

INDEX

A-injective	1
A-projective	67
\aleph_0 -continuous module	104
\aleph_0 -continuous regular ring	103
\aleph_0 -quasi-continuous module	104
$(A_1), (A_2), (A_3)$	4,5
algebra, AW [*] -	103,104
, C [*] -	103
, finite C [*] -	104
, Rickart C [*] -	104
, von Neumann	100
, W [*] -	103
attached maximal ideal	87
C [*] -algebra	103
$(C_1), (C_2), (C_3)$	18
cancellation property	9
, internal	9
closed submodule	19
complement submodule	19
complemented lattice	100
, ortho	100
complements (maximal) summands	26
continuous geometry	101
continuous lattice	100
, lower	100
, upper	100
continuous module	18
, \aleph_0 -	104
, \aleph_0 -quasi-	104
, dual-	79
, quasi	18
continuous regular rings	101
, \aleph_0 -	103
$(D_1), (D_2), (D_3)$	57
dimension function	101
directly finite	10
discrete	59
, quasi-	59
dual-continuous	79

equivalent projection	100
exchange property	9
, finite	9
extending module	99
extending property	27
, finite	27
, n-	27
factor	100
finite C^* -algebra	104
finite projection	100
finite exchange property	9
finite extending property	27
geometry, continuous	101
, projective	101
H-supplemented	95
hereditary class	13
hollow module	55
injective	1
, A-	1
, quasi-	7
, relatively	7
injective hull	1
internal cancellation property	9
isolated ideal	93
lattice, complemented	100
, lower continuous	100
, modular	100
, orthocomplemented	100
, orthomodular	100
, upper continuous	100
lifting property	65
, n-	65
, n-small	65
, small	65
local module	55
local summand	24
local summand is a summand	24
locally-semi-transfinitely-nilpotent	29
maximal summand	26
, complements	26
modular lattice	100
, ortho	100
orthocomplementation	100
orthocomplemented lattice	100
orthogonal modules	13
orthogonal pair of classes	13
orthomodular lattice	100

perfect ring	70
, semi	70
perspective	12,100
projection	100
, equivalent	100
, finite	100
projective	68
, A-	67
, quasi-	68
projective cover	70
purely infinite	14
quasi-continuous	18
quasi-discrete	59
quasi-injective	7
quasi-projective	67
quasi-semi-perfect	79
reduced ring	40
regular ring	101
, continuous	101
relatively injective	7
Rickart C^* -algebra	103
semiperfect module	71
, quasi-	79
semiperfect ring	70
small lifting property	65
, n-	65
small submodule	55
summable family	49
summand, local	24
, maximal	26
superspectre	12
supplement submodule	56
supplemented module	56
, H-supplemented	95
, \oplus -supplemented	95
, weakly supplemented	95
square	35
square free	35
square full	35
square root	35
W^* -algebra	103
weakly supplemented	95
\mathcal{K} -full	13
\mathcal{K} -void	13
