Foreword	<i>page</i> xi
Prefatory note	xxiii

CHAPTER I.

KUMMER'S CONFIGURATION.

SECT.	PAGE
1. Desmic tetrahedra	1
2. The group of reflexions	4
3. The 16_6 configuration	5
4. The group of sixteen operations	6
5. The incidence diagram	7
6. Linear construction from six arbitrary planes	8
7. Situation of coplanar points	12

CHAPTER II.

THE QUARTIC SURFACE.

8. The Quartic surface with sixteen nodes	14
9. Nomenclature for the nodes and tropes	16
10. The equation of the surface	17
11. The shape of the surface	19

CHAPTER III.

THE ORTHOGONAL MATRIX OF LINEAR FORMS.

12. Preliminary account of matrices	24
13. Orthogonal matrices	26
14. Connection between matrices and quaternions	27

SECT.	PAGE
15. The sixteen linear forms	28
16. Quadratic relations	30
17. The ten fundamental quadrics	32
18. The six fundamental complexes	33
19. Irrational equations of Kummer's surface	34

CHAPTER IV.

LINE GEOMETRY.

20. Polar lines	37
21. Apolar complexes	38
22. Groups of three and four apolar complexes	39
23. Six apolar complexes	40
24. Ten fundamental quadrics	41
25. Klein's 60_{16} configuration	42
26. Kummer's 16_6 configuration	44
27. Line coordinates	45
28. Fundamental quadrics	47
29. Fundamental tetrahedra	48

CHAPTER V.

THE QUADRATIC COMPLEX AND CONGRUENCE.

30. Outline of the geometrical theory	50
31. Outline of the algebraical theory	53
32. Elliptic coordinates	55
33. Conjugate sets	56
34. Klein's tetrahedra	57
35. Relations of lines to Φ	58
36. Asymptotic curves	60
37. Principal asymptotic curves	62
38. The congruence of second order and class	63
39. Singularities of the congruence	63
40. Relation between Φ and Λ	65
41. Confocal congruences	66

CHAPTER VI.

PLÜCKER'S COMPLEX SURFACE.

42. Tetrahedral complexes	68
43. Equations of the complex and the complex surface	69
44. Singularities of the surface	71
45. The polar line	72
46. Shape of the surface	73

CONTENTS.

vii

CHAPTER VII.

SETS OF NODES.

SECT.		PAGE
47.	Group-sets	75
48.	Comparison of notations	76
49.	Pairs and octads	77
50.	Eighty Rosenhain odd tetrads	78
51.	Sixty Göpel even tetrads	79
52.	Odd and even hexads	80

CHAPTER VIII.

EQUATIONS OF KUMMER'S SURFACE.

53.	The equation referred to a fundamental tetrahedron	81
54.	The equation referred to a Rosenhain tetrahedron	83
55.	Nodal quartic surfaces	86

CHAPTER IX.

SPECIAL FORMS OF KUMMER'S SURFACE.

56.	The tetrahedroid	89
57.	Multiple tetrahedroids	91
58.	Battaglini's harmonic complex	94
59.	Limiting forms	98

CHAPTER X.

THE WAVE SURFACE.

60.	Definition of the surface	100
61.	Apsidal surfaces	101
62.	Singularities of the Wave Surface	102
63.	Parametric representation	104
64.	Tangent planes	106
65.	The four parameters	108
66.	Curvature	109
67.	Asymptotic lines	110
68.	Painvin's complex	112

CHAPTER XI.

REALITY AND TOPOLOGY.

69.	Reality of the complexes	115
70.	Six real fundamental complexes	118
71.	Equations of surfaces I_a, I_b, I_c	121
72.	Four real and two imaginary complexes	122
73.	Two real and four imaginary complexes	125
74.	Six imaginary complexes	126

CHAPTER XII.

GEOMETRY OF FOUR DIMENSIONS.

SECT.		PAGE
75.	Linear manifolds	127
76.	Construction of the 15_0 configuration from six points in four dimensions	129
77.	Analytical methods	130
78.	The 16_0 configuration	131
79.	General theory of varieties	132
80.	Space sections of a certain quartic variety	134

CHAPTER XIII.

ALGEBRAIC CURVES ON THE SURFACE.

81.	Geometry on a surface	137
82.	Algebraic curves on Kummer's surface	138
83.	The Θ -equation of a curve	141
84.	General theorems on curves	142
85.	Classification of families of curves	145
86.	Linear systems of curves	146

CHAPTER XIV.

CURVES OF DIFFERENT ORDERS.

87.	Quartic curves	149
88.	Quartics through the same even tetrad	151
89.	Quartics through the same odd tetrad	153
90.	Sextics through six nodes	154
91.	Sextics through ten nodes	157
92.	Octavic curves through eight nodes	158
93.	Octavic curves through sixteen nodes	159

CHAPTER XV.

WEDDLE'S SURFACE.

94.	Birational transformation of surfaces	160
95.	Transformation of Kummer's surface	162
96.	Quartic surfaces into which Kummer's surface can be transformed	165
97.	Weddle's surface	166
98.	Equation of Weddle's surface	169

CONTENTS

CHAPTER XVI.

THETA FUNCTIONS.

SECT.		PAGE
99.	Uniformisation of the surface	173
100.	Definition of theta functions	175
101.	Characteristics and periods	176
102.	Identical relations among the double theta functions	179
103.	Parametric expression of Kummer's surface	180
104.	Theta functions of higher order	182
105.	Sketch of the transcendental theory	184

CHAPTER XVII.

APPLICATIONS OF ABEL'S THEOREM.

106.	Tangent sections	188
107.	Collinear points	190
108.	Asymptotic curves	194
109.	Inscribed configurations	196

CHAPTER XVIII.

SINGULAR KUMMER SURFACES.

110.	Elliptic surfaces	200
111.	Transformation of theta functions	201
112.	The invariant	203
113.	Parametric curves	204
114.	Unicursal curves	206
115.	Geometrical interpretation of the singular relation $kr_{12}=1$	208
116.	Intermediary functions	210
117.	Singular curves	212
118.	Singular surfaces with invariant δ	213
119.	Singular surfaces with invariant 8	214
120.	Birational transformations of Kummer surfaces into themselves	216

INDEX	221
