 rule of flow, associated 62, 117, 118  
 rupture, ductile 136  
  
 Saint-Venant plastic element 8  
 sand-hill analogy, Prandtl 301  
 sandwich shells 68  
 saturation 118  
 scalar-valued function, isotropic 26  
 scaling of temperature 267  
 Schmid law 194  
 Schwedoff model 46  
 secant modulus 119  
 secant Poisson ratio 120  
 second law (thermodynamics) 37  
 second-order tensor, invariants of 25  
 second principle 267  
 second tensor, Piola–Kirchhoff 164  
 self-consistent method 202  
 self-equilibrated stress fields 78, 178  
 semicontinuity, lower 288  
 sequential limit, singular 65  
 shutdown 81, 92  
   elastic 10  
   plastic 10  
 shear stress, resolved 194, 194  
 shells 28  
   cylindrical 28, 68  
   sandwich 68  
   Tresca 29  
 shock waves 120, 170  
 simple loading 12  
 simple traction 302  
 simple waves 120  
 singular sequential limit 65  
 singularity  
   notion of 139  
   temperature distribution 256  
 slice, torsion of 306  
 slip-surface 91  
 small perturbation hypothesis 30, 31  
 small-strain ‘deformation’ theory 119  
 small-strain elastoplasticity 50  
 small transformation 31  
 solid media 40  
 space of functions 77  
 specific heat, natural 246  
 sphere, hollow 132  
 spring element, 8  
 stability  
   Drucker 185  
   Ilyushin 111  
 stability condition  
   global 112  
   local 112  
 stabilization by homogenization 202  
 stable under homogenization 197

- standard material, generalized 94, 150,
