managerial performance, predictors of, 147–8
Marxism, 63
mastery instruction, 20–1, 23–4
matrix problems, 40, 41
information-processing of, 51–3
meaningfulness, 17
memory-analytic abilities, 220, 221
memory development, contextual factors in, 75
memory tasks, 12, 13, 14
mental abilities, primary, 41–2, 44
metaanalysis, of cognitive-ability test validity,
  137, 138–40, 148–9
metacomponents
definition of, 221
examples of, 221
in task/intelligence relationship, 54, 67
Subject Index

Mexican children, substance-conservation skills
of, 171, 180, 193, 196–7, 198
microgenetic approach, 205
military personnel, performance under stress, 155–65
Miller Analogies Test, 135
minority-group members, cognitive-ability testing
of, 144–5
Mixed Relations Test, 40
modeling, in cognitive development, 173
monarchic style, 226
motivation, relationship to success, 227
multiple intelligences theory, 174–5
first-order effect of, 175–6
second-order effect of, 175–93
coincidence with first-order effect, 192–7
collaborative interactions in, 181–6
disruptive interactions in, 186–7
domain-specific foci of, 188–91
environmental diversity in, 178–9
individual-environment interactions in, 177–92
interational diversity in, 179–81
multistate model, of information-processing, 206, 207
musical intelligence, 174
Myers-Briggs Type Indicator, 147, 148

Necessary Arithmetic Operations, 9
nonentrenched-reasoning problems, 222
novelty, intelligence and, 17, 38–73
contextual analysis of, 57, 64–6
developmental analysis of, 39, 59–64
of fluid and crystallized intelligence, 62–3
in infants, 61–2
Piagetian theory and, 59–61
zone of proximal development theory and, 63–4
general ability and, 19–20
information-processing analysis of, 39, 46–59
indirect novelty manipulation and, 56
rule-induction problems and, 46–54, 66–7
task performance and, 54–5
task understanding and, 55–6
verbal tasks and, 54, 56–7
psychometric analysis of, 38–46
cognitive styles and, 45–6
rule-induction items in, 40–4
reasons for correlation of, 66–8
sources of novelty in, 57
spatial/figural tasks and, 50–1, 56–7
opinion tasks, 12, 13, 14
overlearned behavior, stress-induced, 162–3

Paper Folding Test, 9
parallel activity, 182, 184

peer interaction, effect on cognitive development, 172, 173
perception
of academic tasks, 16, 17
transactional theory of, 7
performance components, 221
personality, relationship to creativity, 226–7
personality theory
interactionist, 4, 5, 11
transactional, 7
person-situation interaction, 3
in academic task performance, 31–2
affordances in, 28–9, 31
process model of, 24, 26
sampling-assembly-control process of, 26–8
see also PRSVEL model, of person-situation interaction
Piaget, Jean, 205–6, 211
Piagetian tasks, developmental differences in, 128
Piagetian theory
of adaptation, 59–60
of development, criticisms of, 172, 173–4
of novelty/intellectual development relationship, 59–61, 74
of social interaction, 172–3, 180, 181
practical-contextual abilities, 220, 223–4
practical intelligence, 145–48, 149
problem-finding skills, 60–1
problem interpretations, 105–32
developmental differences in, 115–26
gender differences in, 118, 119, 120, 122,
123, 124, 125
interpersonal-oriented interpretations, 121–4, 125, 127
problem-solving strategy effectiveness and,
115–8, 119–24, 125–6, 127
relationship with academic achievement,
115, 119–20
task-oriented interpretations, 121–4, 125, 126–7
framework for, 113–4
problem isomorphs, 83–5
problem-solving adaptation in, 110–2
as approach to novelty, 39–40, 57–9
contextual constraints on, 209
contextual-developmental approach to, 105, 108–14
primary strategies of, 112, 122, 124, 125
problem-solving selection in, 110–2
problem-solving strategies in, 110–4
secondary strategies of, 112, 122, 124, 125
developmental differences in, 115–26
gender differences in, 118, 119, 120, 122,
123, 124, 125
interpersonal-oriented interpretations,
121–4
problem interpretation and, 118–26
problem-solving (cont.)
  relationship to academic achievement, 115, 119–20
  task-oriented interpretations, 121–4
  sociocultural factors in, 87–9
  solution transfer in, 84
  of well-structured versus ill-structured problems, 14
  procedural-routine tasks, 12, 13, 14
  process model, of person-situation interaction, 24, 26

Progressive Matrices, 40, 41
  task analysis of, 51–3, 54, 67

PRSVL (Person-Roles-Situations-Values-Luck) model, of person-situation interaction, 218–32
  luck variable of, 220, 231
  person variable of, 219–28
  abilities component, 220–3
  knowledge component, 220, 224–5
  motivation component, 220, 227–8
  personality component, 220, 226–7
  practical-contextual abilities component, 220, 223–4
  thinking and learning styles component, 220, 225–6
  roles variable of, 220, 228
  situations variable of, 220, 228–9
  values variable of, 220, 229–31

psychology, general versus differential, 4
  psychometric analysis, of novelty/intelligence relationship, 38–46
  cognitive styles and, 45–6
  rule-induction items in, 40–4

see also cognitive-ability testing; names of specific cognitive tests

radex model, of intelligence, 18, 19, 42–4

reasoning
  analogical, 48, 49–50
  figural, 42
  isomorphic, 83–5
  metaphorical, 75
  in novelty-related problem-solving, 57–9
  proportionality, 83–4
  semantic, 42
  symbolic, 42
  working-memory capacity and, 53, 54

reciprocity, in interactions, 5, 6–7

regression analysis, 6

resonance, 177

rewards, relationship to motivation, 227–8

risk, of academic tasks, 14, 17

Rod and Frame Test, 45–6

roles, 228

  effect on social interaction, 187
  rule-induction problems, 40–4, 66–7
  information-processing of, 46–54

Subject Index

sampling-assembly-control process, of person-situation interface, 26–8

scaffolding, 23, 181–2, 183, 193

Scholastic Aptitude Test (SAT) scores, 135, 142–3

School and Outside of School Questionnaire, 116, 117

selection tasks, 84

self-government, mental, 225–6

series-completion problems
  information processing of, 48–9, 53–4
  working-memory loads of, 53

series-extrapolation problems, 40, 41

sex factors
  in problem interpretation, 118, 119, 120, 122, 123, 124, 125
  in social interaction, 187

Shipley IQ Test, 147

situated abilities, 31–2

situationism, new, 5, 7

situation variables, 12

relationship with person variables, 16–7

social constructivism, 203

social interaction
  effect on cognitive ability, 173–4, 179–81
  Piagetian theory of, 172–3, 180, 181

roles and, 187

social learning theory, 173

sociocultural bias, of intelligence testing, 205

sociocultural factors, in learning transfer
  in class-inclusion problem-solving, 89–93
  in conservation-task performance, 93–8
  in mathematical skills, 87–9

sociogenetic process approach, to intelligence, 202–17

comparison with information-processing approach, 207–8, 211

individual-sociocological reference frame of, 209–10, 211

knowledge construction process of, 211–5

person-environment interdependence axiom of, 210–211

social channeling in, 214–5

telephilic viewpoint of, 208–9

spatial intelligence, 174

of Australian aborigine children, 171, 173, 177, 180, 193, 196–7, 198

stress
  academic task-related, 17, 18
  novelty-related, 38
  occupational, 229

organizational
  effect on leadership performance, 154–65
  as evaluation apprehension cause, 154
  as overloaded behavior cause, 162–3

structure-of-intellect model, 44–5

students, varying abilities of, 15

stylistic characteristics, 225–6

substance-conservation task performance, 171
### Subject Index

- **by Mexican children**, 171, 180, 193, 196–7, 198
- **success, motivation and**, 227
- **Suzuki method, of violin training**, 171, 173, 191–2, 193–4, 198
- **symbols, encoding of**, 208

#### Tacit Knowledge Inventory for Managers, 147–8
- **talking, stress-induced**, 162–3
- **task adaptation, in contingent tutoring**, 23–4, 25
- **task understanding, novelty in**, 55–6
- **teaching styles**, 13–4
- **correlation with learning styles**, 225
- **high-structure/low-structure of**, 20, 21–3
- **comparison with contingent tutoring**, 23–4, 25
- **component assemblies of**, 29–30
- **mastery versus guided discovery**, 20–1, 23–4
- **telephilic view, of sociogenetics of intelligence**, 208–9
- **temperament, relationship to intelligence**, 61, 62
- **test anxiety**, 11
- **text processing, developmental differences in**, 128
- **thinking, styles of**, 225–6
- **transactional interactions**, 5, 7–8, 17–8
- **tutoring, contingent**, 23–4, 25
- **values, organizational**, 229–31
- **variance analysis**, 6
- **varimax technique**, 44
- **Vygotsky’s theory, of cognitive change**, 172, 173

#### Wechsler Adult Intelligence Scales
- **Block Design of**, 46
- **Revised, 40, 41**
- **Wonderlic Personnel Test**, 155, 156, 157, 158
- **work experience, effect on problem-solving performance**, 114
- **working-memory capacity**, 53, 54, 67
- **World War I**, 203
- **zone of proximal development**, 63–4, 210
