

Contents

Symmetries of modular surfaces M. AKBAS AND D. SINGERMAN	1
Lifting group actions to covering spaces M. A. ARMSTRONG	10
A combinatorial approach to the symmetries of M and $M-1$ Riemann surfaces E. BUJALANCE AND A. F. COSTA	16
Inequalities for Pell equations and Fuchsian groups J. H. H. CHALK	26
The Euler characteristic of graph products and of Coxeter groups I. M. CHISWELL	36
Infinite families of automorphism groups of Riemann surfaces M. D. E. CONDER AND R. S. KULKARNI	47
Planar hyperelliptic Klein surfaces and fundamental regions of NEC groups A. F. COSTA AND E. MARTÍNEZ	57
An example of an infinite group M. EDJVET	66
Moduli of Riemann surfaces with symmetry G. GONZÁLEZ-DÍEZ AND W. J. HARVEY	75
Modular groups - geometry and physics W. J. HARVEY	94
On automorphisms of free products A. H. M. HOARE AND M. K. F. LAI	104
The growth series of the Giesecking group D. L. JOHNSON AND H.-J. SONG	120
Exceptional representations of $\mathrm{PSL}_2(q)$ of monodromy genus zero G. A. JONES	125

On the rank of NEC groups R. KAUFMANN AND H. ZIESCHANG	137
The geometry of bending quasi-Fuchsian groups C. KOUROUNIOTIS	148
Farey series and sums of continued fractions J. LEHNER	165
Commensurability classes of two-generator Fuchsian groups C. MACLACHLAN AND G. ROSENBERGER	171
Limit points via Schottky pairings P. J. NICHOLLS AND P. L. WATERMAN	190
Diagonalizing Eisenstein series III R. A. RANKIN	196
Some remarks on 2-generator hyperbolic 3-manifolds A. W. REID	209
Uniformization, graded Riemann surfaces and supersymmetry P. TEOFILATTO	220
Generating sets for finite groups R. M. THOMAS	234
Group actions on trees with and without fixed points D. L. WILKENS	243
