

## INDEX

accidental cycle	204	elementary subgroup	131, 274
alternative cosine relation	108	elliptic fixed point theorem	273
area, hyperbolic	117, 230, 231	elliptic transformation	82, 106, 272
bisecting hyperplane	60, 74	ends of geodesic curve	97, 250
boundary cycle	210	Euclidean vector space	9, 12
branch scheme	225	Euler characteristic	224, 230
bundle of geodesics	255	Euler's proposition	14
Cauchy–Schwarz	12, 16	even Lorentz transformation	25, 34
Clifford group	265	free cycles	214
closed geodesic	197	free edges	213
commutators	137	Fuchsian group	125
complexification	15	fundamental domain	150
conjugated with respect to a sphere	38	genus of surface	224, 229, 230
convex set, hyperbolic	159	geodesic curve	58
coplanar geodesics	255, 259	geodesic lifting property	182
cosine formula, hyperbolic geometry	107	glide reflection, Euclidean	64
cosine formula, spherical geometry	67	glide reflection	103, 136
Coxeter matrix	20	Gram matrix	4
cross ratio	46	Grassmann dimension formula	3
cuspidal	144, 156	Hahn–Banach principle	159
cycle condition	203	“half cycle maps”	214, 219
cycle map	166, 201	half-turn	55, 102, 267
dimension formula of Grassmann	3	Hermitian matrix	260
discrete subset, subgroup	129	Hodge star operator	242
Dirac's algebra	262	homotopy, free	197
Dirichlet domain	167	homotopy lifting lemma	196
discontinuous action	186	Hopf–Rinow theorem	175
edge	163, 200	horocycle, horolation	83, 100
edge cycle	165, 201	horocyclic boundary point	156

## INDEX

297

horocyclic compactification	147	modular figure	151
horodisc	144, 158	modular group	127, 150, 221
hyperbolic distance	70	modular group, level 2	153
hyperbolic pants	114, 211	monodromy theorem	171, 185
hyperbolic space	70	non-isotropic vector	6
hyperbolic surface	173	non-singular form	3
hyperbolic transformation	83, 106, 272	normal vector	92, 248, 251
hypercycle	83, 102	normaliser of subgroup	134, 190
indecomposable matrix	21	odd Lorentz transformation	25
infinity, line at	18	orientable surface	229
interior angle of polygon	94	orientation of vector space	241
inversion in sphere	32	orientation vector	242
involution	6, 262	oriented angles	94
isometry of metric spaces	57	orthogonal group	4
isotropic cone	27	orthogonal spheres	37
isotropic vector	6, 7, 17	orthogonal vectors	2
inversion in sphere	32	orthonormal basis	9
inversive product of spheres	39	parabolic cycle map	214
Klein bottle	229	parabolic form	16
Klein disc, model	75	parabolic transformation	83, 106, 272
Lambert quadrangle	110	parallelogram group	208
linearisation	62	pencil of geodesics	97, 255
local homeomorphism	173, 204	pencil of planes	251
Lorentz group	25	perpendicular geodesics	95, 249
Lorentz transformation	25	perpendicular, plane to line	252
loxodromic transformation	273	Poincaré disc	76
metric space	57	Poincaré extension	38
Minkowski space	243	Poincaré half-plane	80
Möbius band	203, 229	Poincaré half-space	78
Möbius group	32	polarisation	2, 89, 260
Möbius transformation, even, odd	34	positive definite form	9

positive form	16	simplex, spherical	69
positively oriented	241	side of convex fund. domain	161
principal minor	11	sine relation	107, 114
projective plane	229	skew adjoint	247
projective space	31	solvable group	134, 276
projectivized cone	27	special Lorentz group	25
pure exterior vector	245	special orthogonal group	13
quadratic form	1	spherical distance	65
rectifiable curve	171	Steiner's alternatives	41
reflection along a vector	6	Sylvester type	10
reflection, Euclidean	13, 60	symmetry with respect to a point	102
reflection, hyperbolic	27	tangent vector to hyperbolic space	70
reflection relations	200	tangent vector to sphere	65
Riemann surface	147, 224	topological manifold with boundary	146
rigid, rigidity	179	total orthogonal subspace	2
rotary reflection	64	transformation vectors	137
rotation angle	102	transitive action	6
rotation, Euclidean	14	translation axis, length	102, 137
rotation, hyperbolic	102, 106, 272	translation, hyperbolic	83, 106
screw, Euclidean	64	triangle group	209
"shortest length property"	172	uniformization theorem	179
side pairing	163, 200, 213	unorientable surface	229
side transformation	163, 200	vertex of convex fund. domain	161
signature, Fricke–Klein	230	vertex cycle	165, 201
similarity, Euclidean	18, 35	volume form	89, 244
simplex, Euclidean	21, 60	wedge product	90, 240, 263
simplex hyperbolic	74	Witt's theorem	7, 30, 31, 40, 259
