

## *Contents*

Frontispiece	ii
Preface	ix
List of contributors	xi
Generating expanders from two permutations <i>Miklós Ajtai, János Komlós &amp; Endre Szemerédi</i>	1
Sum-free subsets <i>N. Alon &amp; D. J. Kleitman</i>	13
Is there a different proof of the Erdős–Rado theorem? <i>James E. Baumgartner</i>	27
Almost collinear triples among $N$ points on the plane <i>József Beck</i>	39
Hamilton cycles in random graphs of minimal degree at least $k$ <i>Béla Bollobás, T. I. Fenner &amp; A. M. Frieze</i>	59
The circumference of a graph with a given minimal degree <i>Béla Bollobás &amp; Roland Häggkvist</i>	97
On arithmetic progressions in sums of sets of integers <i>J. Bourgain</i>	105

vi	Contents
<hr/>	
On graphs not containing prescribed induced subgraphs <i>F. R. K. Chung &amp; R. L. Graham</i>	111
Partitions sans petits sommants <i>Jacques Dixmier &amp; Jean-Louis Nicolas</i>	121
A compact sequential space <i>Alan Dow</i>	153
The critical parameter for connectedness of some random graphs <i>R. Durrett &amp; H. Kesten</i>	161
Multiplicative functions on arithmetic progressions: III. The large moduli <i>P. D. T. A. Elliott</i>	177
Locally finite groups of permutations of $\mathbb{N}$ acting on $l^\infty$ <i>Matthew Foreman</i>	195
Hypergraph games and the chromatic number <i>Fred Galvin</i>	201
On arithmetic graphs associated with integral domains <i>K. Győry</i>	207
On the number of certain subgraphs of graphs without large cliques and independent subsets <i>A. Hajnal, Z. Nagy &amp; L. Soukup</i>	223
Sets of multiples of Behrend sequences <i>R. R. Hall</i>	249
A functional equation arising from mortality tables <i>W. K. Hayman &amp; A. R. Thatcher</i>	259
The differences between consecutive primes, IV <i>D. R. Heath-Brown</i>	277
On the cofinality of countable products of cardinal numbers <i>Thomas Jech</i>	289

Contents	vii
On $\sigma$ -centered posets <i>I. Juhász &amp; K. Kunen</i>	307
A Galvin–Hajnal conjecture on uncountably chromatic graphs <i>P. Komjáth</i>	313
Necessary conditions for mean convergence of Hermite–Fejér interpolation <i>Attila Máté &amp; Paul Nevai</i>	317
On the Erdős–Fuchs theorems <i>H. L. Montgomery &amp; R. C. Vaughan</i>	331
A tournament which is not finitely representable <i>Z. Nagy &amp; Z. Szentmiklóssy</i>	339
On the volume of the spheres covered by a random walk <i>P. Révész</i>	341
Special Lucas sequences, including the Fibonacci sequence, modulo a prime <i>A. Schinzel</i>	349
A remark on heights of subspaces <i>Wolfgang M. Schmidt</i>	359
Incompactness for chromatic numbers of graphs <i>Saharon Shelah</i>	361
Graphs with no unfriendly partitions <i>Saharon Shelah &amp; E. C. Milner</i>	373
On the greatest prime factor of an arithmetical progression <i>T. N. Shorey &amp; R. Tijdeman</i>	385
The probabilistic lens: Sperner, Turan and Bregman revisited <i>Joel Spencer</i>	391
On the mean convergence of derivatives of Lagrange interpolation <i>J. Szabados &amp; A. K. Varma</i>	397

---

Sur une question d'Erdős et Schinzel <i>Gérald Tenenbaum</i>	405
Large $\alpha$ -preserving sets in infinite $\alpha$ -connected graphs <i>Carsten Thomassen</i>	445
Some recent results on interpolation <i>Péter Vértési</i>	451
Partitioning the quadruples of topological spaces <i>W. Weiss</i>	459
Some of my favourite unsolved problems <i>Paul Erdős</i>	467
