978-0-521-43871-1 - Cognitive Foundations of Natural History: Towards an Anthropology of Science

Scott Atran

Index

[More information](#)

INDEX

- A critique of pure reason* 273
- abduction 89
 of conceptual universals 90
- absolute hierarchy of functions 245
- Adanson, Michael 170, 184, 273–4
 on Buffon 196–7
 family in botanical systematics 209
 family plan 201
 genera 316
 habitus 198
 invertebrate groupings 307
 life-forms 30
 Linnaean genera 185–6
 natural method for family fragments 197–8, 199, 200
 natural order of families 308
 species stability 306
 visible order 309
- adaptation 305
- Age of Exploration 27, 201
- Aguaruna (Peru) 20, 38
 covert complexes 45
- aitia* 291
- Albert Magnus (Albert the Great) 140, 271
- alcohol as preservative 190
- Alexander's expeditions 129
- Alston, C. 229, 239
moules intérieures 239
- An essay concerning human understanding* 272
- analogos 110
- analogy
 animal kingdom 294, 295
 Aristotle's 110–11, 114, 115–19, 250, 294–5
 cognitive processes in theory forming 217
 descriptive 276
 existence of three-dimensional forces 236
 extrapolation and argumentation from
 immediate sense data 159
 formative 250
 metaphysics 315
 misapprehension 212
 and natural history 315
 negative 314
 of organism as microcosm 251
 ovum as uniform primordial pattern 147–8
 pedagogical 315
 plant and animal 224–30
 plant roots and animal heads 296
 in scale of nature 249
 scientific 12, 220, 221, 313
 structural 311
 in superficial resemblance doctrine 223
 symbolic 116, 212, 313
 as theory-formative device 225
- Analogy of Nature 10, 11, 147, 211, 230–8
 Buffon's 241
 Cuvier's 245
 Darwin's 246
 Lamarck's 241
 in Newton and Locke 232–3

INDEX

- anatomy**
 animal 191
 Aristotle's knowledge 120
 comparative 202, 244, 278
 functional 105, 201, 202, 311
 in natural history 202, 242
 plant 191, 303, 304
 plant and animal analogy 227
 rejection by Buffon in natural history 242
 relationship to morphology 203, 209
Anaximander 320
animalcule 67
animals
 analytic inviolability 284
 anatomy 309, 310
 common properties 91
 divisions 108
 as functioning morphological complex 105
 imputed with human social characteristics 117
 kind 283
 plant analogy 224–30
 preservative for specimens 190
 social characteristics 296
 viviparous 146
animism 216
anomalies, classification 118
anthropomorphization 296
anti-inductivism 247, 248
appearance
 meaning-induced expectations 61
 and underlying nature 178
Arber, A. 151, 227
Aristotelian
 definition 83, 84, 85–7
 scheme 88, 91
Aristotle 270
 analogy 110–11, 114, 115–19, 250, 294–5
 analysis of lay taxonomy 289
 anthropocentric biology 104, 116, 117
 attributed of living kind 60
 Bacon's views 288
 basic-level intuitions 289
 biological classification 107
 biology 114–15
 causal resolution of folkbiology 115
 classification 104, 293
 complete survey of living kind 120
 definition of animal nature 114
 division of animals 111, 113
 division concept 106
 dualizing 118
 essential knowledge 290
 eternal and essential nature 295–6
 folkbiological foundations 7, 115
 form, 139
 genos and *eidos* 122, 292
 improved understanding of world 122
 induction of principles from phenomenal data 122
 intuition 144
 investigation of unlabelled groupings 109
 male influence in process of genesis 291
 material cause 290
 nature of animals 290
 ontological commitment 121
 order of common sense partitions 113
 pre-theoretical foundations 114
 preservation of common sense intuition 119
 reliance on folk taxonomy 113
 similes 115
 species as universal 143
 survival of the fittest 289
 teleology 296
 understanding of common sense world 122
armadillo 40
arsenic soap 190
art and intuition 165–70
artifact
 categorization 284
 circumstance and 285
 function 289
 function and definition 284
 grouping and prototype theory 57
 origin 285
artifactual terms 283
assembly 106–15
astronomy, heliocentric 230
atomism 228, 232, 305
atomon eidos 26, 101, 122
Aztec
 folk botany 20
 herbal
Bachelard, G.
 common sense and science 247, 318
 models in science 317
 myth of the given 222
 natural history 314
Bacon, Francis 288, 303
Bacon, Roger 84, 288
Badianus Manuscript 19, 20
Balme, D. 101, 294
 animal divisions 108
 Aristotle's biology 114–15, 289, 293
 balance of nature 230

INDEX

- causal analysis 92
- natural economy 101
- teleology 98
- baptism of terms 64–5
- Bartlett, H. 41
 - generic-specieme 131
 - genus concept 27
 - intuitive foundation for natural families 135
 - life-form status of plants 32
 - Sumatran flora 318–19
- basic
 - level taxa 27–8
 - object terms 89
- Batak (Sumatra) 41–2
- Bauhin, Caspar 135, 136, 137, 272, 298
- Belon, P. 191, 278
- Berkeley, G. 275
- Berlin, B. 40
 - animal kinds 283
 - color terms 282
 - covert taxa 42–5
 - cucurbit nomenclature 136
 - folk classification 20, 27, 52, 53, 131
 - lay taxonomy 5
 - maize nomenclature 64, 129, 130
 - nontaxonomic groupings 280
 - plant part names 302–3
 - polygeneric family 29
 - problems with life-forms 38–40
- Bernouilli, J. 316
- binary code 215
- biological domain, knowledge 73
- biology, first-order and second-order representations 218
- bird classification 42–3
- blind induction 309
- blood circulation 148
- Blumenbach, Johann 206, 204, 273, 274
- Bock, Jerome (Hieronymus Tragus) 130, 133, 271, 298
- Boerhaave, Hermann 237
- Bonnet C.
 - cetacean classification 310
 - natural kinds 316
 - social characteristics of animals 296
- Boster J. 39, 50, 281
- botanical
 - gardens 9, 134
 - treatises 127, 128
- botany
 - fixity of genera 172
 - history 21
 - systematic 8–9
 - as true science 170
- Boyle, R. 190, 232
 - primary and secondary qualities 305
- brain
 - damage 51–2, 281–2
 - meaning store 52
- Bremenkamp, C. 156, 226
- Brou (Cambodia) 31, 32
- Brown, C.
 - animal kind discrimination 283
 - covert taxa 279–80
 - folk procedure for labelling unfamiliar plants and animals 285
 - formal equivalences 213
 - life form criteria 31–4, 278, 280
- Brunfels, Otto 130–1, 133, 134, 271
 - Weiditz' illustrations 298
- Buffon, G.-L. 19, 193, 233–5, 236–8, 273, 298
 - analogy 311
 - Analogy of Nature 241
 - anatomy and natural history 202, 242
 - animal anatomy 310
 - collapse of phenomenal order 196
 - cooling of globes experiments 236–7
 - counter-intuition 239
 - criticism of Linnaeus 304
 - doctrine of fullness 121
 - epigenetic theory of internal molding of organisms 303–4
 - essence of genera 194
 - generic ties between species 195
 - genus 195–6
 - mechanical synthesis 239
 - moral arithmetic 316
 - natural divisions 307
 - plant characteristics 191
 - rejection of Linnaean genera 194
 - social characteristics of animals 296
 - speciation 178
 - species 316
 - species characteristics 308
 - time and reality 308
 - Tournefort's classification 170
 - underlying nature of a kind 262
 - visible natural order 201–2
- bugs, life-form 33
- Bulmer, R. 34, 45, 103
 - basic level taxa 27–8
 - common-sense kind 67
 - covert taxa 45
 - folkbiological classification 213
 - isolates 279

INDEX

- Karam life-forms 34, 39–40, 319
 problems with life-forms 39–40
- Bunaq of Timor 5, 7, 280
 local flora 28
 plant classification 128–9, 280
- cactus 279
- Cain, A., 30, 296
 correlation of characters 205
 functional anatomy 311
 genus 26, 171, 257
 life form divisions 30, 151
 modern systematics 309
 name of essence 84
- Candolle, A.-P. 198, 199
 analysis of parts of organism 309
 collet 226
 comparative morphology 318
 diversity of living forms 309
 family resemblance of plants 198, 199, 256
 functional anatomy of plants 201
 human conceptualization 31
 Klein's classification 307
 new species 306
 organization in living world 210
 plant characteristics 191
 plant growth 226
 principle of subordination of characters 310
 structural analogy 311
- Canguilhem, G. 247, 261, 316
- Carey, S.
 child's knowledge of animal properties 218, 278, 286, 312
 natural kinds 71–4, 77
 ontologically distinct levels 90
- Carnap, R. 22, 290
- cassowary 39–40
- category 52–3
 definition 282
 theory 312
- causal
 analysis 92
 process 236, 290
 theory 64, 74, 75
 unity of world 147
- causality
 natural 94
 notions of underlying 216
- celestial bodies 141
- cell relationship to species 262
- cerebral impairment 51, 281–2
- Cesalpino, Andreas 18, 27, 124, 125, 271–2
 active intellect 299
 analogy as theory-formative device 225
 analogy use 229
 blood circulation 314
 classification 145, 151–2, 156–7
cor conception 226
 development of systematics 138, 139–40
 dual nature of form and universals 299
 family-level fragments 41, 155–6, 186
 folkbotanical life-forms 188
 fructification 168
 genera 153, 174
 genus development 157
 human mind 299
 intellectual intuition 144
 knowledge of genera 142
 methodology and metaphysics 142–3
 Morison's use of classification methods 302
 plant and animal analogy 225
 plant characteristics 160
 plant classification 301
 plenitude of forms 304
 principle of life of plant 178
 rational diagnosis 169
 species characteristics 300, 301
 species concept 27, 261
 species essence 303
 species fixing 152–3
 taxonomic system 225–30
 vegetative substance 153
- chain of being 205, 206, 208, 210–11, 232
 and anatomical study of man 242
 Buffon's 238
 Cuvier's 244
 natural history and 238
- characters
 correlation of 205
 essential 192
 habitual 176
 mammalian genera 193
 mathematical correlation of visible 209
 rational determination of generic 181
 uniform set within class 192
- children
 animal category distinction 281
 animal taxonomy 73
 artifacts and living things distinction 50–1, 217
 category definition 282
 human and animal distinction 74
 inductive generalizations 286
 knowledge integration 78
 linguistic input in taxonomic organization 284
 plant taxonomy 72–3

INDEX

- prelogical thought 312
- projection of properties to animals 278
- racial distinction 74
- response to living kinds 71–2
- single category grouping of animals and plants 73
- social and physical environment 21
- subordinate classification 283
- Chinese
 - herbals 18
 - illustration 134
- Chomsky, N. ix, x, 49, 312
- Christian cosmos 140, 148
- cincák* 40
- classes 11, 254–5
 - animal 192
 - artificial 187
 - highest genus 173
 - Lamarck's view 254–5
 - method of 306–11
- classification
 - Aristotelian 104
 - artificial 30, 170
 - combinatory system of morphological possibilities 157–8
 - cross-cultural correspondence 18
 - and cultivation 276
 - early European 128–9
 - folk 20, 27, 52, 53, 131
 - folkbiological 5
 - generic specieme level 69
 - historical development 85
 - inductive validity 24
 - John Stuart Mills' views 22
 - linkage of social and biological 214
 - mammal 184
 - man's needs 22
 - natural 277
 - natural affinity 128
 - nontechnical recognition 26
 - ordinary language 69
 - plant 301
 - preliterature societies 103
 - rationally determined system 185
 - Ray's system 161–2
 - scientific primary stage 27
 - sexual system 174, 187
 - sixteenth and seventeenth centuries 128
 - and society 214
 - special-purpose 24
 - subordinate 283
 - systematic 9, 158–65
 - taxonomic mode 283
 - underlying physical nature 70
 - worldwide 128, 135
 - zoological 190
- cognition
 - common-sense core 265
 - symbolic 219
 - universal domains 252
- cognitive
 - domains 214, 217
 - pathogenesis 217–20
 - perspective of ideas 3
 - principles 213
 - processes in theory forming 217
 - susceptibilities 79, 218
 - universals 2
- collet 226
- color
 - categories 282
 - terms 282
- common experience 222
- common sense 1
 - animal groupings 109
 - animal universals 96
 - anthropological 247
 - awareness of pattern 91
 - background to natural history 5
 - beliefs 2
 - break from science through classification 11
 - classificatory dispositions 210
 - codification of new phenomena 4
 - conceptual organization 55
 - core of cognition 265
 - dictates of 275
 - domains and study of knowledge-structures 266
 - empirical fact 1
 - epistemology 119
 - fallibility 119
 - familiar composition of the world 79
 - human minds 263–4
 - intuitive surety 155
 - kind 67
 - living kinds 80, 93
 - living world scope and limits 47
 - natural method of classification 46
 - and natural philosophy 319–20
 - nomenclature 137
 - ontology 85
 - phenomenal 247
 - plant and animal structures 249
 - realism 119–21
 - relevance of scientific groupings 256
 - and science 247, 311–18
 - scope and limits 275–6
 - Scottish philosophers 3

INDEX

- species-genus distinction 6
- symbolism 4, 212, 213, 247, 311–18
- terms 66, 69
- common-sense
 - beliefs, Moore's views 275
 - realism 317
- communities, ecological formation 263
- comparative morphology 318
- complexity progression of organic forms 208
- concept
 - and experience 93
 - formation 282
- conceptual
 - organization and common sense 55
 - universals abduction 90
- conceptualization 264
- Conklin, H. 42, 50, 52
- continuity, historical 66–7
- contrast 292
- Cordus, Valerius 133
- corn 64
- Correspondence Leibniz–Clarke* 273
- cortex–medulla theory 295
- cosmology, cultural 39
- cosmos 140, 141
 - neo-Aristotelian 231
 - organization 148
 - ovoid shape 148
- cotyledon
 - classes 203
 - structure 204
- counterintuition 284
- covert
 - complexes 43–4, 44–5, 279–80
 - fragments 186
- creationism 266
- Critica botanica* 306
- Critique of judgement* 273
- Croizat, L. 23–4, 309
- cross-fertility 29
- cryptograms 303
- Cucurbitae 132, 135, 136, 298
- culture
 - development and diversification 264
 - epidemiology of representations 217
 - knowledge acquisition 50
 - regularity of classification 17
 - sixteenth century 223
 - transmission 49–50
- Cuvier, G. 244, 245, 274, 296, 317
 - anatomy in natural history 202
 - animal classification 190
 - classes of organisms 242
 - diversity of living forms 309
 - functional anatomy 311
 - invertebrate groupings 307
 - invertebrate systematic diversity 106, 207
 - nature of classes, families, genera and species 254
 - plans of organization 210
- Darwin, C. 78, 245–7, 274, 277, 317
 - evolutionary theory 256
 - extinction in evolution 259
 - family resemblance 256
 - formulation of theory of natural selection 259–60
 - natural selection 289
 - origin of the species 245–6
 - speciation 178, 258, 277
 - on species 259, 260
 - structural homology 311
- Daubenton, L.-J.-M. 310
- Daudin, H. 256, 288–9
 - analysis of sources of taxonomic reasoning 253
 - Aristotle's biological classification 107, 294
 - living kinds 245
 - natural science 288–9
 - scale of nature 206
 - unity of families 256
- De animalibus* 271
- De generatione animalium* 270, 294

 ascendency over genus 188
 biological integrity 11
 building around genera 306

INDEX

- concept in scale of being 249
- constant community of characters 200
- definition as by mathematical correlation
 - of visible characters 209
- demonstration of criteria 201
- distance between 200
- intuitive foundation for natural 135
- methods of 306–11
- morphotype 206
- natural 187
- numerical equilibration 200–1
- organization 203
- phenomenal interconnections 205
- polygeneric 29
- primary rank in nature 189
- relationship with folk fragmenta 41–2
- resemblance 310
 - resemblance of living kinds 59
 - resemblance of plants 198, 199, 256
 - scale of Lamarck 244
 - semantic theory of resemblance 54
- family-level
 - fragments 41–6, 154–6, 186, 197, 198
 - groupings 197, 281, 286
- Farber, P. 190, 210, 317
- fast-mapping 65
- fauna, local 28
- Feyerabend, P. 216, 319
- first-order concepts 249
- flora
 - local 28
 - tree and herb partition 152
- Flore française* 206, 274
- flower
 - Linnaeus' division 171, 173
 - parts 160–1
- Fluxions* 233
- Fodor, J. A. 285
- Fodor, J. D., 59
- folk taxonomy
 - Aristotle's reliance on 113
 - basic level 25–9
 - Chinese 18
 - covert categories 42, 43–4
 - cross-cultural presumption of essential nature 62
 - difference from evolutionary taxons 70
 - family fragments 41–6
 - functional 52
 - incorporation of foreign species 43
 - knowledge transmission 50
 - life-forms 30–5
 - Linnaeus' appreciation 176
 - mid-level groupings 42
 - myths and symbolism 119
 - partition of local flora and fauna 101
 - plant groupings 42
 - scientific correspondence 27
 - species 79
 - structure 56
 - terminal contrast 53
 - underlying nature 249
- folkbiological classification 5–7, 17, 213
