

INDEX

- acceleration, 65, 74, 75, 76, 79, 84, 86, 89, 90, 99, 110, 113, 116, 119, 122, 125, 142
- accelerations rotational, 90
- accelerations translational, 90
- actin, 19, 35, 38, 70
- adaptation, 1, 4, 8, 21, 26, 41, 43, 133, 138, 152
- adaptation physiological, 134, 154
- adaptationist, 4
- adequacy, 4, 9
- aerobic exercise, 16
- amphibians, 117, 141, 148, 165
- Anatomical Diffusion Factor, 135
- Angelfish, 21, 89
- anguilliform, 20
- arterial system, 48, 159, 164–166
- arterial system wave propagation, 162
- aspect ratio, 57
- ATP, 14, 16, 35, 36, 39, 41, 84, 171, 174
- bicycle ergometers, 16
- biomaterials, 44
- blood pressure, 48
- body mass, 23
- bone, 2, 52, 55, 56, 58, 65, 67, 71–74, 99, 172, 176
- bone curvature, 71, 73
- bone shape, 79
- bounding, 25, 40, 152
- breathing, 25
- breathing efficiency, 25
- breathing optimal frequency, 147, 148
- bulbus arteriosus, 165
- burst-and-coast swimming, 25
- calorimetry, 17, 51
- carbon fibers, 52, 54, 56
- cardiac efficiency, 24, 159, 163
- cardiac output, 152
- cardiac pressure, 48
- caterpillar, 122
- centipedes, 97
- cephalochordates, 10
- chameleon, 141
- clade, 8, 175, 177, 179
- clade outgroup, 169
- cockroaches, 106
- collagen, 43, 48, 52, 56, 60, 68
- contraction frequency, 33, 35, 38
- conus arteriosus, 165
- Cost of Breathing, 145
- Cost of Transport, 22–25, 120
- crabs, 97, 101, 102, 105, 107, 111, 112, 115, 117, 121
- cross-bridges, 38, 39, 122, 123
- crustaceans, 85, 89, 117
- cuticle, 45, 52–54, 56
- delta efficiency, 16, 107
- design, 43–45, 48–57, 59, 60, 62, 63, 65–74, 133, 159
- diastolic pressures, 165
- diving, 139, 148, 164–166
- dynamic mechanics, 141
- economy, 69, 97, 100, 103, 107–109, 118–121, 125
- ectothermy, 10
- effectiveness, 3, 4, 9, 10, 13, 44, 49, 50, 98–100, 109, 133, 134, 138, 139, 150, 153, 169, 171, 172
- efficiency, 2–4, 9, 10, 13–19, 22, 36, 38, 83, 98, 125, 133, 159, 169
- efficiency of biomaterials, 44

- efficiency oxidative phosphorylation, 14
 elastic efficiency, 45, 47, 62
 elastic energy, 92, 150
 elastic energy recoil, 84
 elastic energy recovery, 47, 65, 79
 elastic energy savings, 75, 79
 elastic energy storage, 18, 23, 48
 elastic recoil, 45, 47, 48, 159
 elastic strain energy, 18, 67, 75, 76, 79, 99, 112, 118–121, 126
 elastic work of resting breathing, 144
 elastin, 48, 60
 endothermy, 10
 energy recovery, 65, 67, 73, 78
 energy storage, 18, 45, 48, 92
 ergometry, 16, 17
 evolution, 1, 2, 27, 43, 44, 48–51, 55–57, 62, 80, 100, 169, 173, 174, 176, 178, 179, 181
 evolutionary, 4, 9, 13, 15, 26, 49, 54, 69, 97, 98, 100, 125, 154, 159, 169, 173, 174, 177–180

 flagellates, 20
 flap gliding, 40
 fleas, 113
 frequency, 33, 34, 40, 45, 48, 76, 86, 88, 89, 146–149, 160, 164
 Froude efficiency, 84, 85, 89, 171

 gas exchange, 133, 137, 149, 153
 geese, 120
 glycolysis, 101

 heart, 24, 26, 48, 159, 160, 162–166
 heart rate, 159, 164–167
 Hill's equation, 92
 historical analysis, 170, 174, 177, 181
 hovering flight, 18, 20
 hummingbird, 20, 34, 35
 Huxley's equation, 36

 insect cuticle, 46, 56
 insects, 18, 19, 35, 47, 52, 85, 102, 108, 117, 118, 122, 123, 125
 intermittent swimming, 25
 internal energy, 101, 102, 110, 116, 117
 intrinsic speed, 39, 41
 isometric contractions, 17, 121

 jumping, 70, 72, 76, 78, 100, 113

 kangaroos, 65, 73, 76, 77, 79, 102, 109, 112, 113, 120
 Kevlar, 52

 lift, 43, 45, 88, 105, 180
 lift-based mechanism, 88
 lift-based propulsion, 87
 lizards, 23, 100, 102, 106, 108, 109, 117, 148, 153
 locomotor-respiratory coupling, 25, 26, 152, 153
 locusts, 113
 lung compliance, 140–142
 lung morphology, 134
 lung partitioning, 138

 mammals, 10, 23–25, 45, 65, 71, 79, 97, 102, 106–108, 111, 112, 114–116, 119, 122, 134–136, 138, 140–142, 144, 145, 148, 159, 162, 164
 maneuverability, 99, 125
 mass-specific metabolic cost, 119, 122
 maximum efficiency, 93
 metabolic cost, 24, 45, 102, 104, 107, 114, 115
 millipedes, 97
 mineralization, 67
 minimum cost of transport, 107
 minks, 102
 minute ventilation, 137, 145, 154
 mitochondria, 13, 35, 39
 modulus of elasticity, 51, 60
 muscle, 14, 16–19, 22, 25, 26, 33–36, 38–41, 69, 70, 74, 75, 76, 77, 83, 85, 91–94, 97, 99, 101, 102, 110–112, 114, 118, 119, 121–124, 126, 143, 152, 160, 170, 171, 174, 176, 177
 muscle efficiency, 16–19, 24, 38, 40, 118, 119, 176–178
 muscle isometric stress, 19, 36, 70, 78, 91
 muscle stress, 78, 92
 myosin, 19, 35, 39, 70
 myriapods, 117, 118

 natural selection, 1, 2, 44, 50, 83, 178, 179
 nematodes, 20
 net metabolic cost, 104

 offset costs, 105
 optimality, 9, 44, 65–67, 179
 optimization, 3, 9, 11, 57, 58, 62, 65–68, 79, 133, 154, 178
 optimum, 3, 9, 42, 43, 59, 146
 oxidative phosphorylation, 14, 15
 oxygen consumption, 14, 17, 22, 24, 37, 84, 100, 102, 103, 120, 137, 164, 165

- oxygen consumption maximum rate
 $V_{O_{2max}}$, 139
- pelicans, 34
- penguins, 85, 87, 109, 120
- perfection, 3, 44
- performance, 91, 99, 172
- phylogeny, 69, 174, 176, 180
- Poisson's ratios, 61
- polychaetes, 20, 21
- ponies, 102
- power output, 16, 18, 24, 35–37, 39,
 42, 44, 89, 90, 112, 114, 119, 120
- pressure diastolic, 165, 166
- pressure systolic, 165, 166
- pressures, 48, 61, 139, 142, 162
- pressures systolic, 160, 164
- propulsive efficiencies, 20
- propulsive efficiency, 15, 18, 19, 22
- Pseudemys scripta*, 148
- pseudoelasticity, 61
- pulmonary ventilation, 143, 146–148
- recover elastic strain, 99
- reptiles, 10, 23, 134–136, 138, 140–
 142, 145, 148, 150, 153, 166
- resilience, 45, 47, 48, 62
- resiliency, 66
- resilin, 45, 46, 113
- respiratory frequency, 25, 143, 146,
 147
- respiratory pumps, 139, 153, 154
- respiratory system, 133, 134, 138, 139,
 142, 143, 147, 154, 173
- respiratory-locomotor coupling, 152,
 153
- Reynolds number, 16, 19, 20, 86, 88,
 89
- rowing locomotion, 89
- rowing propulsion, 89
- safety factor, 5, 6, 70, 74, 75, 76
- salamanders, 101, 102, 105, 106
- salmonids, 22
- scaling, 13, 23, 24, 66, 77, 112
- schooling, 25
- selection, 3, 4, 6, 9, 26, 44, 46, 47, 52,
 68, 70, 100, 179
- silk, 46, 53, 56, 58
- skeletal design, 43, 65, 66, 70, 77, 79
- skeleton, 2, 43, 45, 49, 52, 60, 65–72,
 79, 97
- specific stiffness, 52, 65
- specific strength, 53, 65–72, 79, 172
- spider webs, 54
- squirrels, 102
- stability, 93, 94, 99, 125
- stiffness, 50–52, 54, 56–58, 60, 61, 65,
 66, 68, 75, 78, 79, 140
- strain, 6, 34, 35, 71, 75
- strain rate, 36–38, 40, 41
- strength, 50, 51, 53, 54, 56–59, 65–68,
 71, 73, 78, 79, 99, 125, 172
- stress, 35–38, 41, 57, 66–68, 70–73, 76,
 79, 105, 142
- stress similarity, 70
- stress-strain, 46, 52, 54, 55, 60–62
- sufficiency, 4–6
- symorphosis, 173
- tail heterocercal, 180
- tail homocercal, 180
- temperature, 56, 101, 104–109, 126,
 151
- tendon stress, 76, 78
- tendons, 43, 45, 47, 52, 54, 65, 67, 70,
 73, 76, 78, 99, 112
- tensile strengths, 53
- tension, 35, 40, 42, 47, 58, 121, 159,
 163, 165
- thermodynamic efficiency, 45, 48, 65,
 66
- thermoregulation, 101
- tidal stream transport, 25
- tidal volume, 138, 141, 143, 146, 147,
 149
- total metabolic cost, 103
- toughness, 52, 53, 56–58, 60, 65–67
- treadmill, 24, 100, 122
- tunniform swimming, 26
- turtle, 8, 85, 139, 141, 143, 145, 148
- undulatory locomotion, 15
- undulatory mode, 20, 21
- undulatory propulsion, 15, 20, 21
- undulatory swimmers, 19
- $V_{O_{2ss}}$, 100, 102, 103, 105, 107
- ventilation, 25, 102, 133, 139, 141, 143,
 145, 148–150, 152, 154
- ventricular volume, 159
- vivipary, 10
- volume specific power, 35, 36, 41
- waterboatman, 21
- windkessel, 159, 162, 165, 167
- work of breathing, 143, 145, 148
