 architecture, 174
 compared to physical measures, 116–17, 327–29
 environment, 109, 110, 112–13, 117, 121, 301, 327, 328–29
 interobserver reliability, 53; *see also* consensus
 salient dimensions, 102
- open space, 91, 477
 aesthetics, 75, 77
 affective quality, 114, 258, 291–98
 controls, 428
 design, 81–84
 problems, 4, 74
- openness, 95, 102, 262, 273
 natural settings, 325, 338, 340, 347, 353, 354, 357, 361, 363
- residential settings, 287, 288, 291–98
- urban settings, 271, 275
- order, 3, 9, 95, 103
 affective quality, 262, 271, 273, 275
 and complexity, 6, 7, 407, 409–10
 salience in perception, 179–80, 182, 189, 190, 219, 221, 226, 271
- organization, *see* order
- orientation, 398–99, 400, 404, 405, 407
- paintings, 88, 90, 226
 prospect–refuge, 35, 36, 37, 40, 41
- parks, playgrounds, *see* open space
- participatory environments, 91, 94–96, 97
- paths, 94, 351–52, 356; *see also* mystery
- perceptual/cognitive measures, *see* objective descriptors
- phenomenological approach, 30, 110, 114–15
- phenomenological space, 92–93, 97
- physical measures, 108, 111–12, 117, 327, 328
 compared to objective descriptors, 109–10, 116–17
 phenomenological environment, 96–97
 problems, 112
- physiognomic properties, 24
- Picturesque, the, 413–16
- pigmentation, *see* color
- plazas, *see* open space
- pleasure
 influences on, 4, 312–15
 role in learning and performance, 61
 salience in affect, 58, 102, 107, 219, 221, 226
- potency, 190, 194
 salience in affect, 58, 181
- preference
 adaptive role, 60–61
 commonalities, 46, 53, 56, 57, 63
 evolutionary mode, 47, 51–52
 importance, 57
 preferred attributes, 103, 111, 286–87, 340–41, 345; architecture, 225; natural settings, 323, 325, 340, 350–55; open spaces, 292–98; residential settings, 257–58; signscapes, 312–15, 316–17; urban settings, 268–70, 343
 role of cognition, 56, 57
- private vs. public interest, 462–63
- prospect, affective quality, 49, 103; *see also* openness; prospect–refuge theory
- prospect–refuge theory, 28, 30, 40–41, 66, 69, 357
- evolution, 30–33, 35, 65
- misconceptions, 33–35
- testing, 37–40, 323, 325, 357

Subject index

529

- public policy, xxii, xxiv, 228, 393, 434, 456–58, 467–69, 474
 aesthetics, xxi, 430, 435, 460
 empirical research relevance, 100, 320, 393, 397, 422, 438, 439–40, 444, 445, 449, 459, 461, 462, 464, 490–91
 participation, 435
 relation to theory and research, 5, 393
 special vs. public interest, 441–42
- quality of features, *see* upkeep
- refuge, 50, 103, 325, 347, 348, 350, 361–63;
see also prospect–refuge theory
- relaxation
 influences on, 312–15
 salience in affect, 58, 102, 107, 219, 221, 226
- research/practice gap, xxiv, 393, 395, 396, 397, 422
- residential settings, 90, 101, 102, 200, 257, 275, 292, 293, 416, 454
 single-family forms, 16–17
 values, 21–22
- rural settings, 101, 394
 growth, 364, 365, 366
 symbolic meaning, 81, 366
- scene information, 48–49
 semiology, 13–14
- signs and billboards, 300, 405, 425–27, 478–81, 482, 483, 484
- simulation media, 43, 49, 173, 200–5, 235, 264, 276, 282, 304–5, 308, 320
- size
 estimates, 295
 preference for, 290, 296, 297–98
 symbol of status, 9, 17, 428
- social environment, 66
- social importance, expression of, 9–10, 15
- sociocultural differences, 14, 276
 factors, 16, 53, 142, 143, 366–67, 378, 388, 399, 400–1
- space; *see also* openness; prospect
 differences in perception, 189, 190
 perception, 49, 85, 133, 157
 phenomenological, 85, 87
 salience in perception, 54–55, 115, 179, 180, 182, 345
- spatial configuration, and meaning, 17
- specific exploration, *see* exploratory behavior
- stylistic ratings, 221–22
- subjective measures, 117
- suburban development, 416
- surprise, 50, 62, 402, 403; *see also* collative variables
- survival, *see* evolution
- symbol, definition, 14–15
- symbolic meaning, 101
 acquisition of, 23–25
 sociocultural differences, 14
 variables, 3, 16–19, 288
- symbolism, 4, 38, 288, 289
 lack of positive theory, 12, 14
 research questions, 26
- symbols
 group differences, 16
 human/nonhuman, 69
 landscape, 67
 nature, 72, 75–77, 78, 81
 needs hierarchy, 15–16
 rural, 81
 sexual, 67–69
 social, 66
- texture, 51, 52, 344, 345
- theory
 comments on, 12, 14, 28, 29
 importance, 44
 relation to methods, 113
- uncertainty and interest, 60; *see also* collative variables
- uniqueness, *see* novelty
- upkeep, 9, 82
 affective quality, 262, 270, 273, 286, 289
 social significance, 9–10
- urban setting, 6, 235, 263
 case studies in urban design, 407–16
 determinants of form, 452–53
 need for nature, 72–73, 81
- values, 20
- variety, *see* complexity
- vegetated scenes, 102
- vegetated vs. man-made
 affective quality, 364, 366, 372, 376, 377
 salience in perception, 102–3, 338–39, 343
- vegetation, 4, 8, 54, 74, 83, 286, 288, 340, 347, 366, 375
 affective quality, 103, 110, 258, 262, 269, 273, 275, 292–96, 298, 323, 325, 340, 349
 attitudes toward, 69–72
 controls, 428
 desired qualities, 79
 large trees, 347, 350, 351, 356
 urban, 72–73, 343
- vehicles, response to, 262, 269, 271, 273, 287
- verbal report, 121, 197, 212
- visual overload, 300
- visual quality, *see* environmental aesthetics
- water, preference for, 114
