## Acknowledgements

I began research on international investment and migration flows in 1980 while a Fellow of the Inter-American Research Program at New York University, funded by the Tinker Foundation and the Ford Foundation. The focus of this early research was the coexistence in the U.S. during the 1970s of rapid growth in the export of low-wage jobs and a high immigration from low-wage countries. For their support, I am most grateful to the staff of the Center for Latin American and Caribbean Studies, especially its director, Christopher Mitchell, and the administrator, Deborah Truhan. Catherine Benamou's research assistance was outstanding; I could not have done the work without her intelligent and imaginative help. While at the Center, I spent many good hours discussing the subject with Mary Garcia Castro, Fernando Urrea, Sherri Grasmuck, and Patricia Pessar.

In doing the research on U.S. direct investment abroad, I had come across evidence of growing levels of direct foreign investment in the U.S. A fellowship at the Center for United States–Mexico Studies, University of California, San Diego, allowed me to continue this research in 1982–83. It became a study on the use of foreign capital and foreign labor in Southern California. I am most grateful to Wayne Cornelius, the Center's director, and the staff for their support. I also want to thank the Tinker Foundation for funding the fellowship. While at the Center, I had the opportunity to discuss my ideas with a number of people, especially Maria Patricia Fernandez Kelly, Rosalía Solorzano, Leo Chavez and Cassio Luiselli.

The Centro de Estudios de la Frontera Norte de México (CEFNOSEX), in Tijuana, was of invaluable help for research and discussions; I am particularly grateful to Jorge Bustamante and Jorge Carrillo.

During Spring 1983 I did research in Los Angeles. My visiting appointment at the Graduate School of Architecture and Urban Planning of the University of California, Los Angeles, gave me ample

xi

opportunity to talk with students and colleagues interested in economic restructuring. I am most grateful to Rebecca Morales, Leo Estrada, Wendy Grover, and John Friedmann. The Research Foundation of the City University of New York provided funding for the research.

The research in New York City during 1984–85 benefited from the first year of a three-year project supported by the Revson Foundation on the employment of Hispanic women in the electronics and garment industries in the New York City Metropolitan area.

My single largest debt is to Soon Kyoung Cho. We shared a relentlessness as researchers and a sense of excitement about the inquiry that kept us working into the early hours of the morning, with the University cleaning staff doing their job all around us and often sharing our findings. Whenever I left New York City and went off tracking data, Soon joined the effort.

Susan Allen-Mills, my editor at Cambridge, and Lynn Hieatt, the subeditor, were immensely helpful and gracious in their support. For their indispensable help at various stages in the preparation of the manuscript, I would like to thank Escheal Segan, Norma Gayne, and Eric Canin.

There are many more people and institutions to thank, many referred to in the text. Three that were particularly helpful, though in very different ways, were the U.S. Department of Commerce, the New York Institute for the Humanities, and Asia Labor Monitor (Hong Kong).

I would also like to thank the following publishers and journals for allowing me to reprint segments of several articles and chapters. The publishers are the Society for the Study of Social Problems, Sage and Academic Press; the journals, *Development and Change*, *International Migration Review*, *Environment and Planning*, *Social Problems*, and *Journal of Ethnic Studies*.

And then there is my son, Hilary, who learnt about migrant workers when he barely walked; by the time he was four years old I could count on him introducing the subject at any event, appropriate or not.
