- Donkin, William Fishburn, 23–24, 26, 32
- Doob, Joseph, 210
- Dubins, Lester, 239
- Dutch book, 5–6
- dynamic assumption of Bayesianism, 6, 131
- Edgeworth, Francis Ysidro, 60, 122, 142, 152, 154, 157
 reviews of Venn and Keynes, 153
- Eddington, Sir Arthur Stanley, 187, 199
- Ellis, Robert Leslie, 24, 32, 55, 120–121, 134–135
- Empirical Bayes methods, 211
entscheidungsproblem, 200
epoche, 15
- Erdős, Paul, 209
- Ewens, Warren, 236, 261
 sampling formula, 236–237, 238
- exchangeability, 3, 5–6, 9, 11–12, 27, 31
 Markov exchangeability, 12
 partial exchangeability, 12
 partition exchangeability, 91–92, 226–229
- Feller, William, 47, 107, 108, 202–203, 210
- figurate numbers, 64–65
- finite exchangeable sequences, 85–90
- Fisher, Sir Ronald Aylmer, 26–27, 53, 122, 123
 and the history of inverse probability, 142–157
 discussion of Boole, 143–147
 discussion of Venn, 143–144, 147–150
 discussion of Chrystal, 143–144, 150–152
 historical interests, 157
 and the fiducial argument, 161–188
 animosity towards Pearson, 163–165, 188–189
 initial fiducial argument, 165–171
 discussion of Neyman's paper on confidence intervals, 171–174, 191
 breakdown in relations with Neyman, 174–176, 191–192
 views on multiparameter estimation, 176–181
 shift in viewpoint, 179–181, 193–194
Statistical Methods and Scientific Inference, 182–185
 voices personal misgivings to friends, 186
 later literature on, 186
 distaste for axiomatics, 195
 views on the nature of probability, 170–171, 184–186, 190
- Forbes, J. D., 121, 135
