

## INDEX

---

- abdominal pores 81
- adrenergic receptors 145
  - $\alpha$  adrenergic 145, 148, 165, 168
  - $\beta_1$  adrenergic 147, 173
  - $\beta_2$  adrenergic 148
- adventitia 42
- arteries 41
  - structure of 42
  - principal 55
- arterioles 42, 43
- ATPase 13
- atrial natriuretic peptide 15, 149, 150
- atrium 10, 21, 186
- autonomic nervous system 141
  - emergence of 196
  - parasympathetic division 142
  - receptors of 145, 146
  - sympatho-adrenal division 142
- autoregulation 166
  
- baroreceptors 150, 151
- bladder, circulation 100
- blood 58
  - clotting factors of 73, 74
  - coagulation times 74
  - haematocrit 59, 60
  - oxygen capacity of 59, 60
  - oxygen dissociation curve of 63
  - nucleoside triphosphates in 67
- blood pressure 7
  - in arteries 53, 163, 185
  - in veins 126
- blood viscosity 75
  - haematocrit, effect on 76
  - shear rate, effect on 76
  - temperature, effect on 75
  - vessel dimensions and 46, 77
- Bohr effect 64, 109, 113
- bradycardia 171
  
- bulbus arteriosus 5, 27
  
- calcium,  $\text{Ca}^{2+}$  13, 15, 19, 27, 38, 45, 49, 74, 175
- carbon dioxide 70
  - as a buffer 70, 71
  - transport of 71
- capillaries 44
  - basal lamina of 44
  - contraction of 45
  - dimensions of 46
  - interchanges in 47
  - pathways across 48, 49
  - permeability of 49
  - retial 44, 106, 107
- cardiac output 36, 37, 159
  - bradycardia and 171
  - cardiac vagus and 160, 161
  - cardioaccelerator nerves 162
  - catecholamines 161
  - in hypoxia 171, 188
- cardiorespiratory synchrony 172
- catecholamines 144, 146
  - in hagfish 188
  - effect on carbohydrate metabolism 180
  - on diffusive conductance 176
  - on  $\text{H}^+$  ion flux 179
  - on gill vessels 165
  - on oxygen uptake 177
  - on peripheral vessels 167
  - on spleen 149
  - on stroke volume 147, 161
  - on swimbladder 148
  - hypoxia and levels of 175
  - liberation of 145
  - receptors 146
- caudal heart 98
  - of carpet shark 133
  - of eel 135

- of hagfish 137
- caudal pump 131, 132
- caveolae 13
- cavernous bodies 86, 90
- Chaenichthyidae 1
- cholinergic receptors 146, 149, 164, 171
- choroidal retina 112
- colloid osmotic pressure 47
- conus arteriosus 10, 29, 30
- coronary arteries 32, 122
  - atherosclerosis in 33
  - flow 33, 173
  - importance of 33
  - vascular networks of 32
- cross sectional area 9
- elastic lamina 42
- electrocardiogram 20, 186
- epigonal organ 86
- erythrocytes 59, 60, 66, 68, 188
- fasciae adherentes 14
- fast-conducting tracts 18
- fibrinogen 73, 76
- flow 2
- fluid energy 4
- gill vasculature 89
  - adrenergic nerves to 164
  - arterioarterial pathway 90
  - arteriovenous pathway in 92
  - blood pressure in 91, 92
  - blood flow in 92, 163
  - in hypoxia 174
  - intrinsic dilation in 163
  - microcirculation of 89
  - nociceptors of 163
  - parasympathetic nerves to 163
- granulocytes 78
- gut-associated tissue 84
- haemal arch pump 126, 128, 129
- hagfish 183
  - blood buffering 189
  - blood cells of 188
  - blood pressure 185
  - blood system of 189, 190
  - cardiac cycle 186
  - cardiac index 185
  - cardiac output 185
  - catecholamines 187
  - features of 183
  - myocardial power output 185
  - response to exercise 189
  - sinus blood of 192
  - sinus system of 190
  - subcutaneous sinus of 140, 191
- haemoglobin 59
  - acclimation, adaptation of 68
  - concentration, effect of 66
  - Hill's equation 61, 62
  - myxinoid 62, 188
  - oxygen affinity of 63
  - oxygen transport by 58
  - oxygenation of 61
  - temperature and 66
- heart 1, 10–40
  - chambers of 10
  - events of the cardiac cycle 21
  - electrocardiogram of 20
  - fast-conducting tracts in 18
  - homeometric regulation of 39
  - intercalated discs in 14
- hepatic portal system 3, 6, 55, 56, 121, 139
- heterophils 78
- hyperaemia 53, 166
- hypoxia 170
  - extent of 170
  - pH and 175
  - receptors for 152
- in series resistance 6
- intestine, circulation 56, 101
- intima 42
- intrinsic responses 38–39, 53, 115, 141, 160, 163, 166, 173
- kidney, circulation 102
- kinetic energy 4
- leucocytes 77
  - types of 78
- lymphocytes 83
  - thymic, T cells 83
- macrophages 81
  - chemotaxis in 82
  - differentiation 81
  - fixed 81
  - melanomacrophages 81, 85
  - perivisceral 81
- media 42
- meningeal tissue 85, 87
- muscle, red and white 103, 158
  - circulation to 104, 105
- myocardium 11
  - acidotic, defence of 175
  - gap junctions in 14, 187
  - power output of 35
  - specific granules in 14
  - metabolism of 35
- myocytes 12
  - dimensions of 12
  - action potential 19
  - myoglobin in 12
  - resting membrane potential 19

- myxinooids, *see* hagfish
- neutrophils 78
- organ of Leydig 85
- pace-maker tissue 15
- pace-maker potential 15  
 hyperpolarisation of 17
- Pascall's first law 2
- pericardium 24, 186  
 fluid in 26, 27  
 pericardio-peritoneal canal 26
- peripheral circulation 166, 168  
 autonomic control of 167  
 catecholamines and 167  
 distribution of 166  
 in hypoxia 173
- peroxidase 78
- phagocytosis 80, 87
- plasma protein 47, 49, 50, 71  
 blood clotting and 73  
 electrophoretograms of 72
- Poiseuille's equation 3
- portal heart 139
- pressure 2, 3  
 on land and water 7
- pronephros 85, 165
- radius of vessel 3
- renal portal circulation 6, 99, 197
- resistance 5, 195
- retia mirabilia 106  
 in mackerel sharks 120  
 in tuna 116  
 of brain and eye 123  
 of digestive organs 121  
 of swimbladder 107
- Root effect 65, 109, 113, 188
- sarcoplasmic reticulum 13
- secondary blood system 96, 194  
 anastomotic arteries of 98  
 distribution 96  
 in fish scales 97
- shear 3, 4
- sinoatrial junction 15, 16
- sinus venosus 20, 31, 32
- spleen 83, 149, 167
- Starling's law of the heart 38  
 calcium and 38  
 effects of preload on 38  
 in exercise 160  
 specific granules 14  
 subdermal vascular spaces 194  
 swimbladder 107  
 removal of gas from 110  
 retia of 108  
 swimming, speed of 158  
 burst 158  
 prolonged 158  
 sustained 158
- temperature 114  
 acclimation to 114  
 in gut and liver 121  
 in mackerel shark 120  
 in brain and eye 123  
 in tuna red muscle 117, 119
- thrombocytes 78
- T tubules 13
- thymus 82
- transmural pressure 2
- urophysis 100
- urotensins 100
- valves 21, 52, 128, 130, 132, 133, 138  
 atrioventricular 22  
 conal 30  
 of cardinal heart 130  
 of caudal heart 133  
 of caudal pump 132  
 ostial 52, 128  
 parietal 52
- vascular receptors 150  
 baroreceptors 150, 151  
 hypoxia receptors 152  
 nociceptors 153  
 type J receptors 154
- veins 51  
 of fishes 56  
 valves in 52, 127
- velocity of flow 9
- venous pressure 126
- ventricle 22  
 compact layer of 31, 35  
 coronary arteries to 32, 33, 173  
 spongy layer of 34, 196
- viscosity 3, 75, 76
