

Contents

<i>Contributors</i>	<i>page</i> ix
<i>Preface</i>	xi
1. A. F. Huxley: an essay on his personality and his work on nerve physiology. <i>Robert Stämpfli.</i>	1
2. A. F. Huxley's research on muscle. <i>Robert M. Simmons.</i>	19
3. Ultraslow, slow, intermediate, and fast inactivation of human sodium channels. <i>Reinhardt Rüdél and Bernd Fakler.</i>	43
4. The structure of the triad: local stimulation experiments then and now. <i>Clara Franzini-Armstrong.</i>	53
5. The calcium-induced calcium release mechanism in skeletal muscle and its modification by drugs. <i>Makoto Endo.</i>	67
6. Hypodynamic tension changes in the frog heart. <i>Rolf Niedergerke and Sally Page.</i>	83
7. Regulation of contractile proteins in heart muscle. <i>Saul Winegrad.</i>	107

vi	<i>Contents</i>	
	8. Differential activation of myofibrils during fatigue in twitch skeletal muscle fibres of the frog. <i>Hugo González-Serratos and Maria del Carmen Garcia.</i>	117
	9. High-speed digital imaging microscopy of isolated muscle cells. <i>Stuart R. Taylor and Kenneth P. Roos.</i>	127
	10. Inotropic mechanism of myocardium. <i>Lincoln E. Ford.</i>	147
	11. Regulation of muscle contraction: dual role of calcium and cross-bridges. <i>Albert M. Gordon.</i>	163
	12. Fibre types in <i>Xenopus</i> muscle and their functional properties. <i>Jan Lännergren.</i>	181
	13. An electron microscopist's role in experiments on isolated muscle fibres. <i>Lucy M. Brown.</i>	189
	14. Structural changes accompanying mechanical events in muscle contraction. <i>Robert M. Simmons.</i>	203
	15. Mechano-chemistry of negatively strained cross-bridges in skeletal muscle. <i>Yale E. Goldman.</i>	219
	16. Force response in steady lengthening of active single muscle fibres. <i>Vincenzo Lombardi and Gabriella Piazzesi.</i>	237
	<i>References</i>	257
	<i>Index</i>	297
