- Banach lattice 1  
 Beurling–Deny conditions 12  
 Bochner–Lichnerowicz–Weitzenböck  
   formula 184  
 bottom of the spectrum 5, 156  
 bounded geometry 167, 172  
 bounded holomorphic semigroup 23  
  
 Calabi’s theorem 153  
 compact resolvent 39  
 compactness and spectrum 35  
 complete Riemannian manifold 151,  
   153, 157  
 complex times 102  
 conformal metric 135, 148  
 conservation of probability 24, 153  
 contraction semigroup 14, 22  
 convex polyhedron 181  
 convolution 3  
 cotangent space 146  
 cusp 181  
 cut locus 153  
  
 difference operator 19  
 diffusion 179  
 Dirichlet boundary conditions 10  
 Dirichlet form 22, 148  
   classification 56  
 discrete spectrum 5  
 distance function 147  
 divergence 147  
  
 elliptic operator 10  
 ergodic theory 181  
 essential self-adjointness 56, 151  
 essential spectrum 5  
 Euclidean algorithm 180  
 exponent of convergence 182  
 exponential volume growth 156  
 extension property 46  
  
 external ball condition 27  
 external cone condition 27, 130  
  
 Feller property 155  
 Feynman–Kac formula 52  
 first passage time 166  
 form limit 8  
 Fourier transform 2  
 Friedrichs extension 11  
 functions of an elliptic operator 99  
 fundamental domain 181  
 fundamental point pair invariant 177  
  
 Gaussian lower bound 82, 91  
 Gaussian upper bound 82, 83  
 geodesic 177  
 Golden–Thompson inequality 53  
 gradient 147  
 graph Laplacian 20  
 Green function 4, 83  
 ground state 109  
 group  
   amenable 157  
   Fuchsian 180  
   fundamental 180  
   geometrically finite 182  
   Hecke 181  
   Kleinian 180  
   rank one 177  
   Schottky 182  
  
 Hadamard’s method of descent 178  
 Hardy’s inequality 25  
 harmonic function 34  
   bounded 165, 184  
   positive 165, 184  
 harmonic oscillator 113  
 Harnack inequality 21, 98, 157  
 Hausdorff dimension 183  
 Hausdorff–Young inequality 2
