Preface v

Introduction 1

1 Overture
1.1 Growth 5
1.2 Plant growth 5
1.3 Plant growth analysis 7
1.4 Plant growth analysis in relation to other fields of activity 9
1.5 The 'classical' and the 'functional' approaches to plant growth analysis 10
1.6 Computing support required 11
1.7 Units 12
1.8 Notation 12
1.9 An outline of the course of the book 13

2 Concepts in plant growth analysis
2.1 Introduction 14
2.2 Growth analysis of individuals 16
2.3 Growth analysis of populations and communities 33
2.4 Independent variables or variates other than time 40
2.5 Synopsis and sources of additional information 41

3 The functional approach in theory
3.1 Introduction 47
3.2 Models of plant growth 47
3.3 Models in the functional approach to plant growth analysis 51
3.4 Derivations from growth functions 55
3.5 The way ahead 60

4 The functional approach in practice
4.1 Introduction – and a caution 61
4.2 Indirect estimation of primary data 62
4.3 Freehand curves for interpolation 64

978-0-521-42774-6 - Plant Growth Curves: The Functional Approach to Plant Growth Analysis
Roderick Hunt
Table of Contents
More information

4.4 Fitted curves in the classical approach 67
4.5 The practical background to the functional approach 67
4.6 The choice of function 69
4.7 Statistical considerations 73
4.8 In conclusion 77
4.9 A forward look 78

5 Polynomial functions
5.1 Introduction 79
5.2 First-order polynomial 81
5.3 Second-order polynomial 94
5.4 Third-order polynomial 103
5.5 High-order polynomials 109
5.6 Stepwise polynomials 110

6 Asymptotic functions
6.1 Introduction 121
6.2 Monomolecular function 123
6.3 Logistic function 126
6.4 Gompertz function 128
6.5 Richards function 135
6.6 Other asymptotic functions 144

7 Special approaches
7.1 Introduction 147
7.2 Segments 147
7.3 Running re-fits 149
7.4 Splines 154
7.5 Time Series Analysis 164
7.6 Other special functions 166
7.7 Response surfaces involving additional independent variables or variates 168

8 Finalé
8.1 Which growth function? 174
8.2 The classical versus the functional approach 177
8.3 The biological relevance of parameters and functions 185
8.4 Why plant growth analysis? 186
