- Acquisition scenario and the individual rationality of empowerment*, *see* acquisition scenario of sovereign empowerment; confederacy agreement, and sovereign-entrepreneur
- acquisition scenario of sovereign empowerment, 119, 155–72
 and confederacy agreement, *see* confederacy agreement
 and inequalities of individuals, 155
- actual consent, *see* autonomy, actual consent
- agency game, 159–72
 iterated, 161–72
 and rational rebellion, 181–2
 ruler-people game, 160–2, 164, 166–7, 167 n9, 171
- agency theory of relationship between subject and sovereign, 47–55, 47 n1, 50
 formal argument, 52
 and inferential argument, *see* inferential argument
- alienation theory of relationship between subject and sovereign, 47, 47 n1
- altruistic interests, *see* interests of hypothetical individuals, altruistic
- American soldier story, 140–2
- Analysis of the problem in the hypothetical scenario*, *see* conflict in the state of nature; hypothetical negotiation scenario; hypothetical scenario, interaction in; prisoner's dilemma
- Analysis of the solution to the problem in the hypothetical negotiation scenario*, *see* external solutions to problems in the hypothetical scenario; internal solutions to problems in the hypothetical scenario
- anarchy
 and fairness, 257–8
 moral legitimacy of, 256–7
- Argument from psychological egoism and internalism*, *see* ethical subjectivism, entailed by psychological egoism and internalism
- Arneson, Richard, 175 n10
- assurance problem, 13
 and collective goods, 13, 124–5, 130, 142
- autonomy, 185
 actual consent, 185, 219, 221–2

Index

- autonomy (*continued*)
 libertarian objection to normative force of hypothetical consent, 184–5, 219, 221–3
- battle-of-the-sexes example of mixed coordination game, 114–15
- belief
 and epistemic justification, 75–6
 and psychological egoism, *see* psychological egoism
 role of in human behavior, 87–8
- Boorman, Scott, 93 n30
- Brink, David, 8 n6, 33 n21, 79 n18, 84 n23
- Buchanan, Allen, 175 n10
- capacities of hypothetical actors, 9
- Carroll, J., 151 n5
- causal effects condition, *see* punishment cadre, causal effects condition
- Characterization of a set of hypothetical individuals*, *see* hypothetical individuals, characterization of
- Characterization of the hypothetical environment*, *see* hypothetical environment, characterization of
- coalition prohibition, *see* hypothetical negotiation scenario, coalition prohibition in
- collective action problems, 12
 formal definition, 13–14
 lack of group coordination and, 14
 lack of information and, 14
 latent groups, 14
 as n-person PD, 14
 privileged groups, 13–14
- collective goods, 12–13
 incremental goods, 125
 as single-play PD, 126
 vagueness of, 128
- jointness of supply, 13, 121
 nonexcludability, 13, 121
 as single-play PD, 13
 step goods, 125
 causal effect condition, 129–31
 essentiality condition, 130–1
 increased probability of creating good with each contribution, 128–9
 as mixed coordination game, 126
 rationality of free-riding, 126–7
- collectively irrational sovereign
 and assurance problem, 178–9
 and free rider problem, 178–9
 Hobbes's solution to, 105
 Locke's response, 105–6
 rational rebellion against, 106–7, 174–82
- complex objectivism, 82–3; *see also* objectivism
- confederacy agreement, 155–6, 156–72
- confederacy game, 163
 and contingent-move games, *see* contingent-move games, agency game
- game-theoretic structure of, 162–72, 163 n8
- incentives to comply with, 162
 as iterated PD's, 162
 and ruler-people game, *see* agency game, ruler-people game
- and sovereign-entrepreneur, 156, 156–8, 164–72
- conflict in state of nature; *see also* state of nature
 and conflict in postpolitical anarchy, 64–6, 68–70
 Gauthier's account, *see* disposition as solution to single-play PD
 Hampton's account, 48–9, 56–63

Index
