properties, 122; of category names, 208, 223, 228, 256, 269–70, 282–5
- naive theories, 50–2, 55; *see also* cognitive models
- natural kinds, 6–7, 16, 26, 185–95, 298  
 nominal kinds, 6–7, 185, 191–5  
 nonanalytic processes, 6, 141–60, 164–71, 295  
 norm theory, 132–3, 168–9
- odd number, as category, 16, 96–9, 102  
 ontological knowledge, 15–17, 30, 190, 195–6, 303, 308*n*  
 overextension, 203–6, 212, 214, 217–18, 221, 269
- paragons, 79, 95  
 parallel distributed processing (PDP), 134–5, 166  
 perception, 1–2, 4, 5, 12–13, 21, 33, 52, 302–6; *see also* direct perception  
 perceptual identification, 146, 147–8, 149–50, 157–60  
 point of view in categorization, 106–7, 109–11, 115, 117, 131, 137*n*

## Subject index

317

- priming, 132, 147  
 probabilistic theory of categories, 29, 30–1, 161, 175, 180–5  
 properties, *see* attributes  
 prototype, 3, 104; as basis of conceptual structure, 119, 124, 161, 167, 175–6, 180–6, 189, 191, 195–8, 234; for pseudowords, 157–9; for “saw,” 216; similarity to prototype as criterion for categorization, viii, 23*n*, 39, 90; *see also* prototype effects  
 prototype effects, 63–4; in Osherson & Smith’s theory, 90–6; in Armstrong, Gleitman, & Gleitman’s theory, 96–9; produced by idealized cognitive models, 66–82, 88; *see also* typicality ratings, graded structure  
 radial models, 70, 74–5, 82, 96, 298  
 recency, 128, 132  
 recognition memory, 146, 148, 150–1, 156  
 representativeness structure, 74; *see also* graded structure  
 resonance, 12, 290, 306  
 rule learning, 44–8, 57, 151–6, 160, 164  
 schemata, 9, 64, 125  
 scripts, 8, 19, 64, 108, 125, 130, 234–9, 242, 244–52  
 semantic memory, 40–1  
 shape-function principle, 205, 219–222, 230  
 shareability, 193  
 similarity: and basic-level categories, vii, 14–15, 205, 215; and characteristic features, 6; as determinant of graded structure, 105; dependence on theory, 4, 41, 161–2, 171*n*–2*n*, 302; inadequate as basis for categorization, 9, 16, 26–35, 185, 198, 296–7; of concepts in communication, 197; to prior processing episodes, 141–2, 156, 160–4  
 simplicity, of theories, 42–4  
 skill, 22*n*, 147, 305; *see also* experts  
 stereotypes, 71–3, 76–8, 95, 110–11, 136*n*, 186, 194  
 submodels, 71, 80, 95, 96  
 subordinate categories, 290; *see also* superordinate categories  
 superordinate categories, 3, 14, 38, 162, 202, 241, 259, 269–70, 284; acquisition of, 229–30, 261–6; based on cognitive models, 18, 291  
 taxonomic categories, 8, 102–4, 108, 109–11, 167, 203, 242, 244, 251; children’s acquisition of, 256–69; support inference, 275–6, 283–4  
 thematic categories, based on scripts, 8, 234, 239, 244–52  
 thematic relations, as basis for grouping, 257–68, 282  
 theories as bases of categorization, 25, 33–58, 161–3, 195–8, 293, 298, 302–7; *see also* cognitive models  
 typical examples, 77–8  
 typicality ratings, vi, 39–40, 101–17, 161, 185, 190, 195, 198, 288–9; dependence on context, 35, 131, 167, 294; relation to increasing understanding, 197; variability of, 5, 104–17, 119, 123–4, 128, 295; *see also* goodness-of-example, graded structure, prototype effects  
 underextension, 203–6, 210–12, 215–18, 222, 226  
 word meanings, 8, 176; development of, 201–31, 255–85  
 working memory, 116, 118, 119, 129, 133, 135, 295, 297
