

CONTENTS

<i>Foreword by A. Montagu</i>	<i>page</i> xiii
<i>Acknowledgments</i>	xvi
Part 1: Methods and prefatory explanations	1
Introduction	1
Attributes shared by humans and chimpanzees	7
Positive and negative behavior and emotive tone	7
The mutual dependence system: a model	8
Methods	11
Preferred use of early studies and methodological tools not currently in favor	14
Direct and indirect competition	15
Charisma and dependence	16
The functional approach	17
Use of the term foragers	17
The (sometimes) harmless people, and the (normally) friendly chimpanzee	18
The naturalistic studies: practitioners and methods	21
Feeding methods: the Gombe Research Center	28
Feeding methods: the Mahale Research Center	30
Part 2: The human foragers	37
General anthropological understandings	37
The immediate-return foraging system	39
Territoriality	43
Social kinship	45
Leadership	46
The foragers' sanctions	48
Part 3: The changing social order	51
Kortlandt's hypothesis	51

x	<i>Contents</i>	
	Mobile and sedentary groups	55
	The social climate of wild groups	57
	The territoriality of wild chimpanzees	60
	The social climate of the provisioned groups	67
	The recent territoriality of the Gombe and Mahale apes	70
	The rise of despots	74
	Sexual relations among wild chimpanzees	77
	Sexual relations in the Gombe group, post-1965	79
	A 'gentle crucible': the infant experience in wild chimpanzee groups	84
	The Gombe infant experience	88
	Infanticide and cannibalism at Gombe and Mahale	95
	Persecution of the vulnerable	103
	Prolonged dependency, delayed social maturation	105
	Migration among wild chimpanzees	114
	Apprentice into adolescent	117
	Solidifying alliances	122
	Part 4: The behavior of wild and provisioned groups: a theoretical analysis	125
	Foraging theory: when, and when not, to defend territory	125
	Costs and benefits of recent behaviors of the Gombe and Mahale apes	127
	The foraging strategy of wild chimpanzees	133
	Frustration theory	136
	Barker <i>et al.</i> 's experiment	137
	Behavior without a goal	139
	Competition theory	143
	Part 5: The mutual dependence system	151
	The nature of authority	152
	The parental roles	155
	Variability of temperament	161
	The nature of true leadership	167
	Nishida's and de Waal's insights	168
	Traits of charismatic leaders	170
	The nature of the follower role	171
	The nature of deference	172
	The charismatic-dependent role relationship	174
	A generalization of the parent-child relationship	174
	Noninterference mutualism	178
	The means of social control	179
	The independent conformists	179
	The use of sanctions by chimpanzees	181
	The positive sanctions; reward and goal	186
	The structure of attention	188

<i>Contents</i>	xi
Part 6: The egalitarian chimpanzees	195
In search of the female	196
Achievement of adult rank	203
Acceptance through grooming: an adult male–adolescent device	209
Acceptance through aunting: a female–female way	214
Acceptance through copulation: an opposite-sex way	218
The social function of the carnival reunions	224
The function of the mobile and sedentary groups	232
The role of charismatic elders	234
Part 7: Probabilities, possibilities and half-heard whispers	239
The adaptive value of negative behavior: a possibility	239
The chimpanzee hierarchy	244
Further suggestions and comments	248
The Rousseauian foragers: human and chimpanzee	248
A mammalian system?	253
Focus for the future: pro-social behavior	253
<i>Notes</i>	255
