- boundedly complete basis, 6
- Brouwer's Theorem, 188
- Bruck's Theorem, 232

- Caristi's Theorem, 9, 13
- Cauchy Problem, 14
- characteristic of convexity, 53
- Chebyshev center, 37
- Chebyshev radius, 37
- coefficient of noncompact convexity, 77
- compact-valued mapping, 165
- conditional fixed point property, 117
- continuous linear functional, 2
- contraction mapping, 7
- convex hull, 1
- convex-valued mapping, 165
- coordinatewise convergence, 6

- Darbo's Theorem, 197
- degree theory, 233
- delta* modulus of noncompact convexity, 83
- delta-uniformly convex spaces, 77
- demiclosed mapping, 108
- Demiclosedness Principle, 109
- diametral point, 38
- diametral sequence, 39
- diametral set, 38
- directed set, 156
- dual space, 2
- duality mapping, 105

- Eberlein-Smulian Theorem, 4
- external point, 61

- filter, 144
- finitely representable, 57, 147
- firmly nonexpansive mapping, 127
- fixed point property for spheres, 116
- fixed point property, 37
- Fréchet differentiable norm, 69

- Gateaux derivative, 69
- Gossez-Lami Dozo (G-L) condition, 79

- Hairy Ball Theorem, 190
- Hausdorff metric, 19
- hyperbolic metric, 18
- hyperconvex space, 46

- Kadec-Klee (KK) norm, 72, 158
- Kirzbraun-Valentine Theorem, 132
- Krein-Smulian Theorem, 4

- Lifschitz character, 172
- Lim's Theorem, 233
- Lipschitz constant, 7
- lipschitzian mapping, 7
- lower semicontinuous mapping, 199

- m*-accretive mapping, 137
- mappings of type Γ , 111
- measure of noncompactness, 73
- Menger's Theorem, 24
- metric projection, 94
- metrically convex, 24, 116
- minimal invariant set, 33
- modulus of convexity, 52
- modulus of noncompact convexity, 76, 83
- modulus of smoothness, 69
- monotone mapping, 127, 136

- nearest point projection, 94
- nearly uniformly convex space, 73
- net, 3, 156
- nondiametral point, 38
- nonexpansive mapping, 27
- nonexpansive retract, 117
- Nonlinear Mean Ergodic Theorem, 232
- nonvanishing vector field, 188
- normal convexity structure, 49
- normal structure coefficient, 61
- normal structure, 39
- normalized duality mapping, 110
