Index of Programs and Dependencies

The following table lists, in alphabetical order, all the routines in Numerical Recipes. When a routine requires subsidiary routines, either from this book or else user-supplied, the full dependency tree is shown: A routine calls directly all routines to which it is connected by a solid line in the column immediately to its right; it calls indirectly the connected routines in all columns to its right. Typographical conventions: Routines from this book are in typewriter font (e.g., eulsum, gammin). The smaller, slanted font is used for the second and subsequent occurrences of a routine in a single dependency tree. (When you are getting routines from the Numerical Recipes diskettes, or their archive files, you need only specify names in the larger, upright font.) User-supplied routines are indicated by the use of text font and square brackets, e.g., [funcv]. Consult the text for individual specifications of these routines. The right-hand side of the table lists section and page numbers for each program.

General Index to Volumes 1 and 2

In this index, page numbers 1 through 934 refer to Volume 1, *Numerical Recipes in Fortran 77*, while page numbers 935 through 1446 refer to Volume 2, *Numerical Recipes in Fortran 90*. Front matter in Volume 1 is indicated by page numbers in the range 1/ through 1/xxxi, while front matter in Volume 2 is indicated 2/ through 2/xx.

**Abstract data types** 2/xiii, 1030

**Accelerated convergence of series** 160ff., 1070

**Accuracy** 19f.

Achievable in minimization 392, 397, 404

Achievable in root finding 346f.

Contrasted with fidelity 832, 840

CPU different from memory 181

**Avoiding stability** 704, 729, 830, 844

**Accuracy parameters** 1362f.

**Acknowledgments** 1/xvi, 2/xx

**Ada** 2/x

**Adams-Bashford-Moulton method** 741

**Adams’ stopping criterion** 366

**Adaptive integration** 123, 135, 703, 708ff., 720, 726, 731f., 737, 742ff., 788, 1298ff., 1303, 1308f.

**Monte Carlo** 306ff., 1161ff.

**Addition, multiple precision** 907, 1353

**Addition theorem, elliptic integrals** 255

**ADI (alternating direction implicit) method** 847, 861f., 906

**Adjoint operator** 867

**Adobe Illustrator** 1/xvi, 2/xx

**Advective equation** 826

**AGM (arithmetic geometric mean)** 906

**Airy function** 204, 234, 243f.

**routine for** 244f., 1121

**Aitken’s delta squared process** 160

**Aitken’s interpolation algorithm** 102

**Algol** 2/xx, 2/xiv

**Algorithms, non-numerical** 881ff., 1343ff.

**Aliasing** 495, 569

see also Fourier transform

**all() intrinsic function** 945, 948

**All-poles model** 566

see also Maximum entropy method (MEM)

**All-zeros model** 566

see also Periodogram

**Allocatable array** 938, 941, 952ff., 1197, 1212, 1266, 1293, 1306, 1336

**allocate statement** 938f., 941, 953f., 1197, 1266, 1293, 1306, 1336

**allocated() intrinsic function** 938, 952ff., 1197, 1266, 1293

**Allocation status** 938, 952ff., 961, 1197, 1266, 1293

**Alpha AXP** 2/xix

**Alternating-direction implicit method (ADI)** 847, 861f., 906

**Alternating series** 160f., 1070

**Alternative extended Simpson’s rule** 128

**American National Standards Institute (ANSI)** 2/xx, 2/xiii

**Amoeba** 403

see also Simplex, method of Nelder and Mead

**Amplification factor** 828, 830, 832, 840, 845f.

**Amplitude error** 831

**Analog-to-digital converter** 812, 886

**Analyticity** 195

**Analyze/factorize/operate package** 64, 824

**Anderson-Darling statistic** 621

**Andrew’s sine** 697

**Annealing, method of simulated** 387f., 436ff., 1219ff.

**assessment** 447

**for continuous variables** 437, 443ff., 1222

**schedule** 438

**thermodynamic analogy** 437

**traveling salesman problem** 438ff., 1219ff.

**ANSI (American National Standards Institute)** 2/xx, 2/xiii

**Antonov-Saleev variant of Sobol’ sequence** 300, 1160

**any() intrinsic function** 945, 948

**APL (computer language)** 2/xx

**Apple** 1/xiii

**Macintosh** 2/xix, 4, 886

**Approximate inverse of matrix** 49

**Approximation of functions** 99, 1043

by Chebyshev polynomials 185ff., 513, 1076f.

**Padé approximant** 194ff., 1080f.

**by rational functions** 197ff., 1081f.
